

FRANK V. THOMPSON IS MADE ASSISTANT CITY SCHOOLS HEAD

Committee Today Promotes Headmaster of the High School of Commerce to a More Important Post.

ATTENDANCE GROWS

Preliminary Statement Asserts That Average Enrollment Passed 100,000 Mark for First Time.

Frank V. Thompson, headmaster of the High School of Commerce, was appointed assistant superintendent of schools in Boston at a special meeting of the Boston school committee this afternoon. Mr. Thompson will succeed the late Robert E. Burke.

James E. Downey, who has been assistant in the High School of Commerce and a teacher in the South Boston evening schools, was appointed headmaster of the High School of Commerce.

Mr. Thompson, who has been headmaster of the High School of Commerce since its inception, was born at Batesville, Ark., July 8, 1874. He was graduated from St. Joseph's high school, Manchester, N. H., and entered St. Anselm's College at Manchester, where took A. B. and Ph. D. degrees.

Later he entered Harvard where he received the degree of Ph. D. and A. M. He then became master of the North Walpole grammar school, after which he was successively principal of the Wetherbee grammar school of Lawrence, Mass., of the South Boston high school, and headmaster of the High School of Commerce.

He was a sergeant of company H, first New Hampshire volunteers, during the Spanish-American war. At present he is a member of the Harvard Teachers Association and of the Boston City Club. He lives at 84 Brookline street, Brighton. The annual statistical report soon to be issued by the school committee will show, it was stated at the meeting, that during the school year which closed in June, the average number belonging throughout the year in the Boston public schools was 100,059 pupils. This is a gain of 1992 pupils over the corresponding average for the previous year, and it is the first time that the average membership has passed the 100,000 mark.

Furthermore, the increase shown is greater than the average gain for each of the four immediately preceding years by 304. This report will also be the first public school report of statistics of trade schools and continuation schools.

The number of day school teachers June 30, 1910, is shown to be 2848, which is 187 more than were in the service on the corresponding date of 1909. There is one less teacher in the normal school. The additional teachers are distributed as follows:

High and Latin schools 67, first to eighth grades 75, kindergartens 10 and special teachers 36. The increase in the number of special teachers was caused by the opening of the trade schools.

Previous to the last school year a falling off had been noted in the membership of the first and second grades of the elementary schools. This particular feature was not easily explainable in view of the apparent increase in the population of the city, but it appears now to be at an end, for during the last year the average number belonging in the first grade increased 108 and in the second grade 305. This is a net increase for these two grades of 503. The average membership for the year was as follows:

Schools.	At number	Gain over
Belonging	1909-1910	
Normal	239	5
High and Latin	11,059	1,325
Grades	82,739	213
Kindergartens	5,094	123
Special	372	92
All day schools	100,059	1,992
The average daily attendance was 90,891 or 91 per cent which is the usual attendance percentage.		

A NEW RESTELLI CLEW.

A new clew in the recent Quinoy shooting affair, comes today from Philadelphia. It was received in a letter from a former resident of Quinoy to a friend, briefly stating that the writer feels confident that he saw Louis Restelli on an electric car between Philadelphia and Atlantic City. Chief Frank Burrell of Quinoy has not received any further communications from the Hoboken, N. J., police.

PRESIDING OFFICER ATTACKED.

COPENHAGEN.—At Friday night's meeting of the international congress on private charity and public health an attempt by a Russian woman named Zabarowska was made to stab Commandatore Peano of Rome, acting chairman of the congress, and Dr. Lede of Paris, one of the speakers. Mme. Zabarowska was refused permission to address the meeting.

CITIZENSHIP SCHOOL CLOSES.

The school for citizenship of the Civic Service house in the North End had its closing exercises Friday night after a most successful summer season. The enrollment this summer of 124 wage-earners exceeds that of any previous year.

MAYOR GAYNOR TALKS OFFICIAL AFFAIRS TODAY

HOBOKEN, N. J.—Mayor Gaynor's condition was reported very much improved today. He slept more than eight hours last night, six of which were continuous.

Both doctors in attendance are highly pleased and say that the improvement has been so great that they are astonished. When Secretary Adamson came in to see him the mayor asked about the work in the office and discussed current affairs with him for a few minutes. He spoke optimistically of his complete recovery and said he hoped to be in the Adirondacks very soon.

For the first time since the mayor was taken to the hospital the members of his family went to bed at their regular hour last night. They were told that the mayor was in no danger.

CANDIDATE HARDING LAYS OHIO PROBLEM BEFORE PRESIDENT

Republican Nominee for Governor of Mr. Taft's Native State Is in Conference at Beverly Today.

BALLINGER GOSSIP

BEVERLY, Mass.—Warren G. Harding, the Marion (O.) editor and Republican nominee for Governor, with Mrs. Harding, motored into Beverly early today with the object of having a talk with President Taft over political matters in the President's native state.

Nominee Harding left Marion Tuesday, driving his auto through New York state and the Berkshires.

Senator Charles R. Dick of Ohio, who arrived here Friday, is to present Mr. Harding to the President. The meeting of Mr. Harding, Senator Dick and Congressman Nicholas Longworth today will offer an opportunity for the President to get a new angle on the political situation in Ohio. All three men were at the state convention, and are fully conversant with the various (Continued on Page Five, Column Three.)

PARADE FOR MILITIA TODAY CLOSES THIS YEAR'S STATE CAMP

A parade of the fifth M. V. M. through the principal downtown streets of Boston, which included reviews by Acting Gov. Louis A. Frothingham and city officials, today, marked the close of a year's encampments of the Bay State force for this year and possibly for two. The streets were lined with an enthusiastic crowd who cheered the soldiers all along the line of march.

The command looked like a victorious army returning from the front. Their banners and caissons with their blazers rolled showed their uniform as of the heavy marching order class.

The regiment broke camp at the state muster field, South Framingham, early today. General Manager A. E. Stone of the Boston & Worcester Trolley Air Line had five trolley sections waiting to transport the men. A review past Brig. Gen. William A. Pew, who has been the post commander, as the troops filed past brigade headquarters was the last duty on the muster field.

SHOE MACHINERY COMPANY BRINGS NEW PLANT SUITS

Four more bills in equity were filed in the United States circuit court today by the United Shoe Machinery Company against the Thomas G. Plant Company and Thomas G. Plant individually, for alleged infringement of patents for improvements in shoe machinery.

This makes 14 suits in all that have been filed by the United Shoe Machinery Company in the attempt to drive the Plant company out of the field of competition. The four latest suits are based upon alleged infringements of the Cutter-Bates patents. The former was granted to Solomon M. Cutter of Nashua, N. H., in 1897 for an improvement in nailing machines for boots and shoes, and is numbered 582,759. The Bates patents were granted to Arthur Bates of Leicester, Eng., in March of this year, for an improvement in presses. The patents are numbered 921,503 and 950,986. The United Shoe Machinery Company at present controls these patents and alleges that Mr. Plant and the Plant company have been infringing upon them. The writs are made returnable in September.

PASSENGERS WILL BE SAVED MANY MINUTES IN BOSTON TRIP BY NEW CAMBRIDGE TUNNEL

VIEW OF PROJECTS NOW UNDER WAY OR CONTEMPLATED AND OF POSSIBLE NEW CENTERS FOR TRAVELING PUBLIC. The map shows the line of the Cambridge tunnel which is now being built, the route of the proposed elevated to Cambridge, the line which probably will be followed by a riverbank subway and the relation of these constructions to the present railway system. On the left, above, is the junction of Commonwealth avenue, Beacon street, Brookline avenue and Deerfield street, looking eastward. On the right is Charlesgate West likewise looking eastward. These sites are within a short distance of each other and each has been proposed as the point of emergence for a riverbank subway.

OBSERVERS OF SKY MAY WITNESS FINE SHOW OF METEORS

Observers of the sky tonight will probably see a meteoric shower. A meteor, which was seen to fall to earth Thursday evening near the residence of Albert Richards on Salem street, Wakefield, was located this morning by Winslow Blanchard. In company with two other boys, young Blanchard was standing in the square at Montrose watching the meteoric shower, when the meteor seemed to fall close by. At the time, as it was dark, no one more any search for the celestial visitor, but this morning Blanchard made a thorough search in the vicinity with successful result.

The tear is about the size and shape of an orange, and consisting of a substance nearly resembling lava.

The fall of meteors began late Thursday night and between midnight and 2 o'clock yesterday morning watchers at Harvard observatory counted 40 brilliant plungers.

Tonight's fall is expected to be the heaviest of the meteor period. The Perseids, as they are called, because they seem to emanate from the constellation Perseus, have been much more noticeable this year than for many years past. This, it is thought, may be due to the passage in May of Haley's comet.

The comet discovered Monday night by the Rev. Joel H. Metcalf of Taunton has been observed from the United States naval observatory at Washington and photographed at Harvard observatory.

PLEAD NOT GUILTY IN CHINESE CASE

William Hackett and James Evans, employees of the Cunard Steamship Company, who were arrested Friday, charged with aiding Chinese to enter this country illegally, were arraigned today before United States Commissioner Charles K. Darling in the Federal building. Both pleaded not guilty and were held in \$2000 for a hearing on Aug. 23.

They were represented by Felix McGonigley, former assistant district attorney of Suffolk county. Assistant United States District Attorney William H. Lewis represented the government.

The name of the Chinamen caught at the New Haven railroad docks was reported today to be Jo Suey Kee. He is held at the immigration station pending the outcome of the case. A diligent search is being made in Boston and Charlestown today for seven other Chinamen who are said to have landed from the Saxonia with Jo Suey Kee.

HULL'S YEARLY CELEBRATION IS AN EVENT TODAY

Hull is en fete today, the occasion being the town's annual celebration. One thousand dollars has been set aside to defray the expenses of the day.

The celebration began at 9 o'clock a. m. with athletic events for the children in the J street field, Bayside. These included running races for boys and girls, with special classes for children 6, 8, 10, 12 and 14 years of age.

At 2 o'clock the field sports will be started at the K street park, under the direction of Hugh C. McGrath. There will be fireworks in the evening.

REPUBLICAN ISSUE FOR REFERENCE

The Republican state committee has issued a handy reference containing information of value to voters of the Bay state. It contains all the election laws of Massachusetts, as codified in 1907, together with all other acts relating to elections passed since the enactment of this codification.

Other articles of interest relate to assessment of poll taxes, caucuses, registration of voters, nominations, political committees, naturalization and elections. In the appendix is a convenient political calendar from July to November, inclusive.

TWO "1915" MEETS ARE HELD TODAY

Since the first "1915" athletic meets held July 23, 745 young athletes have entered the track and field events. The last two meets before the final at Wood Island will be run off at 3 p. m. today at the Columbus avenue and North End playgrounds. W. C. Matthews and Joe Redding are in charge. At the Columbus avenue playground the following will act as officials: Starter, W. C. Matthews; judges at finish, Roscoe Bruce, Washington, D. C., and Hugh Fitzgerald of Brighton; field judge, J. Bowser, S. B. A. C.; referee, Bert Woodcock.

ALTITUDE TRIAL MAY COME TODAY

ASBURY PARK, N. J.—Another big crowd gathered at the aviation field today, the attraction being the promised attempt by Archie Hovey to break the aeroplane height record of 6750 feet, made Thursday by J. Armstrong Drexel in England.

His attempt depended on permission being granted by the Wright brothers. They had intended that Walter Brookings do all their altitude work, but his injury makes this impossible at present.

END TELEPHONE MEN'S SESSION BY RIDE TODAY

The closing session of the convention of telephone men takes place today at Hotel Somerset. The members this forenoon listened to these papers: "The Relations of the Plant Department to the Commercial Department," by I. O. Wright of Boston; "The Relations of the Traffic Department to the Commercial Department," by J. F. Dwinell of Boston, and "Party Line Interference," with papers by W. M. McLaughlin of Boston and R. M. Mandell of Manchester, N. H.

This afternoon the delegates form automobile parties and visit various points of interest in Boston and Cambridge. Friday evening the members enjoyed a banquet at the Somerset as guests of the New England Telephone & Telegraph Company. Over 100 were present, including officials of the company of this and other states.

Carl T. Keller was toastmaster, and among the speakers were E. S. Willard, F. P. Valentine, E. W. Wilkie, E. W. Longley, W. J. Denver, J. S. Barry, T. E. Parker, F. J. Daboll, Thomas J. Feehey, G. G. S. Perkins, F. C. Munroe, G. H. Dresser, F. W. Story, I. O. Wright, all of the company, and H. B. Gilmore, New England manager of the Western Electric Company.

RUSSIAN LARCENY IS CHARGED HERE

Andrew Rulow, alias Julius Vezosal, music teacher, 42 Pratt road, Squantum, was arraigned before United States Commissioner Charles K. Darling in the United States district court today charged with the larceny of 200 government notes from the Russian government and asked its cooperation in finding the sub-treasury at St. Petersburg and were each 500 rubles in value, in all approximately \$50,000.

At that time the Russian government notified the American state department and asked its cooperation in finding these notes. Two weeks ago Chief Wilkie of the United States secret service was informed that 15 of these notes had turned up at the American Express Company in Boston and were passed by a man named M. A. Slobodkin, a banker, 57 Salem street. Subsequently Rulow returned with 15 more, this resulting in his arrest.

G. A. R. OPPOSES RAILROADS. LOUISVILLE.—Five hundred veterans of the Grand Army of the Republic have declared a boycott against railroads for alleged discrimination in charging the veterans an excessive excursion rate to the annual national encampment of the G. A. R. to be held in Atlantic City next month, and as a result this state, for the first time, will not be represented at the reunion.

DAYS OF INSPECTION WILL ALLOW STUDY OF MEET'S AIRCRAFT

An opportunity for the general public to examine the machinery of aeroplanes and the construction of great balloons at close hand and minutely will be afforded at the forthcoming Harvard-Boston aviation meet at the Harvard aviation field, Atlantic, Sept. 3 to 13, if the latest plan of the managers of the meet is successful.

Between the first and last date of the meet there will be two Sundays, on which neither aeroplane nor balloon flights will be made. It is now planned by the management to open the grounds on those days for the purposes of inspection and study. To keep the attendance within bounds and attract only those who are interested in the subject of conquering the air, an admission of 50 cents will probably be charged. As all aviators are accustomed to overhaul their machines on Saturday nights, during meets, opportunity will be given for the inspection of the various parts of the aeroplanes, and an insight may be gained as to their articulation, and this will amount to invaluable personal instruction from experts.

Jams W. Martin, manager of the Harvard Aeronautical Society, went Friday to President Lowell's summer home at Cotuit, to confer with the head of the university, and it is understood that his mission was to secure the advice of President Lowell in the matter of these Sunday openings. It would be of immense public benefit, declare the managers, if competent persons could be on hand on those days to explain the construction and workings of the machines, with practical exhibits.

Richard R. Young, manager of Charles (Continued on Page Five, Column Four.)

WARSHIPS COMING ON COLUMBUS DAY

The Hon. Beekman Winthrop, assistant secretary of the navy, today notified Congressman Joseph F. O'Connell that the entire third division of the Atlantic fleet will participate in the Columbus day celebration at Boston, Oct. 12.

The Atlantic fleet includes the battleships Georgia, Nebraska, Rhode Island and New Jersey.

MR. HIGGINS AGAIN A CANDIDATE.

John J. Higgins, district attorney for Middlesex county, is a candidate for reelection and his friends have already begun active work in his behalf.

CAMBRIDGE TUNNEL TERMINUS IN BOSTON WILL BE BID ON SOON

Advertisements Seeking Them Will Be Issued Next Week and the Figures Will Be Studied August 30.

PARK STREET PLANS

Great Saving of Time Will Be Made for Greater Boston by Transit Changes Now Under Way.

To Park street subway station from Harvard square, Cambridge, eight minutes; from Central square, six minutes; from Kendall square, four minutes; this, in a nutshell, is the significance of the building of the Cambridge tunnel.

Advertisements for bids for building the station at the Boston end under the present Park Street station, will be issued the first of next week, and the bids will be opened at noon, Aug. 30.

This reduction in time is the desideratum that is urging along the work at record speed on what is said to be the best-made tunnel ever yet constructed. Today the trip from Harvard square to the Park street station requires from 25 to 30 minutes, and longer if the not unusual obstacles attending surface traffic interfere. The tunnel will save about 20 minutes to Cambridge patrons; and in a distance of about five miles this is an immense benefit.

Plans for the station at Park street have already been completed.

Six stairways will connect the present Park street station with the tunnel station below. One will extend from each of the subway platforms of the tunnel station. This is the one to be used by the outward-bound, or Cambridge passengers.

The two side platforms of the lower station will be used for unloading passengers from Cambridge. From each of these side platforms a flight of stairs will lead to each of the present subway platforms, making four of these stairways.

It will also be necessary to have stairways from Tremont street to each of the platforms of the tunnel station, as well as inclined elevators between Tremont street and the two side platforms on which the passengers unload. People will be expected to walk down the stairs, even though provided with means for riding up.

The plans have been drawn in anticipation of two further improvements. These are the extension of the Cambridge tunnel to the South station, and a joining of this station with that of the Riverbank subway soon to be built.

The tracks of the Cambridge tunnel at its Tremont street end will be 37 feet below the surface.

Most of the work will be done by tunneling. It is estimated that 36,000 cubic yards of earth will be excavated, and that 9000 yards of concrete will have to be put in its place. Three hundred tons of steel rods will be needed for reinforcing this concrete, besides 400 tons of heavy steel, consisting of posts, beams and girders for general structural work. This work is to be completed on Sept. 1, 1911.

To the North station from Lechmere square, Cambridge, three minutes; this is the estimated time for the trip when the trains are running over the elevated structure alongside the Charles river dam. Today the time required is eight minutes. Here is a saving of five minutes in a distance of one mile. This is the second of the two big changes in travel which will come with the completion of the two projects now under way.

An even newer project is that of the proposed Riverbank subway. The plans have not yet been drawn, and the exact position is yet in doubt. The construction of the subway itself, not considering the fitting it up for service, will occupy about two years. That is the estimate of a Boston expert engineer, and is based upon the custom of contractors to hasten the work by every means possible. In subway building, said this man, time is indeed money, and expedition is economy. This subway is planned to extend between Park street and Charlesgate East, but so much opposition has been aroused against the proposition to have an entrance at Charlesgate East that it seems very likely the location will be changed, and probably to the union of Commonwealth and Brookline avenues and Beacon street, sometimes termed "Five Points," or "Three Corners."

Through this subway the surface cars will run, so that less time in proportion to the distance will be saved, and at present it is not possible to make an accurate estimate. It is possible that a line may be run from this subway to Cambridge, across the Brookline bridge. This line, however, would be available to only a small section in Cambridgeport, which would have also the advantages of the Cambridge subway. But in any emergency it is certain that this (Continued on Page Seven, Column Two.)

News of the World Told by Cable and Correspondence

PRINCE RUPERT TO BEGIN CITY CAREER ON SINGLE TAX IDEA

May Be First Community in the World to Start This System—Other Canadian Municipalities in Line.

VANCOUVER RESULTS

(Special to The Monitor.)
PRINCE RUPERT, B. C.—Canada's progress toward an altered taxation system is accentuated by the decision of the city council to inaugurate the single-tax system as the basis upon which the new city's revenue will be raised. It is probably the first community in the world to start out upon its civic career with such an arrangement. But as Prince Rupert's affairs have been unusual at every point the novelty of its taxation method may not greatly surprise even its most conservative citizens. Most of its unpopularity is due to the fact of its having been planned before any one expressed a desire to live there.

The Grand Trunk Pacific having marked it as the western terminus of the line, alert people near enough, or adventurous ones from farther off, began moving in with determination to "be in at the start." The "baby city" as it is called will know no transition from landing place to great city, but begins at once the preparation to fill its place in the last category.

Under the guidance of the Grand Trunk Pacific it has been carefully laid out, thoroughfares adequately provided for, and locations for fine public buildings such as well meet the demands of important civic affairs.

The decision by this council, to base taxation upon land values alone, is plainly stated to have as its purpose the elimination of the "land speculator" and the young city fathers have expressed almost unanimous conviction that all the civic interests will be benefited by relieving of taxation all commercial enterprise and real estate improvements.

Owing to the inevitable importance which the city will attain, the city council has seen the rush of the land speculator already well started, and other communities are waiting to see if the new method of taxation will effectively dampen his ardor in holding desirable land out of the market while the city builders increase its value for him.

The city of Vancouver adopted this method less than a year ago. Citizens doubtful of its wisdom predicted a decrease of investments and activity, but at the end of six months a record-breaking building activity was the result, over \$6,000,000 being the registered valuation of new constructions. The previous year had shown the highest record up to date, and during its whole period the building permits showed a valuation of only \$7,265,565, barely a million ahead of the first six months' work under the new taxing, and the activity has continued during the summer months so far as the reports cover.

Winnipeg, Man., has more recently started in a similar direction with the expectation that its commencement of throwing a larger proportion of taxation on land values, will result in the complete following of Vancouver's lead in the adoption of the single-tax system.

The Giant's Causeway: One of the Natural Wonders of the World

Many Scenic Attractions in North of Ireland May Now Be Reached by New Railway Route.

DUBLIN—The Giant's Causeway, near Portrush in the north of Ireland, is one of the natural wonders of the world. The peculiar formation of the basaltic rock gives the appearance of rows and rows of gigantic columns welded closely together and standing far out into the sea. It is divided into three parts, the largest or grand causeway, being about 700 feet long, and the little causeway 400 feet at low water. Many a legend is told about this remarkable spot, for the Irish are an imaginative race, and here at last they have material on which to weave endless romances. One part of the rock resembles a Brodian organ with a magnificent colonnade of pillars no less than 120 feet high. Another spot known as the Giant's Amphitheater, consists of two rows of columns forming a complete half circle.

PORT, MOON AND STACKS.

the upper ones being 80 feet high and the lower ones 60 feet. Other parts of the Causeway are known locally as the

Giant's Gateway, with steps formed of columns, the Giant's Loom and the Wishing Chair, which consists of a group of pillars gathered round a single column. As these formations all bear a certain resemblance to their prototypes in very large editions, it will readily be granted that in this instance there is some excuse for the traditions which envelop them. The legendary history of how the Causeway was built runs as follows:

In the ancient days, Ireland was ruled by a powerful giant named Fionn Mac Cuil (pronounced Fin Maccul), who seems to have been of a violent and quarrelsome disposition. It is said that he so irritated his good wife that one fine day she flung her wedding ring from the top of the Antrim mountains. It fell on a spot 10 miles away, and was immediately buried by the fairies so that the gold should not be seen and stolen by mortals, for at that period gold and gems were not so common in Ireland as in the days when the maiden adorned with costly jewels walked the whole length of the land unmolested. Near Belfast there is a circular enclosure about a quarter of a mile in diameter which is said to contain the ring of Mrs. Fionn, although antiquarians ascribe it to the Druids. The redoubtable Fionn used to quarrel with all his neighbors, especially with Far Rua, a red-haired Scottish giant who lived across the sea. On one occasion Fionn

ameter which is said to contain the ring of Mrs. Fionn, although antiquarians ascribe it to the Druids. The redoubtable Fionn used to quarrel with all his neighbors, especially with Far Rua, a red-haired Scottish giant who lived across the sea. On one occasion Fionn

dug up a clod of earth and flung it at his enemy; but his aim was poor, or the distance was too great; the clod of earth fell into the sea, and is known today as the Isle of Man.

Some traditions say that the hole from which he stooped the earth is now Lough Neagh—the largest lake in the British Isles. Finding that they could not aggravate each other sufficiently without coming to closer quarters, the two giants began to build a road across the sea so as to facilitate their mutual encounter. Apparently the project was soon abandoned; the island of Staffa contains all that remains of the Scottish giant's road, while the causeway near Portrush shows the work of his Irish rival.

Besides the Causeway, there are many other attractions for the visitor to the north of Ireland, and not the least of these is the new express route via Heysham and Belfast which has been lately opened by the Midland Railway Company, so that this remarkable place can now be reached quickly and comfortably.

TELEPHONES FROM RAPIDLY MOVING PASSENGER TRAIN

Henry Von Kramer Invents New Method Whereby a Passenger May Call up Home While Speeding By.

PROVES SUCCESSFUL

LONDON—An interesting description is published by a representative of the Daily Mail who witnessed some eminently successful experiments that were carried out on a train running at about 40 miles an hour. The experiment was arranged for the purpose of testing a new system whereby it is possible to telephone with ease from a train moving at a considerable speed. The inventor is Henry von Kramer, and the success which crowned the trials proved that it would be quite easy for a man to telephone to his office or his home while traveling in a train between the two.

Mr. von Kramer has been experimenting with this system for the last four years. A double line of wire was laid along the sleepers over about four miles of the railway, and a telephone apparatus was placed in the break van of the train, the other instrument being in a signal box. The conversation carried on is reported to have been clear and distinct as if the train had been stationary and connected with the signal box by the ordinary telephone system.

It appears that the great difficulty Mr. von Kramer had experienced was to get rid of the induction of the telegraph wires along the side of the railway; he has however, now succeeded in cutting out all interference by placing a band of wire completely round the carriage. The inventor claims that the system can now be extended to any length of line regardless of the number of wires in the neighborhood, at a cost of less than \$50 a mile. The main difference between the system referred to above and other systems with which experiments have previously been carried out is that there is no "brush" contact between the moving train and the stationary wires.

It is understood that one of the trains running on the Brighton line will shortly be fitted with one of these instruments, so that passengers traveling between London and Brighton will be able to send and receive messages. Mr. Kramer is in the meantime busily occupied in endeavoring to perfect a system whereby it will be possible to telephone without wires from room to room in a house, the instrument being moved about at will.

SHOULD ENCOURAGE GROWTH OF COTTON THROUGHOUT INDIA

(Special to The Monitor.)
LONDON—A deputation consisting of representatives of the International Cotton Federation waited on Lord Morley at the India office recently, for the purpose of bringing to the attention of the Indian government the necessity for encouraging the growth of cotton in India and improving the quality of the product. Among those present were Lord Rotherham, A. W. Barton, M. P., G. A. Arbuthnot, M. P., and other members of Parliament. The deputation was introduced by Alfred Emmott, deputy speaker of the House of Commons, who referred in the course of his speech to the importance of the cotton industry, pointing out that it furnished nearly one half of the exports of the manufactured goods for this country. He pointed out also that the amount of cotton goods exported from Great Britain represented half the total exports of Germany, and was within £20,000,000 of the value of the total exports of manufactured goods from France.

Lord Morley, in addressing the deputation, said that he might be perfectly sure of his sympathy and of his desire to do all that he could to carry out their proposals. He would submit the details they had laid before him to the consideration of the able experts of the Indian agricultural department. He expressed the hope that some way might be found of putting into effect the wishes expressed by the deputation, although it was not an easy matter to do all that they required.

SUNDAY LAW TO BE APPLIED ON ALL WEEK DAYS

Anti-Alcoholic League After Government to Close the Saloons During the Mexican Centennial Celebration.

(Special to The Monitor.)
MEXICO CITY—Every day during the Mexican centennial celebration next September will be Sunday, so far as the restrictions upon saloons are concerned, throughout the federal district, if the Mexican Anti-Alcoholic League succeeds in its purpose. It is stated by members of the league that the assistance of prominent women of Mexico City has been invoked to bring strong pressure to bear upon the federal district authorities to have a special ordinance enacted regarding "cantinas" and "pulque" shops during the month of celebration.

The government is asked to apply the closing law, closing these places at 2 o'clock in the afternoon. The league points to the excellent results obtained in recent years by applying early closing hours for holidays as well as Sundays and urges the point of national pride in taking such a step while the centennial is in progress to make a favorable impression upon visiting foreigners.

If this action is taken it is not questioned that it will have a salutary influence upon public order in the city, as during the celebration there will naturally be many in the city who are not engaged in any business but merry-making.

JAPANESE FLOOD DAMAGE.
TOKIO—The devastation wrought throughout many districts by the recent floods is great. In the lower sections of Tokio alone 30,000 houses are submerged. Communication by railroad throughout has been interrupted.

THINKS COLONIES SHOULD BE READY TO SUPPLY FLEET

(Special to The Monitor.)
LONDON—Reference was made in these columns a short time ago to the imperial scheme proposed by Mr. Grove, whereby the admiralty should have first call on the coal obtained from certain mines in South Africa. The idea upon which Mr. Grove bases his scheme is that the colonies would be glad to avail themselves of the privilege of assisting in maintaining a fleet for the protection not only of the whole country but of the overseas dominions. At a reception held at the Imperial Colonial Club recently Mr. Grove delivered an address in which he pointed out that the idea of the offer made to the imperial government and sister nations was not founded solely on the supply of coal. He hoped that the principle would eventually be applied to other sources of material for primary purposes whether it be wheat, flour, petroleum or anything which would contribute in case of emergency to the common safety of the empire and help to secure its defense without taxing the mother unduly or placing burdens on any of the sister nations.

FAVOR PHYSICAL TRAINING.
BRUSSELS—The international congress of education has adopted a resolution favoring making physical instruction compulsory in all public and private schools.

TAXICABS IN POONA.
(Special to The Monitor.)
POONA, India—Poona has followed Calcutta's example and taxicabs are now seen running on its streets.

VICE-PRESIDENT CONFIRMS REPORT AS TO EXTENSION

Canadian Northern Railway Company to Build a Branch to the North End of Vancouver Island.

(Special to The Monitor.)
VICTORIA, B. C.—On his recent visit to the city, D. D. Mann, vice-president of the Canadian Northern Railway Company, confirmed the report that his company expects to extend its island branch to the north end of the island, and that in all probability it will be completed as soon as its line through the mainland. Mr. Mann and his associates are heavy investors in the island's coal and timber lands, and he believes there is ample room and opportunity for more than one north and south railway through it. The delay in beginning the construction of the island section of the railway is due to the desire to secure the best possible route to permit of its extension to the north end.

AMERICANS SIGN ARBITRAL PACT

BUENOS AIRES—The Pan-American Congress has unanimously approved a new convention obligating the republics of America to submit to arbitration all pecuniary claims that they are unable to settle amicably through diplomatic channels. The Venezuelan declared that he signed this proposal under reserve and with the understanding that diplomatic appeal should be had only in the case of a denial of justice.

The congress also approved a convention regarding literary and artistic copyrights in accordance with the plan submitted by the Chilean delegate.

MINISTER RETURNS FROM TWO MONTHS' TRIP TO FAR NORTH

(Special to The Monitor.)
VANCOUVER, B. C.—The Hon. Frank Oliver, minister of the interior in Sir Wilfrid Laurier's cabinet, interviewed here on his return from his 5,000-mile trip through the northwest by way of the Mackenzie river into the Arctic Circle, and through the Yukon to Alaska, declared that his trip was only a holiday jaunt and made light of the hardships of the journey.

For more than a month the minister was wholly outside the bounds of civilization. Starting from Edmonton, the route lay over the prairies to the Athabasca river across Lake Athabasca, along the Slave river and across Great Slave lake to the Mackenzie river, which was followed down to Ft. Good Hope, just south of the Arctic Circle. From this point the party turned off towards Alaska, by way of Peel, Porcupine and Yukon rivers, finishing the trip to Dawson by steamer from Ft. Yukon.

Mr. Oliver described his trip as highly instructive, giving him an insight into conditions in the far north which could not be gained from government reports. He was struck by the luxuriance of the vegetation in the valleys through which they passed in the far north, the hardier vegetables being raised to maturity even within the circle.

1908	John Bredemus, Princeton	5800
1909	M. J. Sheridan, New York	7385

CHICAGO—With 21 of the leading all-around athletes of this country entered to take part in the twenty-sixth annual all-around national championship meet of the United States, it is expected that one of the most exciting battles ever seen in such a meet will be witnessed on the Chicago Athletic Club field this afternoon.

The absence of Martin J. Sheridan, the present champion and undoubtedly the greatest all-around athlete of modern times, will rob the meet of considerable interest from a high-class point of view, but with such men as E. H. Clarke of the Boston Athletic Association, winner in 1897 and 1903; Victor Kennard, second to Clark in the New England all-around championships in 1909; John Bredemus of Princeton, champion in 1908; J. H. Gillies of Vancouver, J. J. Cody of Newton, and several other good all-around men taking part, it should be a very close meet.

It is to be regretted that Sheridan cannot compete as he would stand a fine chance of breaking his present record and putting it at a mark that would last for years. His wonderful work of 1909, when he made a total score of 7385 without extending himself to the limit, will long stand as the best unless he tries for a new mark. His performances at that time were as follows:

100-yards dash	10.3-58
Running high jump	5ft. 7in.
Half-mile walk	22m. 43s.
100-yards dash	10.3-58
100-yards dash	10.3-58
100-yards dash	10.3-58
100-yards dash	10.3-58
100-yards dash	10.3-58
100-yards dash	10.3-58
100-yards dash	10.3-58
100-yards dash	10.3-58

One of the athletes whose work will be watched with great interest is Thompson. Gillies, the Vancouver (B. C.) policeman, athlete, is also expected to be among the best performers. In training Gillies is said to have come within 15 points of the world's record, held by Martin Sheridan.

The work of the two ex-champions, Clarke and Bredemus, will also be watched with interest. Clarke has been competing since 1905, but should he well up among the leaders, although he can hardly be expected to take first place. Bredemus won the title in 1908 because Sheridan was in London at the Olympic games, and his score for the 10 events was but 5800. He will have to improve this materially if he is to finish well up.

Chairman James E. Sullivan of the Amateur Athletic Union championship committee will referee.

Man Who Will Referee All-Around Contest for Twenty-sixth Time

JAMES E. SULLIVAN. Secretary Amateur Athletic Union.

RATIONAL GOLF BY JASON ROGERS.

For shot approaches from just off the green unless over very rough grass I believe that the chip shot with the mid-iron is more dependable than a similar stroke with the mashie. The mid-iron chip assumes more the features of a longish approach putt than a pitch and run like the mashie.

There is much more likelihood of topping the shot or not getting the ball just to your liking with the mashie. It has always been one of my pet shots with the mashie, but now that I have found how to lay the ball nearer the cup nine times out of 10 with the mid-iron, I only use the mashie where absolutely compelled to.

As I have stated before, there is no prettier shot to watch than the accurately picked up mashie approach that gets just the run that the golfer desires. Its only weakness is in the varying conditions that the ball may meet on its first contact with the ground.

A deeply cut stroke finding a particularly luxuriant piece of turf will frequently stop almost in its tracks, and hardly make the edge of the green. While if on the other hand it hits a baked spot on the far side of a ridge it will run on like mad past the cup.

For practical purposes where there is not a hazard to be cleared on the approach, I believe that the mashie should come into play for distances from 20 yards to 80 yards from the green, using the mid-iron for the shorter and longer shots.

On the very short mashie shots the average golfer is inclined to take a last peep at the hole just as he is about to strike the ball. This generally results in a topped shot or one badly sliced, and it is just as important to keep the head still and the eye on the ball as in driving.

It is also well to remember that no matter how short the shot, the club head should hit the ball firmly and accurately and follow through after it. There is a tendency with some players to think that on short iron shots the club can stop after hitting the ball. The follow through often helps straighten out some trivial irregularity at another point in the swing.

HERRESHOFF IN FINALS WITH KERR. MANCHESTER, Vt.—Two New York golfers, Frederick Herreshoff and Hamilton K. Kerr, are playing here today on the Ekwanok Country Club links in the 36-hole final for the First President's cup.

Herreshoff won his way into the final by decisively defeating 6 up and 5 to play, Henry H. Wilder, the brilliant Boston golfer, who returned the remarkable card of 69 in the second round, which is the best score ever made on the Ekwanok links in a competitive match.

The metropolitan champion was steady and accurate at all times, while the Bostonian placed himself at a serious disadvantage by wild tee shots.

H. K. Kerr defeated T. M. Claffin of Wollaston by 3 up and 2 to play. They had a square match going on, but were all square at the turn with the exception of Kerr, who had a lead of one hole at the twelfth, and pulled drives on the fourteenth and fifteenth increased his advantage to 3. The summary:

FIRST PRESIDENT'S CUP. Third round—H. H. Wilder, Vesper, beat E. E. Sturges, Wykagyl, 7 and 6; Frederick Herreshoff, Ekwanok, beat R. D. Campbell, Dorset Field, 2 up; H. K. Kerr, Wykagyl, beat F. A. Martin, Ekwanok, 1 up (19 holes); T. M. Claffin, Wollaston, beat W. S. Carleton, Brae-Burn, 4 and 2; Semi-finals—Herreshoff beat Wilder, 6 and 5; Kerr beat Claffin, 3 and 2.

MANCHESTER CUP. Third round—W. K. Gillett, Wykagyl, beat T. E. Brown, Philadelphia, 1 up (19 holes); E. W. Clark, Ekwanok, beat C. H. Gardner, Ekwanok, 6 and 5; R. E. Hanson, Philadelphia, beat F. C. Robertson, Dyker Meadow, 5 and 4; H. W. Stricklen, Brae-Burn, beat F. W. Kemble, Philadelphia, 3 and 1.

Semi-finals—Clark beat Gillett, 3 and 1; Stricklen beat Hanson, 4 and 2.

DETROIT FARMS WILSON. DETROIT—Earl Wilson, the pitcher whom the Detroit American team secured from Peoria, has been released to Toronto in the Eastern league. He will be recalled next spring.

AUSTRALIAN EXPERT ON DEVELOPMENT OF CRAWL STROKE

Norman Cox, Swimming Coach, Compares Work of American and Foreign Swimmers in Perfecting.

MANY NEW PHASES NOW GETTING READY

Few men have given to the swimming stroke the intelligent study that has Norman Cox, the great Australian coach and expert, and he gives much interesting information in the following interview regarding the crawl stroke:

"The difference between the Australian and American types of crawl only exists in the mind of people who have not studied both countries. I know that Americans think Australians still swim the obsolete crawl introduced years ago by Cavill. You have to travel to learn the truth. It will probably surprise the American to hear that Cavill himself has gradually modified his stroke until it is unrecognizable and that Australians have developed as many varieties of crawl as Americans have here. In fact those phases of the evolution that have appeared in America find exact counterparts in every swimming center in Australia. Daniels and Healy swim almost exactly alike. Cavill now affects a stroke that would be termed the pure American crawl. This is curious yet quite natural. Give to any intelligent people certain admitted principles upon which to work toward a definite object and they are not likely to reach very different results. When the crawl drive proved its efficiency and all countries adapted it to the trudgeon arm stroke, they were bound to advance on parallel lines. All experimented and tried thoroughly and it was but natural that in discarding the unsuccessful discoveries they should attain through elimination identical results.

"In Australia they started with a short arm stroke and a synchronous timing of arms and legs. Then they found that this stroke, admirable for sprinting, was totally unfit for distance swimming and in lengthening the arm reach they had to narrow the leg thrash, some adding a fluttering motion, that made it continuous, and that is practically the pure American crawl. The Cavill stroke is as obsolete in Australia as it is here, and since Daniels has passed up the defective stroke he invented and Handy's legless crawl never amounted to anything it must be admitted that the list of successful crawls dwindled down to just one, or if you wish to be very discriminating to two. No doubt both here and abroad there are in existence several other strokes, the trudgeon included, but those who have gone into the matter thoroughly know that they are bound to make room eventually for the two mentioned above and for the others which we will unquestionably develop as we go along.

"The American method of classifying every new phase of crawl is admirable. It trains swimmers to be observant and insures more rapid and widespread advance. I am surprised that no one has attempted it in other countries. It cannot but give the best results. All I have to criticize about it, is your habit of giving the strokes names of swimmers. These swimmers will change their methods as Daniels did, when they improve, and then you'll have a name that no longer represents the stroke the swimmer uses. It will be very confusing."

HERRESHOFF IN FINALS WITH KERR. MANCHESTER, Vt.—Two New York golfers, Frederick Herreshoff and Hamilton K. Kerr, are playing here today on the Ekwanok Country Club links in the 36-hole final for the First President's cup.

Herreshoff won his way into the final by decisively defeating 6 up and 5 to play, Henry H. Wilder, the brilliant Boston golfer, who returned the remarkable card of 69 in the second round, which is the best score ever made on the Ekwanok links in a competitive match.

The metropolitan champion was steady and accurate at all times, while the Bostonian placed himself at a serious disadvantage by wild tee shots.

H. K. Kerr defeated T. M. Claffin of Wollaston by 3 up and 2 to play. They had a square match going on, but were all square at the turn with the exception of Kerr, who had a lead of one hole at the twelfth, and pulled drives on the fourteenth and fifteenth increased his advantage to 3. The summary:

FIRST PRESIDENT'S CUP. Third round—H. H. Wilder, Vesper, beat E. E. Sturges, Wykagyl, 7 and 6; Frederick Herreshoff, Ekwanok, beat R. D. Campbell, Dorset Field, 2 up; H. K. Kerr, Wykagyl, beat F. A. Martin, Ekwanok, 1 up (19 holes); T. M. Claffin, Wollaston, beat W. S. Carleton, Brae-Burn, 4 and 2; Semi-finals—Herreshoff beat Wilder, 6 and 5; Kerr beat Claffin, 3 and 2.

MANCHESTER CUP. Third round—W. K. Gillett, Wykagyl, beat T. E. Brown, Philadelphia, 1 up (19 holes); E. W. Clark, Ekwanok, beat C. H. Gardner, Ekwanok, 6 and 5; R. E. Hanson, Philadelphia, beat F. C. Robertson, Dyker Meadow, 5 and 4; H. W. Stricklen, Brae-Burn, beat F. W. Kemble, Philadelphia, 3 and 1.

Semi-finals—Clark beat Gillett, 3 and 1; Stricklen beat Hanson, 4 and 2.

DETROIT FARMS WILSON. DETROIT—Earl Wilson, the pitcher whom the Detroit American team secured from Peoria, has been released to Toronto in the Eastern league. He will be recalled next spring.

HARPOON, BEAVER AND CIMA CHOSEN FOR AMERICAN TEAM

Eastern Yacht Club Selects These Sonders From 13 Which Started in Preliminary Races.

NOW GETTING READY

MARBLEHEAD, Mass.—The work of finally preparing the three American sonder yachts, Harpoon, Beaver and Cima, which have been selected by the Eastern Yacht Club to represent this country in the international sonder races with three Spanish yachts, beginning next Wednesday, is being pushed today and every effort will be

ORIENTAL RUGS

From Old Stamboul, Constantinople

Fortunate indeed were Chandler & Co. to have their buyer in Constantinople at the time they did, as the market was full of rugs and the prices were lower than they have been for years—further, their buyer was in Stamboul at the incipency and height of the *boycott of the Caucasian Rug Traders*, during which prices on the market reached an unheard of low level.

Antiques and Semi-Antiques

About 115 Daghestans, Kabistans, Cubas, Shirvans and other rugs of the Caucasus, of the very highest character, magnificent quality, and of the weaves now scarce, but justly famous throughout the world among the lovers of fine rugs. They are all in the geometric designs, characteristic of the old Caucasian and Cabistan weaves and in the almost indescribable shading of the deep old blues, ivories, gold, old reds, turquoise, greens—in fact, Robert W. Chambers, in his graphic description of a rug in *The Tree of Heaven*, portrays many of these fascinating pieces.

There are the Rugs about $3\frac{1}{2} \times 5\frac{1}{2}$ —the long narrow pieces about $3 \times 3.6 \times 10$, and the large Rugs about 5 to 6 feet wide and 9 to 12 feet long—and the prices are from

Magnificent Oriental Rugs at Wholesale Prices

KURDISTANS PERSIANS MOSULS CAMEL'S HAIR BIJARS HAMADANS, ETC.

There are about 289 of these magnificent Rugs, superb in coloring and design, with wearing qualities that will last a lifetime, and with a character and coloring that will add to the furnishing of any room, and priced so low that prospective purchasers cannot but be interested.

Kurdists—Magnificent old pieces—some as large as 4.0×9.0 —thick, heavy rugs with a natural sheen like plush. Some of the heavy pieces used by the nomads in their tents are of unusual thickness—most of them are antiques. In past years such rugs have sold from 25.00 to 40.00. Now priced.....

Mosuls—Fine, firm, strong rugs, woven from choice wool with a wonderful lustre—in colors of deep blues and reds predominating, many having natural camel's hair centres. Any number of sizes from 2.6×5.0 to 4.6×9.0 . Usual values 25.00 and 35.00. Marked.....

Hamadans—From the western part of Persia—every piece in good condition, some of them with a sheen and luster that rival a piece of mohair. Values 25.00 and 40.00. Priced.

Feraghans—Woven in Persia, strong, sturdy rugs that will last a lifetime. Beautiful colorings in deep rich reds and blues; convenient sizes. A few years ago it seemed impossible to ever get such rugs again to sell at less than 35.00 and 40.00. In this lot they go at..

15.00
And
18.50

Hall Rugs from Persia

Sizes from 3.0 to 4.0 feet wide and 12.0 to 20.0 feet long.

The ideal rugs of the Persian noble or the wealthy Persian merchant, as they are the rugs they use in their own homes—they come in pairs, one rug being used on one side of the room and one on the other side, and on these are seated the Persian host, the male members of his family and his guests—these rugs must be of fine quality and woven in the most beautiful colorings and of the finest wool.

There are about 40 in this first shipment and they are magnificent pieces and ordinarily would be priced about twice as much.

Long Hall Rugs. Values 75.00 to 100.00. 45.00

Longer Hall Rugs. Values 100.00 to 125.00 55.00 and 65.00

NEWS IN AND AROUND ABOUT THE STATE

WINTHROP.

Among this week's arrivals at the beach are Mr. and Mrs. E. L. Knowlton, Gardner; Sheldon M. Booth, Chicago, Ill.; Miss Josephine L. Farley, Miss Sadie T. Farley, Mr. and Mrs. W. A. Rose, Miss Evelyn L. Rose, Miss Esther P. Rose, Torrington, Conn.; R. J. Nelson, Montreal, Que.; Mary E. Power, Brooklyn, N. Y.; Mr. and Mrs. E. D. Welch, Francis Welch, Bernard Welch, Rutland, Vt.; Miss Nellie Doherty, Miss May Doherty, South Manchester, Conn.; Miss Mary E. Allaine, Miss Nellie Ryan, Hartford, N. J.; Mr. and Mrs. P. G. Dunham, Granby, Ore.; Mr. and Mrs. J. H. Potter, Hartford, Conn.; Mrs. F. M. Gorham, New Haven, Conn.; Carl Vyeth, D. D. Calver, Germany; Mrs. S. F. Payne, Miss Millie O'Brien, Baltimore, Md.; H. H. Watson, Little Rock, Ark.; Miss Daisy Knights, Miss Gertrude Knights, Toledo, O.; T. H. Bradley, Oklahoma City, Ok.

The remodeling of the interior of the town hall, for which \$3000 was appropriated, is nearly completed.

The metropolitan park commission has finished repairing Winthrop shore drive and this boulevard is now one of the most beautiful coast drives in the vicinity of Boston. On account of the shutting off from the Revere beach boulevard of all motor vehicles on Saturdays and Sundays during the afternoon and evening, many more people are visiting this beach.

MELROSE.

The three-story garage and business block of D. T. Sinnott & Co., on Main street, which was damaged by fire Thursday, will be rebuilt at once.

During the spring nearly 700 dogs were licensed by City Clerk W. DeHaven Jones, the largest number of any year. All the bids for the \$30,000 temporary loan, payable \$10,000 Dec. 12, 1910, and \$20,000 March 13, 1911, have been rejected by City Treasurer William R. Laverdier.

The police have sent out notices to all license holders requesting them to comply strictly with the letter of the law in the license requirements. Chief Kerr will make an inspection of all such premises next week.

HOLBROOK.

The Epworth League and Castalia Club of the Methodist Episcopal church held a lawn party Friday evening. The tables were in charge of Clarence Pike, Ruth Munter, Alice McDonald, Mildred Baker, Theodora Hooker, Mrs. Mary Armand, Lotti Genders, Evelyn Josselyn, Edna Thayer, Bessie Dowling, Lizzie Stanley, Blanche Buzzell, Mrs. George Fahning, Annie Alden, Mabel Alden, Mrs. Mae Eldridge, Mrs. Inez Hayden, Mrs. Gertrude Shaw, Edith Jordling, Inez Spear, Edward Jordling, John Blood, Louis Booker, George Eldridge and Arthur Jordan.

The school committee has elected the following teachers: Summer high, Ralph W. Currier, master; Miss Margaret Woods, Miss Alice Lamphier; summer grammar, Misses Carrie Paine, Gertrude McGrath, Ethel Holland; Franklin, Misses Ella Dean and Kathryn Megley; Garfield, Misses Lillian S. Hill and Rose Murphy; Lincoln, Miss Elizabeth Anthony; Roberts, Miss Alice C. Howes.

WYOMOUTH.

The Norfolk Club is holding its annual outing at Nantasket beach today. Following a dinner at the Rockland house, there will be a series of sports and other amusements.

Edward W. Hunt, clerk at the Wyomouth Savings Bank, has been appointed an assistant bank examiner.

The Rev. Edward Norton of Quincy will preach in the East Wyomouth Congregational Church, Sunday. The next two Sundays the church will be closed.

Mrs. G. H. Bowen of Charlestown will be the soloist at the Pilgrim Congregational church Sunday.

RANDOLPH.

R. C. Richardson has purchased the Stetson homestead and farms on North street and is making extensive improvements.

The socialist open-air meetings will be resumed about Oct. 1.

An effort is being made to organize a basketball league composed of clubs in Brockton, North Easton, Stoughton, Hyde Park, Quincy and Randolph.

The Rev. Dr. A. M. Cameron of Boston will preach in the Baptist church Sunday.

MALDEN.

The special committee in charge of the alterations to the basement of city hall opened bids for the work Friday. All exceeded the appropriation and were rejected. New bids will be asked.

Work on the new illuminated clock for the city hall has commenced. A small tower will be erected to contain the large clock and a single big electric light inside the clock will illuminate its four faces. An electric clock will be installed in the city hall and this will run the clocks in the offices of the city departments as well as the tower clock.

Close friends of President M. Sumner Cogan of the Malden Club, are urging his candidacy for the Legislature at the Republican caucuses.

Mayor Fall has received a letter from Mayor Charles Bruce of Everett, urging haste in the decision regarding the sale of the Eastern avenue (Malden) sewer to the state. Everett is anxious to complete its work on the sewer this summer if it is to be taken over by the state.

BRIDGEWATER.

There will be two more band concerts this season in Central square. The concerts this year have been very successful.

A field day is being held today on South field, near the Bridgewater state normal school. This is the first move to raise a fund for a new playground in town. The affair is in charge of Harry Batchelder, Edgar Cushman, Chauncey Whitman, Jabez Pratt, Everett Churchill and Edwin Hayward.

The work of relaying the electric car tracks on Broad street to the station has been completed and the cars are now running over the line.

The Y. P. S. C. E. of the Central Square Congregational church has discontinued its sessions until after Sept. 1.

EAST BRIDGEWATER.

The East Bridgewater will play the Whitman team on the Parish grounds this afternoon.

The Busy Bee Society is arranging a series of entertainments for the fall and winter.

The Epworth League of the Methodist church has made arrangements for the annual lawn party Wednesday evening on the church lawn.

BROCKTON.

Several golf players of the Brockton Country Club will take part in the open tournament of the Wollaston club today. The August handicap cup tournament of the Country Club also takes place today and some of the players in it, who are to enter the Wollaston events, played Friday.

Hennip Nelson, L. B. Peterson, Edw. Nelson and Nils A. Nelson of the Swedish Lutheran church, are interviewing local contractors concerning the probable cost of the new church edifice to be erected on North Main street and the advisability of having it built of wood or stone or cement.

The Brockton Epworth League circuit will have its annual outdoor gathering at Pilgrim park, Bridgewater, Labor day. The program is being arranged by Elmer Smith, Roscoe Frost, Lester Gray, B. S. Stevens, president of the circuit, and Chauncey Ruoff, secretary.

John Ericsson lodge, K. of P., will have an outing at Scandia lake Sunday. The members will go there in special trolley cars.

Plans for the new Waldo Congregational church will be completed in time for a meeting of the members, Aug. 16, when a committee will be authorized to submit them to builders for bids on construction.

QUINCY.

L. H. Thayer of Harvard '10 has been elected teacher of French and German in the Wakefield high school.

Councilman Joseph L. Whiton, Jr., is at North Conway, N. H.

The Rev. C. E. Rydstrom of St. Pauls Methodist Episcopal church is attending the campmeeting services at Ashburg.

The Rev. Joseph Eames of Bridgewater will preach at Christ church Sunday.

ABINGTON.

Court Abington F. of A. is holding its annual field day at Ridge Hill grove today, including a game of ball between the Villes and Reeds of Rockland.

Winthrop lodge, 101, I. O. O. F., will hold a field day at Auburndale, Aug. 20.

The annual reunion of the Fourth Massachusetts Regiment Association, of which many veterans of this town are members, will be at Bass Point, Thursday.

REVERE.

A meeting of the proprietors of the large amusement enterprises at the beach will be held Tuesday, to confer on the matter of holding a carnival at the beach in September.

The Rev. Howard Lee Torbet of the First Congregational church will preach in the First Congregational church at Bridgewater Sunday and the Rev. Mr. Shultz, of Boston University, will be here. The large morning attendance at this church during the summer has made the parish committee feel that it was wise not to discontinue the services. Mr. Torbet will preach Aug. 21 and will then begin his vacation.

The Rev. E. Atkinson, of Cambridge, will preach in St. Ann's Episcopal mission on Sunday evening.

HALIFAX.

The members of Halifax grange are holding a picnic this afternoon and evening in the grove of Mrs. George Hayward. The afternoon will be devoted to athletic sports and this evening there will be an entertainment.

This is the height of the season at Lake Monponsett. Every cottage around the lake front is taken and the hotel is full of guests. A concert will be given this evening at the hotel.

The Halifax grange, which will hold a union fair with the Plymouth County Agricultural Society of Bridgewater next month, has issued a number of invitations to prominent speakers to give addresses at the annual dinner on the second day of the fair.

WINCHESTER.

The Winchester A. A. will play the Neponset Wanderers on Manchester field today at 3:15 p. m.

The Rev. Charles L. White, D. D., of New York, and former president of Colby College, will occupy the pulpit of the Baptist church on Sunday morning.

Charles Young, the caterer, has rented the adjoining store. He intends to open a candy factory in the new addition about Oct. 1.

WALTHAM.

Plans have been prepared for the erection of an addition to the factory of J. L. Thomson Manufacturing Company for storage.

There may be a delay in the erection of a federal building in this city, although Congress has already appropriated \$115,000 for the new building.

WHITMAN.

The Whitman team leading in the Trolley League, will play East Bridgewater at East Bridgewater this afternoon.

A. D. B. Butler and I. T. Churchill have been appointed to take the school census of the town.

George L. Nevins has sold to Paris Haine his house on Nevins avenue for occupation.

Miss Ethel Hersey has resigned as assistant teacher at the Whitman high school and will teach in the coming year in Swampscott.

The Wachuset Club, composed of a number of prominent young people of Northville, will hold a party this evening.

MIDDLEBORO.

The Middleboro school committee has purchased 15 bubbling fountains for the schools.

Union services will be held in the Central Methodist church Sunday for the Baptists, Congregationalists and Methodists.

Miss Marion V. More of this town has been elected a teacher in the public schools in Royalston, Vt.

John J. Pearson has been appointed assistant inspector of plumbing.

The Middleboro Woman's Club has secured a number of good speakers for the coming season.

DEDHAM.

The public schools of the town will reopen Wednesday, Sept. 7.

Mr. and Mrs. Fred A. Dix of Clark street will enjoy an unusual vacation trip next week. Mr. Dix has built a motor boat, 22 feet in length and 14-horsepower, and in it he and his wife will coast along to Islesboro, Me.

The Rev. David Martin of Boston will preach in St. John's Methodist Episcopal church Sunday.

The Rev. John L. Keedy will preach in the Congregational church Sunday.

NEWTON.

An important addition to Newton's industries will be the factory of F. X. Woodward, which next week will commence the manufacture of rubber articles and automobile accessories. Fifteen men will be employed.

The Auburndale Village Improvement Society has published a booklet of views of the village.

WAKEFIELD.

The agitation for a substitute for water in laying the dust on the streets has resulted in an offer from the light plant to furnish the town free with enough water-gas tar to use as an experiment. The selectmen will take the matter up with the highway department.

The engineers of the Boston & Northern street railway are not quite ready to submit plans for the widening of Water street and the relocation of car tracks and the conference with the selectmen will be held at a later meeting of the latter.

The Merchants and Business Mens Association has appointed a committee to furnish the industrial department of the Boston & Maine railroad with information regarding factory sites, street frontages, transportation facilities and prices. The committee is: President George H. Taylor, Secretary J. Warren Poland, Fred C. Scott and Harris M. Dolbeare.

ROCKLAND.

The Emerson Shoe band will give an open-air concert at Bayside, Hull, this afternoon and evening.

Mattakeesett tribe, I. O. R. M., will exemplify the adoption degree in the hall of Nantasket tribe of Whitman, Tuesday evening.

The Unitarian Sunday school boys will enjoy a week in camp at Robbins pond, East Bridgewater, soon in charge of the Rev. S. C. Weatherly and Everett Donley. The Rev. D. F. Atherton of Abington will preach in the Congregational church Sunday.

The Carpenters Union has elected: President, David Addington; vice-president, Samuel Bonney; recording secretary, Spurgeon Ward; financial secretary, Edgar Simmons; treasurer, Fred Litchfield.

HYDE PARK.

The Rev. Asher Anderson, D. D., pastor of the Congregational church, will preach the union services in the Baptist church Sunday. Mrs. A. P. Strout will sing. An open air afternoon service will be held at the corner of East River street and Wood avenue.

Chief Wetherbee has received a letter of thanks for the services of the Hyde Park firemen at the Albany and High street fires in Boston. The run into Boston was made in 35 minutes.

Miss M. E. Merrow, principal of the Weld school, has returned from a six months' trip abroad.

EXPENSE OF POSTAL SERVICE IN ENGLAND DOUBLES IN 15 YEARS

LONDON—Herbert Samuel, postmaster-general made an interesting statement in the House of Commons recently, regarding the vote for the sum of nearly \$100,000,000 for the salaries and expenses of the postoffice, telegraphs and telephones. Mr. Samuel pointed out that 15 years ago postoffice estimates amounted to about \$50,000,000, since when they have doubled. The receipts, however, have also nearly doubled and the profits are about the same as they were about 15 years ago.

The number of letters and half-penny packets dealt with every day amounted to 15,000,000, a quarter of a million telegrams are handled every day, and money orders and postal orders to the value of \$1,250,000 are transmitted every day of the year. These figures, he pointed out, are expanding year by year, the work in every branch growing in a corresponding manner.

Referring to wireless telegraphy, Mr. Samuel said that rapid expansion was seen in this department, and he hoped before long to have a complete range of stations all round Great Britain and Ireland. The postmaster-general outlined in the course of his interesting speech, an experiment that is to be tried in the near future, in connection with the savings bank. It is proposed to supply money boxes or home safes to those who wish to have them, in which they will be able to put any money they wish to save. The depositor, Mr. Samuel says, will have the box, and the post-office will keep the key. The object of this innovation is to encourage thrift.

Reference was also made to the question of penny postage with France, and Mr. Samuel gave the reason why he did not feel able to proceed with the question at the present moment. This statement drew from Henniker Heaton, the originator of the penny postage to France proposal, an expression of regret. Mr. Heaton at the same time requested that a committee should be formed to consider the question of the introduction of imperial telegraph rates.

JAPAN'S NEW TARIFF ADVANCES DUTIES ON AMERICAN ARTICLES

WASHINGTON—A bill for the revision of the Japanese customs tariff law and the customs tariff which passed the Japanese Diet March 22, will raise the duty on many articles of trade from the United States more than 5 per cent ad valorem on an average. This new statutory tariff cannot take the place of the present conventional tariff until the expiration of the treaties of which it forms part.

The new duties will then automatically take the place of the present conventional ones, except in so far as they may be modified by special reciprocal tariff conventions with the countries concerned.

In some instances the increase in the tariff will be great and may seriously affect trade with American manufacturers. The treaty between the United States and Japan contains no conventional tariff. Treaties with other countries which have such provisions will all terminate July 17, 1911. Our own treaty does not expire until a year later, but American goods imported into Japan will be subject to the new duties whenever and in so far as these duties are enforced upon imports from other countries.

LOCAL AND TELEGRAPH BRIEFS.

SPRINGFIELD, Mass.—This city has been chosen by the officials of the postoffice department in Washington as the city in western New England for a terminal station of the railroad postoffice. Boston is the only city in New England in which there are terminal stations at present.

BRIDGEWATER, Mass.—The tax rate this year will be \$17.50 on \$1000. The following figures have been given out: Valuation of real estate \$2,937,188, personal estate \$327,639, total valuation \$3,264,827.

The new destroyer Paulding, which has just been completed at the Bath Iron Works, Bath, Me., arrived at the Charlestown navy yard this forenoon to be drydocked in preparation for her coming trials.

Caledonian grove, West Roxbury, is the Mecca for Boston trade unionists today. The attraction is the first grand field day of Roxbury Textile Workers union Nos. 71, 737, and 739. The girl trade unionists employed at the Roxbury carpet mills in particular are very much in evidence.

Edward Knight, arrested on a warrant from the Halifax (N. S.) police, today escaped from the Boston immigration detention station at Long wharf. He was awaiting deportation on the steamer A. W. Perry.

The head of the army ordnance corps, Brig.-Gen. William Crozier, arrived at the Watertown arsenal early today and continued the inspection begun last Saturday. He was met at the arsenal by Lieut.-Col. Charles B. Wheeler, commanding officer and Major Williams, who has been acting commanding officer.

People of United States Asked to Attend Colorado Tunnel Opening Festival

THE HON. JOHN F. SHAFROTH, Governor of Colorado, who has invited Colonel Roosevelt and other notables to the festival.

COLORADO SPRINGS, Col.—Former President Theodore Roosevelt has been invited to officiate at the opening of the Roosevelt deep drainage tunnel in Cripple Creek, Sept. 1 has been set as the date for the celebration, which he will be urged to make a part of his western itinerary.

Governor John F. Shafroth will shortly issue an official invitation to the people of the United States to participate. It is expected that some of the most distinguished men in the West will take part in this event, which will mark an epoch in the history of Cripple Creek, "the world's greatest gold mining camp." The deep drainage tunnel, costing more than half a million dollars, has been driven almost two miles into the solid granite for the purpose of unwatering the entire district at a depth of 750 feet below the present water level.

From recent discoveries in several of the deepest shafts, it is believed by well-posted men that the unwatering of this immense territory will expose ore bodies equal to those which have given Cripple Creek within the last 18 years a total production in excess of \$250,000,000.

(Continued from Page One.)

Foster Willard, the young Melrose aviator, entered in the meet, passed through Boston Friday and made a trip of inspection to the flying field chosen at Atlantic. The wide area of 500 acres which is available and the level character of the field make it one of the best centers of aviation he has seen, he said. He was highly optimistic over the outlook for the meet.

Mr. Willard, he announced, will enter for the various events the new machine in which he flew 20 miles on the initial try-out at Mineola Thursday. This craft is of his own design, along the general lines of the Curtiss biplane. In dimensions it is considerably larger, however. From tip to tip of the warping wings it measures 44 feet, exclusive of the warping surfaces it is 38 feet from one end of the main planes to the other. While the usual Curtiss machine balances about at the center, the tail of the Willard machine is longer—as in the Farman machine—making a total length of 32 feet 4 inches from the front of the elevator to the rear vertical rudder.

Charles J. Glidden's plans have been accepted by the committee, and he has been granted a very liberal appropriation for the balloon division of the meet. This will probably be the biggest balloon meet ever seen in the country. The prizes for balloons are to be: First—Suitable cup to one attaining greatest elevation. Second—Suitable cup to one making longest flight.

ANNOUNCE NAMES OF CHURCH BOARD

The commission on the church and the social question, authorized by the American Unitarian Association, has just been appointed by the president, the Rev. Dr. Samuel A. Eliot of Cambridge.

The list is headed by former Congressman Horace Davis of San Francisco, and includes among others Prof. Francis G. Peabody of Cambridge, former Mayor Thomas M. Osborne of Auburn, N. Y., Judge Reuben E. Walker of Concord, N. H., the Rev. Grover G. Mills of Watertown, Edwin D. Mead of Boston, Dr. John Graham Brooks of Cambridge, William H. Sayward of Dorchester, Henry Abrahams of Boston and Frederick Almy of Buffalo. The Rev. Elmer E. Forbes of the department of social and public service of the association will act as secretary.

J. R. THAYER FOR CHAIRMAN. A call for the meeting of the Democratic state committee Aug. 23 has been sent out. The meeting will decide on the time and place of the fall convention. Ex-Congressman John R. Thayer is regarded as the most promising timber for the chairmanship of the convention.

CANDIDATE HARDING LAYS OHIO PROBLEM BEFORE PRESIDENT

(Continued from Page One.)

situations that have developed since then, and all have their ideas for smoothing out the opposition to a Republican victory this fall.

Congressman Longworth says that while the prospects are good, there will be a hot contest if the Republicans win the governorship. The congressman from Ohio will stay in Beverly until Thursday when he will go to Oyster Bay with Mrs. Longworth as the guest of Col. Theodore Roosevelt. After this visit they will go to Ohio where Colonel Roosevelt delivers an address at Cincinnati Sept. 9.

Mr. Longworth says that he will not address any political gatherings in Maine. From the present indications it looks as if L. E. Garford had the inside track for the chairmanship of the Ohio state campaign committee.

Congressman E. J. Hill, of Connecticut, a member of the ways and means committee, was a visitor at the executive offices today, having called to talk over the President's economy program.

Miss Della C. Torrey of Millbury, Mass., is to visit the President tomorrow.

Robert G. Valentine, assistant commissioner of Indian affairs, is expected here today from Washington to lay before President Taft a plan which the President has demanded to abolish the management of Indian claims by claim

THE HON. WARREN G. HARDING, Governor of Ohio, who calls on the President today.

agents. It is the President's demand that hereafter work be done for the Indians by government employees. This will stop the further payment by Indians of fees which have enriched attorneys acting for them and brought payments which have reached \$3,000,000. Attention was directed to the mulcting of the Indians by the testimony which is now being given before the investigation into the charges made by Senator Gore, of Oklahoma.

President to Drop Friends to Appease the Insurgents

(By the United Press.)

To coax an endorsement of the Taft administration from Colonel Roosevelt, appease the progressive movement and snail a Republican victory at the polls in November, President Taft and his advisors have practically agreed upon the following plan of action:

Secretary of the Interior Richard A. Ballinger to be permitted to resign by Sept. 15.

No support from the administration for Senator Nelson W. Aldrich and Speaker Joseph G. Cannon.

Restoration of the entente cordiale between the insurgents of the House and Senate and the administration.

Senator Murray Crane to be official political advisor, vice Postmaster-General Hitchcock.

This is the revolutionary change in the attitude of the administration foreshadowed in certain events which took place here Friday after the visit of Senator Aldrich and which became known today through an authoritative source.

Notwithstanding the optimistic messages brought to the summer capital by Representative McKinley, chairman of the Republican congressional committee, and other politicians as to the outlook for Republican success, this fall, it is known that the President has been privately advised that unless there is a sweeping change in the present attitude of the administration there can be no hope for a Republican House of Representatives. President Taft has a long list of legislative duties for the next session of Congress. With a House of Representatives out of sympathy with his views, and with a Democratic majority, or one made up of Democrats and insurgent Republicans, he realizes there is scant hope for this legislative program being enacted into law.

First and foremost of all, however, political advisers of the President have made it clear that an endorsement from Colonel Roosevelt should be secured. By severing relations with the old guard in the Senate, by abandoning Speaker Cannon, by a recognition of the insurgent movement, the administration hopes to

Suburban News

CHELSEA.

William B. Dennison, secretary of the Chelsea Trust Company, is taking his annual vacation.

On the petition of J. W. Buckley to the board of control, asking that trains passing through Chelsea be required to reduce their speed to eight miles an hour when approaching grade crossings in this city, a conference has been arranged.

The board of control has been invited to attend the field day of the Diocesan Union of Springfield, Sept. 5.

City Messenger Colman Tilden, by order of the board of control, is having the records removed to the new city hall vaults.

NORWOOD.

A. S. Fox of the Norwood Painters Union has been chosen a member of the label committee of the Painters District Council of Eastern Massachusetts.

The New England Amateur Athletic Association will hold its annual championship meet at the grounds of the Norwood Press Club, Berwick park, Sept. 10.

Local women and girls are showing much interest in the lessons in cooking, dressmaking and millinery that are being given in the Shattuck school building under the auspices of the Norwood Women's Club.

NORWELL.

The annual field day of the Union Glee Club of Rockland will be held at Ridge Hill grove in this town Saturday afternoon and evening Sept. 3. In the afternoon there will be ball and athletic sports and in the evening dancing.

The Norwell baseball team is playing the Winthrop at Winthrop this afternoon.

A. P. Rhine, a business man of St. Louis, who was for a number of years pastor of the Universalist church at Assinippi, is spending his vacation with friends at Assinippi.

FRANKLIN.

The Franklin Business Association and Board of Trade has prepared a 20,000 edition of leaflets setting forth the town's manifold attractions.

Miss Edith Giles of Providence, soprano soloist at the Round Top church, will sing at the Sunday services in the Congregational church.

The drinking cup at the local post-office will be abolished after Oct. 1.

The Mutual Relief Association will hold an outing at Lake Pearl, Wrentham, today.

PEMBROKE.

The Rev. Paul Harris Drake of Beverly, a former pastor of the First Unitarian church at Pembroke Center, is spending the month in a cottage at Oldham pond.

The Charles G. Clark camp, S. of V., will hold a farmer's ball in the Assembly hall at the high school building Friday evening, Aug. 26.

The Rev. George S. Chase, pastor of the Baptist church, is on a vacation in New London, N. H. The church will be closed for the remainder of August.

ADD TO PAWTUCKET PLANT. PAWTUCKET, R. I.—The American Textile Company, pioneer in the lace making industry in this city, has started a mammoth addition to its plant, 243 by 108 feet, on South Woodlawn avenue.

secure this word from Mr. Roosevelt and save the day.

Today comes the added information that Senator Aldrich's statement denying the charges of Senator Bristow of Kansas came after a "command" from the summer White House and that the visit here Friday of the Rhode Island senator was not one of cheer. It is said Mr. Aldrich came to Beverly to give the impression to the public at large that his statement denying the rubber charges had the official "O. K." of the President. The executive was unable to head off the visit, but hints were made that the administration was not backing Senator Aldrich against Senator Bristow.

As predicted by the United Press several months ago, Secretary Ballinger will resign from the cabinet, it is now admitted, to take up his lucrative law practice at Seattle, within a few days after the vindication which he will receive at the hands of the congressional investigating committee.

The committee is to meet on Sept. 11 and will bring in a verdict of not guilty by a vote of 7 to 5, after which Secretary Ballinger will gracefully resign.

NEW YORK—Former President Roosevelt in all probability will attend the Republican state convention to be held at Saratoga next month. He said Friday if he should be selected as a delegate from Nassau county he would attend, and that in that case he would probably make a speech.

Should Colonel Roosevelt speak, it is expected he will make a strong defense of the Hughes administration and the reforms for which Governor Hughes has stood.

President's Insurgency Accepted at Washington

WASHINGTON—Official Washington accepted as final today the news from Beverly that President Taft has finally determined that Senator Aldrich, Secretary Ballinger and Speaker Cannon are to be separated from the Taft administration. It is generally admitted that their elimination will strengthen the President and that this is to come very soon is generally agreed to be due to the influence of Charles D. Norton, the new secretary to the President, and Senator W. Murray Crane of Massachusetts.

SPRINGFIELD STREET RAILROAD URGES ITS MEN TO AID VISITORS

SPRINGFIELD, Mass.—In order to obtain cooperation from its employees in tendering special courtesies to visitors and members of societies that hold conventions in this city, the Springfield Street Railway Company inclosed in its latest set of pay envelopes a little card expressing this desire on the part of the officials.

The cards are well prepared, slip easily into the notebooks of the men, and are designed to cause the employees to feel that they as well as the company should take pains to give good service.

There has been talk among some other companies in the city following this same plan. The following is the legend that is printed on each of the cards:

We would ask our employees to give every possible attention in keeping with good service to all patrons of our lines, especially those who because of delegates' badges or other indications seem to be visitors in the city. Such courtesy will redound to the credit of the road and the community.

SPRINGFIELD STREET RAILWAY COMPANY.

Besides giving the cards a large circulation among the employees of the company, the attention of many other firms in the city has been attracted, and it is believed that the example will be followed in concerns where many men are employed.

ARGENTINA'S MEN TO STUDY ENGLISH

A school for instruction in the English language is to be established in Quincy for the benefit of the officers of the Argentine navy who are here during the construction of the new battleship by the Fore River Ship Building Company for their country. The petty officers will receive additional instruction in advanced mathematics at the expense of the United States government.

James E. Neary, instructor to the Fore river apprentices, has been selected as instructor. Lessons will be given two nights a week during the entire stay of the Argentine sailors in this country.

VISITORS OFFER NEWPORT LAND.

Summer residents of Newport have decided to make an offer to the representative council to buy certain waste land and give it to the city if the land is made into a park. The offer is the outcome of the decision by the board of aldermen to extend East Narragansett avenue to Wellington avenue.

NEW WOONSOCKET TAX VALUES.

WOONSOCKET, R. I.—According to the report of the tax assessors, just filed, this city has increased \$671,650 in valuation. The total valuation this year is \$21,499,050 as compared with \$20,827,400 last year.

We Start Monday on the Second Week of Our

Great August Furniture Sale

Which affords the one opportunity of the season to purchase Furniture of Jordan Marsh Company quality

At Reductions Ranging from 1/4 to 1/2

THE closing of the first week reveals the largest amount of sales ever made by the Furniture Section in one week since it was established.

In order to make the second week of this sale maintain the standard already created, we have reinforced our depleted stocks with hundreds of additional pieces at the same reductions which afford even a wider range of selections than previously offered.

Furniture Building—Eight Floors, Avon, Chauncy and Bedford Streets

Jordan Marsh Company

SUSPEND POLICE AFTER REVOLT IN COLUMBUS RIOTS

COLUMBUS, O.—Two women and one child were wounded during the rioting last night, following the revolt of almost two score of policemen, who refused to protect street cars during the strike. The report of the police revolt was a signal for renewed outbreaks. Today it is predicted that troops will be ordered back to the capital at once. Three cars were badly damaged by explosives and a number were stoned.

Chief of Police Carter today suspended 33 of 37 policemen who last night refused to ride on the street cars in pursuance of Mayor Marshall's strike order. Four of the mutineers agreed to obey orders and ride on the cars today.

When Mayor Marshall urged the policemen to comply with their orders last night 100 men stepped out of line ready for duty. These were assigned to the car barns. Thirty-seven patrolmen refused to serve but four of them later reported for duty.

LONDON—J. Poyntz Spencer, the fifth Earl of Spencer, passed away here today. Viscount Althorp, half brother of the earl, succeeds to the title and estate. Near the Earl Spencer's seat at Althorp park lived the ancestors of George Washington, who was a kinsman of the earl's family.

POLICE FORCE GOES ON STRIKE.

KITTANNING, Pa.—The entire police force is on a strike here today because the town council wanted the members of the force to carry shotguns and kill unmuzzled dogs. President of Council J. S. Hudson has announced that he will hire men in Pittsburgh for police purposes.

HANOVER.

George J. J. Clark has purchased from the estate of William Stetson the house and residence on King street at West Hanover.

Workmen began Friday to remodel the West Hanover passenger station. The whole of the building will hereafter be used for passengers. The freight department will be moved to the new freight house which is now being constructed.

Professor and Mrs. Herbert C. Tolman of Nashville, Tenn., are in town as the guests of Miss Anna Tolman.

The Rev. and Mrs. Melvin S. Nash of North Hanover will leave the latter part of the month for their annual vacation at Bethlehem, N. H.

EASTON.

Edgar Craig is clerk in the North Easton Savings Bank in place of J. W. Whitcomb who resigned to become treasurer of the Middleboro bank.

The Rev. Emil Steele of Malden, a former pastor of the Congregational church at North Easton, will preach in that church Sunday. The pastor, the Rev. Ernest A. Swenson, is on a vacation at Pigeon Cove.

The North Easton ball team will play Charlestown at the Plains this afternoon.

The Morning Star Society of the Swedish Congregational church will have a lawn party this afternoon and evening at Williams grove.

HANDLING CANADIAN COLD-STORED APPLE IS NOT SUCCESSFUL

OTTAWA—Last autumn the Dominion government made its first experiment in cold storage of apples, and the supply handled having all reached the ultimate consumers by June 18, the report of the results is now issued.

Unfortunately the season was one of the most unsatisfactory for any experiment in cold storage of apples, and the crop was below the average in "keeping qualities," and spring selling prices did not reach the levels anticipated. Therefore the experiment was not a financial success.

The report indicates, however, that the expenses entailed by the close observation of results and in handling shipments by new methods, would be eliminated from regular business transactions upon an established footing, and the experiment has established relative advantages of the cold-storage method.

It was found that apples could be placed on the market in the spring, in excellent condition. It has also been shown that apples placed in cold storage shortly after picking were in better condition than those left in the barrels, unstored, for a week or more.

Repacking was shown to be a source of deterioration. The report states that now there are over 6,000,000 barrels cold-stored every year in the United States; while in Canada the greatest number so treated has been 60,000—the figures for last season.

Coincident with this publication of cold-storage results, the International Association of Apple Shippers in session at Niagara this week has put on record the statement made by Emory C. Cook of Baltimore that cold storage is making apples a luxury, and is of no benefit, financially, to either the shipper or consumer.

RHODE ISLAND FIRE MUSTER.

PROVIDENCE, R. I.—The annual state muster of the volunteer fire companies of the state will be held in the village of Manville on Labor day and plans for that occasion are nearly completed. The old hand engines are being put into condition and the unique dress of the old-time firemen will again be seen on the field. Every company in the state will be represented.

DEPOSIT BY BOSTON & EASTERN.

The Boston & Eastern Railroad Company has deposited with City Treasurer Slattery \$10,000 in cash in compliance with a section of the legislative act under which that company is authorized to construct a tunnel under Boston harbor as a part of its proposed line from this city to Beverly, Danvers and other places on the North Shore.

MR. DREXEL MAY STOP FLYING.

LONDON—J. Armstrong Drexel's retirement from the aviation game may be the price he pays for his spectacular achievement on Thursday, in breaking the world's record for high flights. His family is now beseeching him to give up aeroplaning. The young millionaire's parents are particularly insistent that he cease taking needless risks.

MILITARY READ- FOR PINE CAMP TRIP TO NEW YORK STATE

Col. John J. Sullivan, the new commander of the ninth infantry regiment, M. V. M., today has completed his final arrangements for the transportation of the 820 men of his command who are to go to Pine camp, Jefferson county, N. Y., to the "camp of instruction," commanded by Maj.-Gen. Frederick D. Grant, U. S. A.

The ninth will leave Boston Aug. 20 and return Aug. 28.

About the same time that the Bay state command is making its entrainment similar entrainments will take place in Maine, Vermont and Rhode Island.

From Maine 800 men of the second infantry regiment, are going; from Vermont, 775 men of the first infantry regiment; from Rhode Island, troop A of Pawtucket and troops B and C of Providence, 171 men. There will also be at the camp during the week 3000 regulars and 2530 guardsmen of New York state.

The regiment, made up of all the Boston companies and one each from Lawrence and Lowell, will parade through Boston about 6 p. m. for the South station. Their train will leave at 8 p. m., arriving the next morning at Pine camp. The second section will stop at Natick to entrain Company L and at Worcester to pick up company G of Worcester and company K of Clinton.

NO HOUR REDUCTION BY BOSTON & ALBANY

No general reduction of any kind is contemplated at this time by the Boston & Albany road, according to General Manager J. H. Hustis, who declared today that the reduction of hours of employees at West Springfield, which went into operation Friday affecting about 400 men was due directly to local conditions, and indirectly due to the present policy of the road to keep within its means. The employees in the locomotive erecting shops at West Springfield, by this modification of their hours, will lose one hour a day.

YEAST WASTE INJUNCTION ASKED.

Atty.-Gen. Dana Malone, at the relation of the state board of health, has filed an information in the superior court, asking that Martin Hickey and Henry Riedman of Westborough be enjoined from emptying waste from their yeast factory into the town sewers until they have provided a satisfactory filter bed. A subpoena is made returnable on the first Monday of September.

STEAMSHIPS

Coolness and Comfort
IN NORTHERN SEAS AND LANDS!

12 DAY VACATION CRUISE \$60.00

Berth and Meals Included (First Cabin)
To Halifax, N.S., & St. John's, N.F.

Every Saturday by the large steamers FLORIZEL and BORN (Marconi wireless, Bligh Keels) of the

CAMBRIDGE TUNNEL TERMINUS IN BOSTON WILL BE BID ON SOON

(Continued from Page One.)

subway would be a time-saver for surface cars temporarily diverted from Harvard bridge.

Including the Riverbank and Cambridge subways, and the elevated structure beside the dam, Cambridge, at their completion, will be approached by three distinctly modern transit routes, with a distance of two miles between the two extremes.

The Cambridge subway, which is being constructed by the Boston Elevated Railway Company, through a contractor, it is now estimated by men of engineering experience, will be ready for the laying of the tracks about February or March of next year. The portion which is in Boston, extending from the Cambridge to the Park street station, is in the hands of the Boston transit commission and was begun last September, starting northwest of Grove and Phillips streets and extending in a southwesterly direction toward Park street station. It is now completed to a point directly under Mt. Vernon street. This section, it is expected, will be completed about Jan. 1.

If the contractors agree to complete the work by Sept. 1, 1911, that date will be very shortly thereafter followed by the opening to traffic of the Cambridge tunnel.

Although the completion of the Cambridge subway, or the elevated structure to Cambridge, via the Charles river dam, is not yet definitely in sight, Cambridge patrons of the Boston Elevated Company are beginning to figure just how much time, in journeying between their homes and Boston, will be saved when everything is in perfect running order.

This saving of time will make a great difference to Cambridge in many ways. It is not unlikely that the appearance of the city may be considerably changed by the revolution in modes of travel. Some portions of the city will become more available for out-of-town residence for Boston business men, and other sections, which now receive a trade advantage by reason of containing numerous well-patronized car routes, may be destined to become so comparatively quiet and unfrequented that the shops that have hitherto enjoyed prosperity will be obliged to move. The aristocratic section of the city, from Harvard square to Mt. Auburn, is expected to hold its present character because of intimate connection with the university, but some other residential sections may be greatly altered.

Not only will Cambridge people benefit by the new travel schedules, but also those living in towns and cities reached by lines going through Cambridge, so that the people of at least five suburbs adjoining Cambridge will reap benefit from the progress in that city. There are 24 car routes of the Elevated Company in Cambridge, only two of which will not be affected by either the subway or the dam elevated lines, considering the changes in routes that will probably be made under the new conditions. There will, of course, be many surface lines in operation, but it is expected that the burden on these lines will be greatly lightened, and that this will cause changes in the running schedules. The bulk of the travel through Cambridge will be by the subway.

One change in particular will be marked, namely, the traffic over the Harvard bridge. At present it is very heavy, including that of the Park street and the Dudley street routes. When the subway is in operation the Dudley street line will retain its full quota of patrons, but the entire Park street patronage will be switched off to the Cambridge bridge.

East Cambridge patrons particularly will be benefited by the new elevated structure from Lechmere square to a station directly in front of the North station. All East Cambridge-Boston lines will go over the elevated structure alongside the Charles river dam, through the West End to the North station.

Somerville people will very likely be affected by the elevated structure from Lechmere square to the North station, as it is expected that the Highland avenue line, which at present goes to Sullivan square, Charlestown, will be diverted over the dam.

A. S. DAVIS SEEKS REELECTION.

Representative Arthur S. Davis of the twenty-second Middlesex will be a candidate for the Republican nomination this fall for a second term on Beacon hill. There is some talk of an Ames man running in opposition to Mr. Davis, but as yet no one has appeared in the field against him. Mr. Davis, who is a former member of the Massachusetts board of aldermen, won the nomination last year in a hotly contested three-cornered fight.

BILBAO MINES TO BE OPENED.

MADRID.—At Bilbao next Tuesday an attempt will be made to resume work in the iron mines. The strikers are arming and are being supported by many of the people who are aggrieved at the government for its anti-clerical campaign. The government has posted artillery and will surround the mines with troops, preparatory to Tuesday's reopening.

PLASTERERS UNION HEAD HERE.

John Donlin of Chicago, international president of the Operative Plasterers Union, was in Boston today conferring with E. J. McGivern, business agent of the local union, and the local executive board, on business connected with that organization.

BUSILY PREPARING "CHELSEA - MADE" GOODS EXHIBITION

William E. McClintock, chairman of the board of control; Charles H. Reed, clerk of the board of control; W. J. Murdock of the Murdock Company, manufacturers of wireless apparatus; Bertram T. Martin of the T. Martin & Brother Manufacturing Company; W. F. Jones of the Revere Rubber Company; W. H. Forbes of the Forbes Lithograph Company and J. C. Hosford of the Magee Furnace Co., who are the committee for the exhibit of goods made in Chelsea to be held in connection with the dedication of the new city hall in November, will hold their first important meeting at the courthouse Tuesday afternoon.

A circular has been sent to the manufacturers of the city, about 60 in number inviting them to place their goods in the exhibit and asking the amount of space required.

At the meeting the securing of the armory for the exhibits, and also other places if necessary on account of the size of the exhibits, the methods of meeting the expenses of the enterprise, the allotment of space and other very important matters will be considered.

ROAD TUNNELING THROUGH RANGE

SPRINGFIELD.—Preliminary work on the new Boston & Albany railroad tunnel through the mountain range near Canaan, N. Y., has been begun and within two weeks the work of blasting a hole through the mountain will be started.

The tunnel will be 450 feet long, parallel to the present tunnel there, and will cost about \$150,000. It is expected that it will require six months to complete the work.

The purpose of the railroad in digging this tunnel is to give better facilities for getting trains through the ridge. At present the Boston & Albany railroad tunnel is too small for two tracks. The new tunnel will be built 150 feet south of the present one and will be made to provide for a double-track system. The width will be about 30 feet and the height 21½ feet.

SAGAMORE BEACH HAS "COLONY DAY"

This is Colony day at Sagamore beach, the summer resort on Cape Cod bay, which is summer headquarters of the Christian Endeavor movement, and the event will be celebrated in a unique way.

The day opened with tennis tournaments, followed by water sports in the bay. This afternoon the cottagers and hotel guests, arrayed in Pilgrim and Indian costumes, will be entertained at several centers. A parade of historical characters will precede an original historical play, "The Sagamore," by Mrs. Ruth Bourne Moseley of Needham. In the evening receptions will be held at Bradford Arms and Sagamore Lodge.

HOLD WOLLASTON YACHT LADIES' DAY

QUINCY, Mass.—The Wollaston Yacht Club is holding its annual ladies' day at its clubhouse, Norfolk Downs, this afternoon. The clubhouse and approaches thereto are elaborately decorated. The run going from the Metropolitan boulevard to the clubhouse is decorated with flags and bunting, while the clubhouse is adorned with flags and the international code signals.

This evening the building and its approaches will be illuminated with Japanese lanterns.

STAFF CHANGES DUE TODAY.

Important changes on the staff of Col. Robert H. Patterson, commanding the artillery district of Boston, occur today. Capt. Frank T. Jewell, who has been district quartermaster, becomes artillery district adjutant, First Lieut. Geoffrey Bartlett, who as adjutant had full charge of the district, on Monday becomes a professor of physics at the West Point Military Academy. First Lieut. Carl Wiggins is to be the new district quartermaster and Capt. Francis H. Lincoln artillery district engineer.

BEGIN GRACE EPISCOPAL CHURCH.

NORWOOD, Mass.—Ground has been broken on Washington street, corner of Walpole, for the new building of the Grace Episcopal church. The church will have an auditorium capable of seating several hundred persons with comfort, a spacious chancel for the choir. There will also be a Sunday school room and choir room.

DOVER'S TAX RATE IS \$3.

DOVER, Mass.—The assessors of this town fix the tax rate at \$3 on the \$1000. The board finds the total valuation of the town to be \$5,473,021, of which \$4,335,011 is personal and \$1,138,010 real estate. The number of polls is 215. The number of houses in the town was found to be 177. Sheep to the number of 38 are assessed.

BRAINTREE PASTOR CALLED.

BRAINTREE, Mass.—The Rev. C. F. H. Crathern of the South Congregational church has received a unanimous call to the pastorate of the Park Congregational church of Worcester, one of the largest of the denomination in that city. He will probably accept, it is said. He has been pastor of the Braitree church for 14 years.

PRAISES MAYOR'S WORK AT FIRE.

Mayor Fitzgerald as a fire fighter is given high praise by Acting Fire Commissioner Carroll, who issued an official statement Friday afternoon. Mr. Carroll also sent letters of appreciation to out-of-town firemen who volunteered their assistance.

ISSUES ITINERARY FOR SPANISH WAR VETERANS' TOUR

The itinerary for the delegates and their friends from Boston to the national encampment of the United Spanish War Veterans at Denver, Col., has been completed by Chairman William McCammon of the transportation committee.

The party is to leave the North station Aug. 25, arriving in Chicago the next day at 4 p. m. Leaving that evening at 11 p. m. and arriving in Denver early Sunday morning, Aug. 28. Spend four days there, leaving Sept. 2 for Kansas City, spending half a day there and then going to St. Louis for a whole day. Then a stop will be made at Buffalo and Niagara Falls, N. Y., the trip in all being about 12 days. Persons who intend going are asked to notify Comrade Ralph Eastman, old court house. Company F, sixth M. V. M. infantry, of Marlboro, accompanies the party as the escort to Commander-in-Chief Gihon.

SERGEANT EVANS WINS PRAISE FOR MILWAUKEE WORK

HYDE PARK, Mass.—Charles S. Evans of Blue Hill company, U. R. K. P., is receiving congratulations from his friends for his work at the encampment of the Supreme Pythian Assembly of the Uniform Rank at Milwaukee, where he won second prize in the sergeants' contest.

There were 15 companies competing and Sergeant Evans was the solitary Massachusetts prize winner. Blue Hill company was the only Bay State company to take part in the drills, and ranked fifth, Washington, D. C., winning first and Clinton company of Indiana second. The Blue Hill members are already looking forward to the assembly at Fort Worth, Tex., in 1912, where they will strive for a better place.

POINT TO CHURCH LOT IN HYDE PARK FOR A TOWN HALL

HYDE PARK, Mass.—The probability of tearing down the old Congregational church after the new edifice in Webster square is in use has given rise again to the question of a municipal building for Hyde Park.

The town officers are now on the second floor of the block at the corner of River street and Harvard avenue. For a long time the need of a municipal building to conform with the public library and high school has been felt. The site of the old church in Everett square would, it is thought, be well fitted for such a building.

Rapid progress is being made on the new church. The painting is now being done and the congregation expects to occupy the edifice long before the first of the year.

MACKEREL CATCH GIVES NICE PROFIT

The crew of the fishing schooner Bessie Duggan today netted \$40 each for four hours work when 5000 mackerel, caught in four hours, were sold at T wharf for 35 cents each. Mackerel have been scarce on the fishing grounds and the captain and crew of the Bessie Duggan decided to leave off fishing Friday, sail to Provincetown and witness the yacht races.

On the way the ship sailed through a school of the fish. The seines were immediately put out and in four hours a big haul of fish was in the hold of the schooner.

RESCUED FROM HOUSE AFIRE.

Almost overcome by smoke which made its way through the building from a fire in the basement, Mrs. Benjamin Sweet was rescued from suite 1 of the four-story apartment house at 1089 and 1091 Boylston street, Friday afternoon by her husband and Patrolman Trainor of the Back Bay station. The blaze was extinguished with a chemical hose.

WINCHESTER ITALIAN DISPLAY.

WINCHESTER, Mass.—The local Italians have planned a great celebration for Monday. An Italian band of 40 pieces will render selections throughout the day, and there will be an elaborate display of fireworks in the evening on Manchester field. It is expected that this display will surpass anything of its kind ever held in this town.

WESTWOOD TAX RISES A DOLLAR.

WESTWOOD, Mass.—The assessors have found personal property of the value of \$1,665,075 and real estate of the value of \$1,285,280, a total of \$2,950,355 and a gain over last year of \$354,692. The tax rate for the present year will be \$11.60, an increase over last year of \$1 on the thousand.

ADMIT FIRING DAY NURSERY.

Because they preferred to play in the street rather than be left in the day nursery, four little Chelsea girls have confessed to the state police that they twice set fire to the nursery building at 74 Bloomingdale street in an effort to burn it down.

OUTING AT BASS POINT.

Boston Photo-Engravers Union members and their wives and women friends had a most enjoyable outing at Bass Point Friday. It is stated that two more firms have agreed to the union's demands.

LABOR DAY PARADE POSITIONS.

Positions in the Labor day parade will be selected a week from today by representatives of the labor unions. Acting President William H. O'Brien will be marshal of the C. L. U. division.

BOSTON DEMOCRATS SAID TO BE PLEDGING VOTES FOR MR. FOSS

Congressman Eugene N. Foss will be drafted as the Democratic candidate for Governor at the party nominating convention this fall, if the present plans of Boston Democratic leaders culminate successfully, according to well founded discussion among Democrats in Boston today.

The congressman will not be forced to break his pledge not to oppose former Senator James Vahey in the latter's candidacy for the nomination, it is said, and up to the day of the convention Mr. Foss is not expected to wage an active campaign for the nomination.

His political sponsors, among whom are counted some of the strongest Democratic leaders of Boston, however, will not be idle. Already delegates are being pledged for Mr. Foss and the latter's powerful friends are outspoken in saying that from present indications the major portion of the Boston delegation will call for his nomination.

Mayor Fitzgerald is known to be a strong supporter of Mr. Foss, and the mayor's organization is said to back him in his desire to see Mr. Foss nominated. It is common talk that the Democratic city committee is favorable to Mr. Foss, and through its ward workers is rousing sentiment for his nomination.

The boom started recently to run Mayor Fitzgerald for Governor this year is not taken seriously by politicians. The mayor is believed not to be strong enough generally throughout the state and it is thought that he must prove his worth as mayor under the new charter before Democratic confidence outside Boston will turn to him.

The argument put forth by Mr. Foss' friends among the Democratic leaders of Boston is that with Mr. Foss running for the governorship many advantages would be attached to the campaign which would be lacking were Mr. Vahey the candidate. And it is not believed that these advantages would be offset by Mr. Foss' past relations with organized labor, as friends of Mr. Vahey claim.

Mr. Foss' friends believe that the organized laboring men of the state can be satisfactorily shown that Mr. Foss' vote at Washington against exempting labor organizations from the law governing the issuance of injunctions was in support of the American principle of equal justice for all.

It is also believed that Mr. Foss' relations with his own employees have not been of a nature to injure him with the laboring people.

The Democratic leaders who are working for Mr. Foss declare that the claim of certain of Mr. Vahey's friends that the labor leaders of the state can swing the labor vote at their discretion is overestimated. Past experience has shown, they declare, that the workingman is not to be dictated to in the matter of his vote, and that he will follow the labor leaders only so far as he is clearly apparent that the welfare of the wage-earner is involved.

In the present controversy over Mr. Foss and Mr. Vahey the former's friends propose to show that the welfare of the working class is not threatened or even involved by the nomination and election of one or the other.

It will be argued that Mr. Foss' victory in the fourteenth congressional district election last spring, his speech-making in various parts of the country while a member of Congress and his general success in business mark him as a man on whom the Democrats can rely for a victory.

On the other hand, the unsettled condition in the Democratic ranks regarding the gubernatorial nomination, which was made more acute by speeches delivered at the Democratic meeting at Worcester Wednesday, has revived the booms for Charles S. Hamlin and Col. William A. Gaston. Much favorable comment is heard regarding the Hamlin proposition.

Representative Thomas P. Riley of Malden, chairman of the Democratic campaign committee, today is perfecting plans for Democratic rallies in Lynn, Lowell, Worcester, Cambridge and Waltham in the near future. On Aug. 20 and 21 the committee will conduct a campaigning tour through Hampden and Hampshire counties, the speakers journeying from one town to another by automobile.

The digest of important roll-calls during the past session at the State House, which Mr. Riley has been preparing for some time, is now practically completed. It will show how every senator and representative voted on all the big measures.

Jeremiah J. McCarthy, surveyor of the port, is reported to be a candidate for the Republican nomination for representative from the fourth Suffolk district. He is said to have the backing of Mayor Fitzgerald.

James A. Watson has received an appointment as jail officer at a salary of \$55 per month from Fred H. Seavey, sheriff of Suffolk county.

VETERANS TO HOLD REUNION.

The four veteran volunteer regiments of infantry, the fifty-sixth, fifty-seventh, fifty-eighth and fifty-ninth, will hold a reunion at the hall of post 26, G. A. R., 14 Vine street, Roxbury, Sept. 5. There will be a business meeting at noon and dinner at 1 o'clock, served by the Women's Relief Corps, No. 63, of Roxbury.

GEORGE P. FIELD PASSES ON.

George P. Field, one of the best known fire insurance underwriters in this country, passed on Friday afternoon at the Parker house. He was senior member of the agency of Field & Cowles and was a former president of the Boston board of fire underwriters.

MR. BRISTOW SHOWS HOW TARIFF BENEFIT GETS TO MR. ALDRICH

MILWAUKEE, Wis.—Senator Bristow of Kansas Friday night made reply to the letter of Senator Aldrich, wherein the latter defended himself against the charges of the Kansas senator relating to the tariff on rubber.

He lays especial emphasis on the fact that although Senator Aldrich is not engaged in the manufacture of rubber, he is selling crude rubber to American manufacturers, and that he increased the duty on their products when they did not need it for protection, and when they already had control of the American market, thus giving them greater monopoly of the American market, and, inferentially, increasing thereby the sales and profits of his company.

Going into the question of the organization of the Intercontinental Rubber Company, Senator Bristow quoted Senator Aldrich as saying that the Continental Rubber Company was organized under the laws of New Jersey, Jan. 19, 1903, and that the Continental Rubber Company of America was organized under the laws of New Jersey, Jan. 5, 1905, and, further, that Mr. Aldrich says that the first two companies named were subsidiary companies of the Intercontinental Rubber Company and that it owned all of their stock, and that they were organized for the sake of convenience.

Mr. Bristow asked: "How could they be subsidiary companies of the Intercontinental Rubber Company and organized for its convenience when both of them were organized before it was?"

Senator Bristow's speech in part is: "Mr. Aldrich declares that the Intercontinental Rubber Company is not a trust, and at the same time admits that it is a holding company, which controls numerous subsidiary organizations that were organized for the purpose of handling the crude rubber business in various parts of the world."

"He says that he nor his family has profited directly or indirectly by the tariff on manufactured rubber, yet he admits that he is producing millions of pounds of crude rubber per annum, selling it to American manufacturers, and that he increased the duty on their products when they did not need it for protection and when they already had control of the American market and were exporting manufactured rubber, that is, he increased the duty enabling the manufacturers to advance the price to the American consumers, and admitted they advanced the price, yet says that he nor his family has profited directly or indirectly."

"He admits that dividends had not been paid before the consolidation of the various companies into one, and that after the consolidation, enormous dividends were paid, as stated in my speech."

ABSTINENCE UNION NAMES SCRANTON FOR CONVENTION

Many of the delegates to the fortieth annual convention of the Catholic Total Abstinence Union of America, which ended with a public rally in Boston theater last night, are today leaving for their homes in different parts of the country, taking with them pleasant memories of their short stay in Boston.

The next annual convention will be held in Scranton, Pa., the choice having been made by the board of government at a meeting called on the steamer South Shore during an excursion on Friday.

About 1200 delegates and temperance workers attended the public rally last night in the theater. A musical program, in which the Wilkesbarre regimental band took part, was arranged, and proved a most pleasant entertainment. The assembly was addressed by the Rev. Peter J. O'Callaghan of Chicago, national president; Edwin Mulready of Rockland and the Rev. J. Regis Canevia of Pittsburgh.

MR. FAFFORD NEW CHELSEA SCHOOL SUPERINTENDENT

Adolbert L. Fafford of Beverly has been unanimously chosen superintendent of the Chelsea schools. This decision was reached at a meeting of the school committee held at the home of President Eugene F. Endicott Friday evening, when more than 50 names of educators all over New England were considered. The other members of the school committee are the Rev. R. Perry Bush, D. D., Dr. Edward F. Johnson, Edward H. Lowell and James H. Malone.

Mr. Fafford has been connected with the Beverly schools for 17 years.

BIG FOREST FIRE IN IDAHO.

WALLACE, Idaho.—The city of Wallace is menaced by forest fires which are sweeping through the Coeur d'Alene district. Taft, Mullan and Murray are also near the fire zone. Fiery embers from the burning mountains are falling in the streets of Wallace and the smoke is so thick that it is difficult to see more than 100 yards. Preparations have been made to send the women and children to Spokane. Appeals were also sent to Spokane and to Ft. George Wright, where a large body of regular troops is stationed.

FEDERAL MEN PLAN OUTING.

The Federal Outing Club, composed of employees of the Federal building, will go on its annual outing Sunday, Aug. 14, the steamer Dorothy having been engaged for the occasion. The steamer will leave City Point at 9 a. m.

RESCUES MAN FROM TRENCH.

George Murray, a Brookline fireman, today rescued from a sewer trench in Brookline Village James Donovan, an employee of the town, who had been overcome by escaping gas. Mr. Donovan later passed away.

Romance of the Ship Resolute and the President's Desk

(Taken from the London Illustrated News of May 11, 1850.)

BRITISH SHIP RESOLUTE.

The picture shows the vessel as it appeared in Captain Austin's Arctic expedition in 1850, two years prior to its sailing in the Belcher expedition in search of Sir John Franklin.

By ERNEST C. MOSES.

ON a bright, frosty morning, under an unclouded sky of an April day in 1852, an Arctic expedition started out from Greenwich, Eng., which eventually provided the materials for two of the most friendly events ever recorded in the history of Anglo-American relations. It was the Arctic searching expedition organized to discover some trace of Sir John Franklin, who left England May 29, 1845, on a voyage of exploration toward the north pole, and was lost. This searching expedition was composed of H. M. ships, Assistance, North Star, Pioneer, Intrepid, and the Resolute, which was destined to have a remarkable career in connection with unusual international episodes.

The squadron was under the command of Sir Edward Belcher, C. B., and the Resolute was manned by a contingent of brave English seamen under Capt. H. Kellett, C. B., assisted by G. F. McDougal, master, who subsequently wrote a very interesting narrative of the expedition (1857).

This searching squadron sailed away from Greenwich, on the Thames, at 5 a. m., on April 21 of the year stated, under auspices most favorable for any success which such an expedition might possibly achieve. But all the success of the undertaking was to be realized by one of its ships only, the Resolute, and that in a terminal consummation far remote from the glacial areas of the Arctic seas. As we shall see, she was not launched to ride the waters of fate unknown and unseen. This ship with its hardy crew was destined to figure in an inspiring episode and finally to provide a souvenir which for many decades was to remind the chief executives of the American republic that Great Britain and the United States are united in a strong bond of fraternal sentiment and good will.

The little fleet of vessels quickly reached the North sea, and, with all sails unfurled to the spring winds of that charming April day, they bore off toward the northern coasts. They passed Voss Head and the bold promontory on which stands the celebrated house of John Groat, with the Highland of Hoy in the distant background, and had adieu to the British mainland.

A few days later the little fleet weighed anchor at Stromness, Orkney Islands, and the crews of the ships visited the town, while delegations from the citizenship quickly returned these civilities and extended the hospitalities of the sea-island community to the Arctic navigators. After sending messages back to London, the commander of the squadron issued a bulletin of admonition and encouragement which was noteworthy in its purpose and statement. The following extract represents the closing section of the commander's declaration:

"It is, I hope, from what I have seen (and from the feeling which I know brought the majority of the officers together to support me in this arduous undertaking), unnecessary to say more than that each will strive to maintain the general happiness of the community—that they will see the necessity of avoiding any subjects which may cause irritation, or difference of opinion; and that if any exciting discussions should arise between others, they will use their utmost endeavors to turn the conversation, or to soften irritating remarks, which may unfortunately have escaped."

To carry out this important service in which we are engaged, we should remember that all must pull together; that the success of the experiment is the success of all, and that according to the importance of the general result, so will they be entitled to ask for reward. Let us strive to exhibit what can be achieved by discipline, good feel-

ing, and that untiring zeal which is ever conspicuous in our noble profession." E. BELCHER. Stromness, April 28, 1854.

Immediately after making this proclamation, the searching fleet sailed away from the islands, and the following year and a half were spent in trying to obtain some trace of the route and vessels of Franklin, the missing navigator. During this period of slow and laborious progress through the icebound seas of the north, nothing transpired beyond the incidents which are common to a polar expedition. But in September, 1853, the Resolute and one of the other vessels became firmly fixed in an ice pack, near the meridian of Point Griffith 74 deg. 41 min. north longitude. Efforts frequently put forth to extricate the ships from the ice cradle in which they were tightly surrounded were unavailing, and they were finally abandoned after closing the ports and calking the hatchways, on May 15, 1854. Later all the men of the Belcher expedition were gathered together on the North Star and part of them were transferred to other English ships at Cape Riley, all landing safely in England Sept. 28, 1854.

The expedition found no traces of Sir John Franklin; but its mission was far from fruitless, for it left a seed of international amity and good-will implanted in the ice fields of North America which was not to perish during its long, chill sojourn in Arctic waters. The abandoned ship was destined to bear some fruit that should in due season nourish the heart of England's gracious Queen with sentiments which stand high in the estimate of the nations. A kind Providence had ordained that the Resolute was to survive its long vigil in the Arctic ocean and give birth to a most useful adjunct to one of the world's greatest administrative offices; therefore no evil fate was permitted to overtake the forsaken vessel.

In 1855 the whaling bark George Henry left New London, Conn., on a cruise to Davis straits. On the morning of Sept. 10 the captain of the bark, while in a field of ice, discovered a ship in the distance, and he finally overtook the derelict off Cape Mercy. The lone ship of the Belcher expedition was overhauled by Captain Buddington at a point over 1000 miles distant from the position in which Captain Kellett abandoned the vessel in 1854. The Resolute was found to be in a deplorable condition. The water tanks had ruptured and the hold was partially filled with water. With four force-pumps, it required three 14-hour days of hard labor by Captain Buddington and six men to pump the water out. A pair of fairly well preserved epaulettes belonging to Captain Kellett was found in his cabin, and casks of provisions undamaged by the hyperborean frosts were found in the ship.

The captain of the American whaler decided to take his prize to New London. Placing his own bark under the charge of a subordinate, he took 11 of his men on to the British vessel and made his plans to start for home. With a poor level watch, a quadrant, an imperfect compass, and with no chart by which to steer his prize but a rough outline of the North American coast drawn on a sheet of foolscap paper, Captain Buddington squared away for his home harbor on Oct. 20. He waited a few days outside the ice-floe for the George Henry, but as the whaler did not appear, he sailed on alone for the south. While waiting for the George Henry the British bark Alibi (Captain Stuart) hove in sight and on being signaled came alongside the Resolute. After telling the British captain of his rescue of the ship, Captain Buddington handed over to him the epaulettes of the former commander and they were sent

to Captain Kellett, finally reaching him in the West Indies.

The Resolute arrived at New London Lighthouse, after a very difficult voyage, on Christmas eve, Dec. 24, 1855. The arrival of the English boat at the Connecticut port incited great interest and rejoicing among the maritime population and citizens generally. Arriving in America at the season of gift-giving, it seemed that the destiny of the Resolute took on a new hue, for it subsequently became the medium of very conspicuous gifts between the two nations, thus illustrating the inherent unity of the human race.

The New York Herald published an interesting account of Captain Buddington's courageous achievement on Dec. 27, and immediately Crampton, the English minister, entered a claim to a "continuing right" to the ownership of the prize. The minister then conferred with his home government in London, and the authorities quickly waived all claim and right to the vessel, thus making it the unchallenged property of Captain Buddington by force of common maritime law.

Congress then performed a most commendable act by purchasing the Resolute for the sum of \$40,000, and the boat was conveyed to one of the government navy yards and refitted with great care for Arctic service. The next grand step taken by Congress was to present the renovated vessel to Queen Victoria and the people of Great Britain. This was accomplished by a joint resolution of the House and Senate, Aug. 28, 1856.

On Nov. 13, 1856, the Resolute left New York under the command of Capt. H. J. Hartstone, U. S. N., and one month later, after a boisterous voyage with a furious gale raging, the vessel arrived at Portsmouth, Eng. Immediately upon letting down her anchor in English waters the St. George cross was displayed at her masthead, beside the stars and stripes of the American Union. A royal salute was fired from the H. M. flagship Victoria, from the fortifications and from the gunboat Shannon at Spithead. Sir Charles Wood, First Lord of Her Britannic Majesty's Admiralty, had arranged for a royal welcome to Captain Hartstone and his officers, including accommodations at the best hotel, a bountiful supply of fresh provisions for the crew of the Resolute, and railroad passes to London. Invitations of hospitality were showered upon Captain Hartstone from municipalities and military authorities, scientific associations and clubs without number.

Queen Victoria expressed a desire to see the boat of wonderful history and it was towed to Cowes and secured to the place of royal embarkation at Trinity wharf. It was there visited by the royal party, including the Queen, Prince Consort Albert, Prince of Wales (the late King Edward), the Princess Royal and Princess Alice.

In presenting the Resolute to the Queen, Captain Hartstone delivered the following simple, but very eloquent speech:

"Allow me to welcome your majesty on board the Resolute, and in obedience to the will of my countrymen and of the President of the United States, to restore her to you, not only as an evidence of a friendly feeling to your sovereignty, but as a token of love, admiration and respect to your majesty personally."

The Queen listened to this brief address with much interest, and at its conclusion merely replied with a gracious smile: "I thank you, sir."

She then invited Captain Hartstone to dine and spend the night at Osborne, extending an invitation to the officers to visit the royal palace and grounds. The Queen also ordered that the sum of £100 should be distributed among the crew of the Resolute.

On Dec. 30 the formal presentation to the English people took place, and Captain Hartstone then delivered the following address to Vice-Admiral Sir George Seymour, who accepted the vessel for the British Admiralty:

"Sir, the closing scene on my most pleasant and important mission has now to be performed. And, permit me to hope that long after every timber in her sturdy frame shall have perished, the remembrance of the old Resolute will be cherished by the people of the respective nations. I now, with a pride totally at variance with our professional idiosyncrasy, strike my flag, and to you, sir, give up the ship!"

In responding, Admiral Seymour declared "that the graceful act on the part of the United States toward this country, and the courteous manner in which it has been carried out by Captain Hartstone will ever live in the memory of the people of England."

A few days later Captain Hartstone was entertained at dinner by Lord Palmerston, Secretary of State for Foreign Affairs, and also by the municipal authorities of Portsmouth. When he was ready to return to America, Sir Charles Wood placed at his disposal a vessel to make his homeward trip, and the generous offer was promptly accepted by the commander and his officers.

Little indeed could Captain Hartstone foresee of the future of those timbers which comprised the "sturdy frame" of the Resolute. Her eventful career as a silent ambassador of international good-will was by no means ended with the act of restoration just narrated. There were vacant pages in her log yet to be filled out. Her name and fame were scheduled to appear again on the program of international courtesy in a most pleasing way. There were noteworthy materials in the Resolute's construction which in the fulness of time were destined to be transformed into a souvenir of suitable character to represent a gracious Queen's appreciation of

the fine spirit of generosity manifested by the American Congress. But years and decades must elapse before this sentiment should blossom into expression.

For nearly a quarter of a century after her return to her majesty's service, the Resolute played a humble part in Britain's marine affairs. She was possibly more celebrated because of her gallant rescue from the ice of North America, and for the fine spirit of good-will which attended her return to the Queen's service, than for anything which was thereafter accomplished under her sails. In any event, a rich seed of international friendship was sown in the warm heart of Queen Victoria by the event, and like all noble deeds of brotherly kindness it was bound to beget its like. For twenty-four years the good Queen cherished the recollection of all that attended the generous restoration of the Resolute to her service, and her appreciation finally took substantial form when the vessel was retired from service.

It was decided to dismember the famous ship in 1879-80, and when her timbers were taken apart at Chatham dockyard, the Queen saw a grand opportunity to permanently write in American history her appreciation of the courtesy of the Thirty-fourth Congress, and her love for the people of the New World. So with this agreeable end in view she ordered that the very best materials among the English oak timbers and planking of the Resolute should be carefully selected and transformed into a massive writing table to be sent as a royal present to the President of the United States. The table was designed and finished in a style which made it suitable for the richest palace of the British realm. A tablet was affixed to the top center drawer of the table, announcing the history of the two important events which attended the career of the Resolute, in the following durable inscription:

"Her Majesty's ship Resolute forming part of the expedition sent in search of Sir John Franklin in 1845, was abandoned in latitude 74 deg. 41 min. North, longitude 101 deg. 22 min. West, on May 15, 1854. She was discovered and extricated in September, 1855, in latitude 67 deg. North, by Captain Buddington of U. S. whaler George Henry. The ship was purchased, fitted out and sent to England as a gift to Her Majesty Queen Victoria, by the President and people of the United States, as a token of good-will and friendship. This table was made from her timbers when she was broken up, and is presented by the Queen of Great Britain and Ireland to the President of the United States as a memorial of the courtesy and loving kindness which dictated the offer of the gift of the Resolute."

The writing table, representing the compact residue of all that was best in the timbered construction of the Arctic ship, was then sent to America with appropriate friendly expressions from the Queen's official representative, Victor Drummond. The table arrived safely at the White House in Washington on Nov. 23, 1880 (during the last year of President Hayes' administration). Very little attention was paid to this notable presentation by the press on either side of the Atlantic. The New York Times presented a three-inch notice of the arrival of the present at the capital, in its edition of Nov. 24. Under the heading of "A Royal Gift to the President," the notice presented the text of the inscription and stated that the table, "was made of live oak, weighs 1300 pounds, elaborately carved, and altogether it is a magnificent specimen of workmanship." On the 25th the London Times devoted a four-line notice to a mere announcement of the arrival of the table at Washington. The gracious act of England's Queen never was accorded the recognition which it certainly deserved.

For the past thirty years this beautiful, substantial and practical souvenir of cordial international friendship between Great Britain and America has continued to serve a good purpose as the official writing desk of the Chief Executives of the United States. President Taft now transacts the business of the presidential office on this, celebrated writing table of romantic history. It daily confronts the head of our nation as a reminder of the friendship and good-will which exist between the great English-speaking nations of yesterday and today.

It is doubtful if any other ruler in the old or new world is permitted to exercise the official functions of his administration on a desk evolved from such a romantic and wonderful chain of circumstances. With the memory of the inspiring and majestic interchange of courtesies which have attended its history, how can work performed on such a grand souvenir ever bear the slightest relation to "that dry drudgery on the desk's dead wood" of which Charles Lamb complained? The wood drawn from the frame of the Resolute is innaminate, but the affection which prompted the gift and the intelligence which formed it are linked to the divine, and will preserve the memento down through the centuries to encourage peace and friendship among the nations.

May all the official acts transacted on the surface of this wonderful writing table be as thoroughly grounded on the principles of justice, benevolence and good-will, as were the noble expressions of international kindness of heart which made the history of the Resolute so conspicuously interesting and gracious.

HAMPDEN RAILROAD PLANS.
Plans for the Hampden railroad filed at the railroad commission's office, show that it will cost in the vicinity of \$3,196,500.

ROYAL GIFT TO THE PRESIDENT OF THE UNITED STATES.

Desk made from timbers of the British ship Resolute and sent to President Hayes by Queen Victoria. The vessel was abandoned in Arctic waters, saved by a United States whaler and presented by this country to the Queen of England.

PRINCETON GIFT ESTIMATE IS HIGH

LYNN, Mass.—While the estate of the late Isaac C. Wyman, the eccentric Salem millionaire who by his will left the greater portion of his fortune to Princeton University, has not yet been settled, the executors of the will, Atty. James M. Raymond of Salem and Professor West of Princeton, have given which show that it will not total anywhere near the early estimate of relatives and friends.

Mrs. Raymond says: "We have not yet ascertained the true value of many stocks and other securities which form a large part of the estate. We may find that his total estate is worth \$2,000,000 and it may be worth double that amount, but this does not appear likely."

CHANNEL CLEARED BY ROCK-CRUSHER

OTTAWA, Ont.—For some weeks past the department of marine has had a new rock-crusher at work in that difficult part of the St. Lawrence channel known as Cap a la Roche. By means of a sharp-pointed drill 50 feet long and weighing 15 tons, boulders in the channel which have been found difficult to remove, are crushed and the pieces removed by a dredge.

By the end of the week an inspection will determine the degree to which the experiment has been successful. The rocky ground at Cap a la Roche is the chief obstacle to be overcome in the completion of a 35-foot channel to Lake St. Louis by the end of the dredging season.

FRENCH STATUE OF WASHINGTON

PARIS.—The statue of George Washington, the gift of the state of Virginia, will be dedicated at Versailles next Thursday. The event will be fittingly celebrated and Ambassador Bacon will be the orator of the occasion. Sons and Daughters of the American Revolution who are in Paris will take part in the program. The statue is a replica of that made more than 100 years ago by the great Houdon and is considered a splendid work of art.

COMMISSION FOR STITCHERS.
BROCKTON.—The affairs of the former members of Stitches Union No. 44 of this city have been placed in the hands of a commission of seven Brockton stitchers.

People and Events in the Music World

In the Realms of Music

OPERA ANNOUNCEMENTS.

Miss Mary Garden and Mme. Mariette Mazarin will both sing in Boston during the company season at the local opera house, according to word just received from Manager Henry Russell, who is now in Paris. These singers are probably the most talked of sopranos on the operatic stage today. Both were last season members of the Hammerstein company. Madame Mazarin sang the title role in Strauss's much discussed opera, "Elektra."

Mr. Russell sends word as follows: "I have added to our list of artists Mary Garden, Mme. Mariette Mazarin and Marguerite Sylva. I have reneged Miss Elvira Leveroni, a young Boston contralto, who made such favorable impression last season. To our list of tenors I have added Amadeo Bassi, Carl Burrian, Charles Dalmores and John McCormack. To the list of baritone I have added the names of Hector Dufranne, Maurice Renaud, Mario Sammarco and Walter Soomer."

"I always say to my young friends," says Adelina Patti, "not can you shake can you trill, can you imitate a mocking bird—but can you sing a simple ballad in honest, straightforward fashion, such a ballad, for instance, as 'Home, Sweet Home'? That is the real test."

Patti knows. And it is worth observing that what she says of singing applies also to every other work in life. Naturalness is the soul of art. No two things are more closely akin than art and heart.

Architecture, with all its grandeur, had its beginning and will have its ending in the humble building of the home.

"The Song of the Waves," a barcarolle by a Boston woman composer, Miss Marie Johnston, is meeting with a gratifying success. Her publisher, C. W. Thompson, reports increasing demand for the piece in widely separated sections of the country. Bostonians heard the composition recently at a concert by the Symphony orchestra, in an arrangement made by Mr. Strube. An organ arrangement recently played at St. Paul's church was the subject of favorable comment.

Miss Johnston was born in Boston. She studied singing with George L. Osgood and the piano with Warren A. Locke and with teachers of repute in other cities. The writing of the barcarolle was the culmination of a long-cherished ambition of Miss Johnston to put into music the surge of the waves on the beach, and the wash of the receding water. The composer rewrote the composition many times before she was willing to give it to the public. Miss Johnston is now engaged upon the composition of the score for a new musical play.

Five engagements with the Boston Symphony orchestra have been secured by London Charlton for Mme. Corinne Ridder-Kelsey for the coming season. Mme. Ridder-Kelsey will open the series of appearances in Boston Feb. 16, singing the soprano role in "The Children's Crusade." In Baltimore she will sing in the performance of Beethoven's ninth symphony, while the subsequent appearances arranged for are in New England.

Mme. Liza Lehmann, who has composed the incidental music to "Clementina," the play in which N. B. Irving is to appear next autumn, will continue her concert tours of this country next winter with a quartet for the performance of her song cycles.

The directors of the municipal theater at Nuremberg have arranged to give the first performance in the German language of Massenet's latest opera, "Don Quixote."

The most interesting traditions handed down with regard to Chopin's playing all refer to his enchanting whisper. Pages, if not volumes, have also been penned upon his tempo rubato. He himself could explain in a very simple manner.

MUSICAL INSTRUCTION

MRS. SIDNEY ROSENTHAL

RECITAL AND CONCERT WORK. PUPILS ACCEPTED. 6237 HIBBARD AVE., CHICAGO. Telephone No. 4806 Hyde Park.

MUSIC AND DRAMATIC ART

CHICAGO CONSERVATORY

AUDITORIUM BUILDING, CHICAGO. All branches of music taught. School of Acting. Catalogue free upon application. Address: WALTER PERKINS, President.

BERTHA M. KADERLY

Teacher of Voice Production 447 DEMING PLACE, CHICAGO.

GEORGIA HOLT

PIANISTE. TEACHER OF PIANO AND HARMONY. Studio 335 Ohio St., Bangor, Me.

COSMOPOLITAN SCHOOL OF MUSIC AND DRAMATIC ART

Faculty of 50 eminent teachers: piano, vocal, violin, public school and opera school music, etc.; for particulars address Dept. A, Auditorium Bldg., Chicago.

MR. JOHN LANE

TEACHER OF SINGING. 372 BOYLSTON ST., BOSTON, MASS.

FREDERICK N. WATERMAN

Voice placement, development, artistic singing. New Century Bldg., 177 Huntington Ave.

WILLIAM BEARD. BASS-BARTONE. Recitals and concerts, teaching. 27 Auditorium Bldg., Chicago.

INSTRUMENTS OF THE ORCHESTRA—III.

The brass wind instruments described: from "Instruments of the Orchestra" by Kathleen Schlesinger.

THE brass wind instruments of the modern orchestra differ in outward appearance from the wood wind in a very marked fashion. Not only are they made of brass, but they usually send the tone through many convolutions of the tube, which makes them appear more complex in structure than the wood wind. Miss Schlesinger's book is carefully illustrated. It is hard to describe these instruments verbally.

The French horn sweeps around in a circle, with the bell flaring forth from the stem on the opposite side of the circle from the mouthpiece. It is one of the most characteristic of the brasses and the most difficult to master. It has three principal parts, first, the body, 7 ft. 4 in. long, which is a conical brass tube, spirally placed, with a large wide-mouthed bell; second, the crooks, interchangeable spiral tubes of different lengths, each altering the pitch and key of the instrument. When the longest crook, the B-flat basso, is used the inclusive length of the tubing is about 17 feet. Third, the mouthpiece of brass or silver in the shape of a funnel, to which the horn chiefly owes its softness and richness of tone, and which is quite unlike the mouthpiece of any other instrument in the orchestra except the cornophone and the Wagner tubas. Two tuning slides, shaped like a capital U, lie across the body of the instrument with three or sometimes two valves or pistons attached to these slides and to the body.

The natural or open tones on the horn are not made by means of finger holes or keys as in the clarinet, oboe, etc. They depend first upon the length of tube used, the greater length producing the lower pitch; second upon the tension of the muscles of the mouth, and the increased breath pressure, which makes certain harmonies, third upon the valves which, depressed by the fingers, lower the pitch of the instrument and of any crook in use at the time. Another means of lowering the pitch of the instrument is by placing the hand up to the horn or to insert it into the bell. This gives a muffled and veiled quality sometimes desired. It was discovered by a player in Dresden and is called hand stopping.

The practical compass of the horn is from 8 feet C (the C below the bass clef) to the E above the treble clef. The music for the horn is always written in C, both clefs being used in notation. The composers indicate the key or crook in which the horn is to play, but the performer often transposes for himself. There are 11 of these crooks that are chiefly used now.

The timbre of the French horn is mellow, sweet, sonorous, having none of the metallic sound of most other brass instruments with cup-shaped mouthpiece. The color of the piston notes is a little like the trombone but more resonant. The horns usually play in pairs, yet composers sometimes use horns in four different keys.

One of the forerunners of the horn was the Roman buccina, which was a brass tube of great length, curved round spirally, and worn round the player's body like the modern helicon. The Oliphant or Roland's horn is known in specimens from the fourteenth century, but the Franks were familiar with the horn before the battle of Roncevaux, 778, for Roland blew mighty blasts to call Charlemagne to his aid. The modern tenor horn is not so perfectly spiral in the disposition of the tube as the regular French horn, and the mouthpiece end crosses the tube of the bell.

The cornophone belongs to the horn family because of its funnel shaped mouthpiece and conical bore and parallel bell and its different crooks tuned to different keys. It has some features like the cornet, however, the compensating and tuning slides, and the three pistons. The tube is coiled in an oval form instead of spirally. The notes are produced by overblowing, that is, by the varied tension of the lips and breath pressure. The usual compass is from A below the treble staff to C above it. The tone is like the French horn but a little sharper and more reedy.

The tubas include today two distinct families of instruments. First is the modern development of the bombardon and the euphonium, which are really the bass saxhorns, having four or five pistons, all but one set vertically in the instrument. Second are the Wagner tubas, which belong by their mouthpiece to the horn family; that is, they are played with a funnel-shaped instead of a cup-shaped mouthpiece like the tubas. These are really basses of the French horn. The saxhorn has a cup-shaped mouthpiece and a tone color between a horn and a trombone.

The euphonium is called in the orchestra the tuba. It is a wide bore, conical brass tube, ending in a wide-mouthed bell, and, as has been said, a cup-shaped mouthpiece, with four or five pistons. By varied tension of the lips across the

mouthpiece the harmonics or natural notes are produced by overblowing. The intervening notes are made by the valves, which by opening a passage into additional tubes deepen the pitch. A compass of four octaves may be made on this instrument by means of using all the valves at once. The bass clef is used in notation. The tone is rich, noble and powerful, sounding well with the trombone, speaking readily but somewhat slowly in the lower registers. The euphonium is the 'cello of the brasses and blends equally well with brass or reeds. It is too large an instrument to admit of tonguing, which in the flute produces effects of staccato by a fluttering of the tongue. Either melody or a bass may be given to it, and sometimes a counterpoint subject with the bassoon and horn.

The bass tuba or bombardon is exactly like the euphonium in structure and gives notes an octave lower. The deeper pitch of these brass instruments is longer and wider the conical tube of which they consist. The euphonium is 26 inches high, with a bell nearly 10 inches across; the bombardon or bass tuba is 40 inches high and its bell is 16 inches across. The quality of tone of these tubas is sonorous, rich and of immense power, partaking of that of the organ and trombone. The helicon, or contra-bass tuba is built with so wide a circle that it is placed round the body of the performer, with the bell coming forward over his shoulder from behind him. The contra-bass tuba as played in orchestra is built in the oval shape of the bass tuba or bombardon. The bass tuba corresponds to the double bass in strings and to the pedal clarinet and the double bassoon in reeds. A beautiful effect is made by pianissimo playing on this big burly instrument. Wagner used the tuba extensively.

The Wagner tenor-bass tuba belongs to the valve horn family, of which it is the bass. It has a wider bore than the horn tube and is not bent spirally but more oval like the tenor horn. The bell is at the right of the performer. The valves differ from the other valve systems and help to make the intervening notes of the harmonic series. Overblowing comes into play in this instrument. The tenor tuba is in B flat, the bass in F, and the music like that of the horn is always written in C, in bass and treble clefs. It is a transposing instrument. The tone is more metallic and less pure than that of the valve-horn. Wagner had these instruments made to complete the quartet of the horns, instead of relying upon an instrument of different timbre, like the trombone or euphonium.

The trombone or sackbut belongs to the brass instruments with cup-shaped mouthpiece. It is a tube doubled twice in the tenor trombone following the direction of an immensely widened and flattened S, with a wide bell at one end and the mouthpiece at the other, which varies in size according to the lip of the player. The bore is rather slender and is cylindrical except for the conical bell-joint. The tubes are made double and slide upon each other, giving a greater length of tube according to the depth of pitch required. The slide is manipulated by the right hand. There are seven positions of the slide and each gives a fundamental tone and its harmonic series produced by overblowing. The performer on the trombone is just as dependent on a correct ear as the players of stringed instruments, for the positions of the slide are found by ear. The compass of the trombone is about two octaves and a sixth. The music sounds as used in the orchestra, alto, tenor, bass and contra-bass. The tenor and bass are the most used and have a powerful, penetrating tone. The bass is full, rich, sonorous, suitable for heroic, majestic music.

The name trombone means in Italian large trumpet. The family is of great antiquity, the sackbut being the earliest form of a draw or slide trumpet. It developed into the trombone in the beginning of the sixteenth century, when trombones as good as the modern ones were made in Nuremberg. There were 10 sackbuts in the royal band of Henry VIII. The contra-bass trombone has a big spiral sweeping above the bell, which is reversed when being played. The tenor trombone is held in a more or less horizontal position. Beethoven and Wagner used the trombone to perfection.

The trumpet consists of a long narrow tube of brass or silver, doubled twice round on itself and ending in a bell. The bore is very small and is cylindrical. The mouthpiece is a cup and must fit the lip power of the player. The lips are stretched across the cup and act as vibrating membranes, like the vocal cords. There are three chief trumpets, the natural, with crooks to vary the tones; the valve trumpet, with pistons; the slide and double-slide trumpet, but the valve trumpet is the one universally used.

The scale is produced by varying the tension of lips and breath. The compass of the valve trumpet is from D-flat on the bass clef to high C. The tone is very like that of the cornet. The trumpet was known very early and various forms are found in old pictures. Fra Angelico has angels playing on trumpets both straight and bent, and Luca della Robbia has a trumpet bent in three parallel branches, a form that prevailed for 300 years. It is called the natural trumpet. Two or three trumpets are used in orchestras as a rule, some of Wagner's scores, as "Lohengrin" and "Tannhauser" requiring many more. Miss

Schlesinger regrets the growing tendency to replace this instrument by the more commonplace cornet, which has a less noble timbre. Beethoven, however, used the trumpet little.

The ophicleide is an instrument lately banished from English orchestras; it is a brass instrument with cup-shaped mouthpiece, and the length of tube is varied by means of lateral holes and keys. It consists of a conical wooden or brass tube, widening out to a funnel-shaped bell which is vertical. The tube is doubled on itself once and ends in a tight coil from which the mouthpiece protrudes. The tone is not pleasing. The curious name of the instrument means a snake and a doorknob in Greek; it is a development of the old serpent bass and the Russian bassoon. Mendelssohn employed it freely.

The doublebassoon consists practically of a three-valved euphonium and a perfect valve trombone and is two instruments in one. It looks like a euphonium with a second bell at an angle of 45 degrees to the original one. It has two complete sets of tubing. The tone is pure, rich, and full for the euphonium and clear and ringing for the trombone.

The cornet is a cylindrical tube of brass or electro-silver, with a larger bore

Thayer, McNeil & Hodgkins'

AUGUST SALE OF

Seasonable Shoes

Our Mark-Down Sale, now in progress, offers to men and women who appreciate the real worth of our shoes an opportunity to purchase them at much less than our regular prices. We have no old styles or shop-worn shoes to offer—all are this season's approved styles.

WE SUBMIT A FEW SPECIMEN ITEMS:

Women's Patent and Gun Metal Calf Pumps with Colonial Tongues 7.50	Men's White Buckskin Low Shoes 5.50 and 7.00
Women's Tan Russia Calf Pumps, with short vamps. 1.50	Men's 2 and 3 Eyelet Ties in Gun Metal and Tan Russia Calf 1.00, 5.00 and 5.50
Women's White Canvas Pumps, with thin soles and white heels. 1.00	Men's Tan Russia Calf Low Shoes, narrow and medium toes. 4.00

47 Temple Place — 15 West Street

than the trumpet, but a coming conical near the bell. This tube is doubled round on itself. The mouthpiece is cupped, like the trumpet, but is larger and like the trumpet its size depends on the lip of the player. The lips act here, too, like vocal cords, set in vibration by the breath. The compass of the cornet is from F sharp below the treble clef to high F. The tone is between that of horn and trumpet, with all the blaring quality of the latter but not its heroic sound. It is bright in tone and an agile instrument, but hard and commonplace.

Eastern Yacht Club Gets World's Attention

Sonderklasse races are sailed on course off its quarters at Marblehead Neck, Mass.

HOME OF THE EASTERN YACHT CLUB, MARBLEHEAD, MASS.

The club, which owns a fine three-story structure, has about 550 members and 350 craft enrolled. This organization has a station also at Bar Harbor, Me.

MARBLEHEAD, Mass.—The eyes of yachtsmen throughout the world are turned, at present, upon the Eastern Yacht Club at Marblehead Neck, for on the measured course of the club, situated on the southeasterly side of Marblehead Neck between Tinkers island and Marblehead rock, the Spanish-American sonderklasse races are held.

The Spanish-American races for the sonderklasse are open to such Spanish yachts—not exceeding three in number—as may be selected by the Federation Espanola de Clubs Nauticos, and to an equal number of yachts selected by the Eastern Yacht Club. Each yacht must be designed, built and all sails, cloth and fittings made in the country to which the yacht belongs.

The Eastern Yacht Club was founded in 1870 and has steadily grown, until now there are about 550 members and 350 craft are all descriptions enrolled.

Among the honorary members appear such names as President Taft, His Im-

perial Majesty Wilhelm II., Emperor of Germany, and Theodore Roosevelt.

The collector of the port of Boston, commandant of the Charlestown navy yard and the engineer and inspector of the Boston lighthouse district are also among the honorary members, ex-officio.

For the present year the officers of the club are: Commodore, F. Lewis Clark; vice-commodore, Robert T. Paine 2d; rear commodore, Herbert M. Sears; fleet captain, Sabin P. Sanger; secretary, Henry Taggard; treasurer, Patrick T. Jackson; measurer, W. Starling Burgess.

The club headquarters are at Marblehead Neck. The clubhouse is a large three-story structure on the hill, but within easy distance of the boat.

On the main floor are the reading rooms, the parlors, office, main dining room, private dining room, billiard room and ladies' dining and reception rooms. Outside is a large covered piazza.

The second and third floors are entirely devoted to sleeping rooms for

members. In the basement there is a thoroughly modern kitchen, a servants' hall, rooms for servants and for the janitors and large storerooms.

The club has also a station at Bar Harbor, Me., which was established in accordance with an agreement with the Mt. Desert reading room in 1902, under which the two clubs built a permanent pier and landing to be used jointly.

One of the best-known events of the club is the annual cruise along the coast of Maine to the Bar Harbor station, and all summer the Eastern burgee—the blue pennant with a red diagonal stripe on which there is a white star circumscribed by a white circle—may be seen almost anywhere along Maine's rugged coast.

General meetings are held three times a year—in February, April and October. Twenty members constitute a quorum at these meetings, but, needless to say, there is always a large attendance.

ACQUIRES FAMOUS WAKEFIELD HOUSE

WAKEFIELD, Mass.—One of Wakefield's historic landmarks, the old Eaton homestead at the corner of Main and Salem streets, has been sold by Chester W. Eaton to William H. Cartland. Mr. Cartland is having it remodeled for occupancy.

It was erected in 1801 by Lilley Eaton, 2d, and when owned by Lilley Eaton, 3d, was the home of the old South Reading Mechanics and Agricultural Institution and served the purposes of a town hall. In its earliest days it was known as the Pilgrims hotel, for there the pastors who supplied the Baptist church were entertained and the weekly prayer meetings were held on the third floor before the church edifice was built.

What Other Editors Are Saying

THE selected editorial comments today deal with the crusade in New York city against dealers who use short weights and measures:

TROY (N. Y.) TIMES—The crusade against the dealers who use short weights and measures appears to meet with very general approval except from those likely to be hit in enforcing the law.

BALTIMORE NEWS—Of 304 places inspected in New York 59 per cent of the scales, 71 per cent of the weights and 82 per cent of the capacity measures were incorrect. And almost invariably it is found that the dealer gets the benefit of the doubt. There is something almost uncanny about the way scales and measures pile the burden on the shoulders of the luckless ultimate consumer.

ROCHESTER DEMOCRAT AND CHRONICLE—Some disclosures about short weights and measures in New York city intimate the existence of graft in business as well as in politics. There are upper and lower grades in both.

INDIANAPOLIS NEWS—This is not a local but a national question, and a very important question it is. If the definition cannot be equal and uniform, all else becomes of secondary importance; price becomes a mere figure of speech.

PORTLAND (Ore.) OREGONIAN—It is almost impossible to conceive of an

"honest barrel" for potatoes. The truth of the matter is that there is only one genuinely honest method of apportioning eatable substances, and that is by weighing them.

NEW YORK WORLD—The bureau of weights and measures detected a 1200 pound shortage in a three-ton load of coal for an uptown apartment house. For so large a variance scales alone were scarcely responsible, yet the incident lent point to the discovery made by Commissioner Driscoll in a tour of inspection through western factories that the testing of scales for accuracy is more or less particular according to the laws in force where the machines are to be used. When extreme care was taken the scales were for the export trade.

BOSTON TO HAVE A NEW THEATER

Negotiations are under way looking toward the erection of a theater by Liebler & Co. on Eliot street on a site now numbered 129 to 145 and containing 15,640 square feet. The lot has a frontage of 102 feet and runs back 150 feet to Van Rensselaer place.

Liebler & Co. are a prominent theatrical firm. The estate was sold by Ralph B. Williams, to Amory Elliot and other trustees. The assessed value of the property is \$208,900, of which \$164,600 is on the land.

MONITORIALS

By NIXON WATERMAN.

THEIR HARVEST.

With auto outing parties
Seeking food most every minute,
It's safe today for one to say,
The country inns are in it.

In the field of news, this summer's
mixture of politics, baseball and aviation
has been perhaps a little more interest-
ing than that which any recent season
has been able to produce.

Wiggs—I hear that your basket picnic
was a great success.
Wiggs—Yes, it proved to be quite a
no-table affair.

AN EASY TIME OF IT.

"I'd like to be a river,"
So dusty ragged said,
"For it can do its work, you know,
And flow wherever it wants to go
And never leave its bed."

Since the "Boy Scout" code says that
he must be courteous, truthful, useful
to others, eschew snobbery, refuse
"tips," be kind to animals, cheerful
under all conditions and a gentleman at
all times, there is no reason why he
needs to go armed with aught else than
his high purposes and his armor of good
deeds.

LIVING IS HIGH.

A-spiring Youth—And why, father, do
you seek to discourage me from becom-
ing a poet?
Practical Father—Well, chiefly for the
reason that your appetite is always so
good.

Congressmen who are now at home
looking after their fences are no doubt
blessed engaged in getting out good picket
lines here and there.

Inasmuch as the French aviators have
proved that they can sail their aero-
planes by compass through the thickest
fog there is no longer any reason why
this means of travel should not be-
come popular in the vicinity of London.

BIG CROP.

With all the autos they have got
To keep well shod today,
One rubber plant must produce a lot
Of full-blown tires, they say.

MORE TO THEM.

Right few are they who would dare to
say
There's a better food than fresh-laid
eggs,
But they're better still if we'll wait
until
They can run about on their own good
legs.

The evolution of armament and de-
fense constitutes a long and interesting
story. The chain shirts and coats of
mail worn by the kings; their castle
walls and moats; the walls about their
cities, and in the case of China, the wall
about the entire country; then the forts
along the shores and boundary lines of
their domains; and finally the floating
forts in the form of war fleets capable
of meeting the enemy at sea. Who can
say what is to mark the subsidence of
the war spirit and when is it to make
itself felt?

THE COLLECTOR.

He—Wife, did the expressman deliver
some pieces of fine old furniture today?
I tell you I got that lot at a bargain
price!
She—Well, I hope you did, for it con-
sists of pieces which we cleared out of
the attic and sent to the auction room
last week.

Topsy—Do you suppose it ever does
happen that the tail wags the dog?
Topsy—I shouldn't wonder. We are
all quite sure that the tale of the fish
as it is told by the fishermen is often
the biggest part of it.

HAPPY THOUGHT.

He thought his Sarah very dear,
And that his heart must persuade her
To his own, in accents clear,
Each night he'd Sarah-nade her.

Mrs. Wayback—Well, Lemuel, since
you will have it that we've got to go on
a tower to Europe have you decided
whether we'll have steerage or cabin pas-
sage?

Mr. Wayback—Seen' as how we've
lived in one for so many years I reckon
a cabin passage will be good enough for
us.

HIGH-CLASS.

Humpty—Have you been to see that
Vermont farm you traded for?
Dumpty—Yes, I thought I got it very
cheap but when I found it hanging over
the side of a mountain at an angle of 43
degrees I concluded it was pretty steep
real estate.

If England's military forces shall ever
have to go after some of those little
Asiatic countries they would soon make
a Mess-o-potamia.

Putson—I presume Chappie's engage-
ment to the heiress has brought him un-
told happiness?
Cals—On the contrary he has already
told it to nearly everybody in town.

QUITE DIFFERENT.

Old Mother Hubbard went to her cup-
board
To get her poor dog some bread,
But the cupboard was bare of that com-
monplace fare
And so he got cake instead.

Dealer—Here is a good spring bed I
can sell you cheap.
Customer—No, I can't afford it. I've
got to have one I can use all the year
round.

APPARENTLY SO.

Fiddledy—After all, it strikes me that
Cupid with his bow and arrows is a
pretty poor marksman.
Dee—How do you arrive at that con-
clusion?
Fiddledy—Well, I've observed that
whenever, with his sweetheart, a young
man makes a hit he usually Mrs. her.

The automobilist three miles from
town with a punctured tire and no way
of mending it, is glad enough when a
farmer comes driving along with any
old "plug" that will enable him to get
his machine to a repair shop.

HESSE PROTESTS
PROTECTING CZAR

DARMSTADT—A protest against the
heavy expense involved in guarding the
Czar on his coming visit to Friedberg
has been made to the Hessian Diet by
Social Democrats. If the Diet does not
curtail the elaborate plan for the Czar's
protection, the Democrats announced
that they would carry their complaint to
the Reichstag.
Democrats say that the police will be
obliged to neglect their duties to the
public "for the purpose of guarding a
foreigner." They object to "upsetting
Hesse for Nicholas' benefit."

Today's Navy Orders

The following navy orders were posted
today at the Charlestown navy yard:
Capts. B. C. Bryan, C. M. Harlow and
C. A. Carr, commissioned captains in the
navy from July 1, 1910.

Commanders N. C. Twining, T. P. Ma-
gruder, W. V. Pratt and G. R. Marvell
commissioned commanders in the navy
from July 1, 1910.

Lieutenant-Commanders H. C. Dinger,
L. Shane, A. N. Mitchell and F. L. Pin-
ney, commissioned lieutenant-commanders
in the navy from July 1, 1910.

Lieut. A. C. Stott, Jr., E. S. Root and
A. W. Sears, commissioned lieutenants in
the navy from Jan. 31, 1910.

Lieutenants W. O. Spears, J. M. Poole,
3d; A. F. Carter and A. J. James, com-
missioned lieutenants in the navy from
July 1, 1910.

Lieutenants J. J. London, L. N. Mc-
Nair, H. R. Greenlee, L. W. Townsend
and B. H. Steele, commissioned lieuten-
ants (junior grade), in the navy from
Jan. 31, 1910.

Ensign F. T. Chew, detached the de-
stroyer Preble, to the torpedo boat
Rowan.

Midshipman T. J. Keleher, detached
the battleship Virginia, Las Animas,
Col.

Passed Assistant Paymaster J. H. Gun-
nell, detached the cruiser Cleveland, to
duty navy yard, Mare Island, Cal.

Naval Constructors W. McEntee, W. B.
Ferguson, Jr., and J. A. Spilman, com-
missioned naval constructors in the navy
from July 1, 1910.

MR. LORRAINE LOSES MACHINE.
LONDON—Robert Lorraine, the actor,
who has been at Anglesey, on the Welsh
coast, awaiting a favorable opportunity
for a flight to Ireland, has lost his ma-
chine, which fell to the ground and was
smashed.

FREE MUSIC TREATS
NEXT SUNDAY TO THE
CITIZENS OF BOSTON

Four band concerts will be given by
the music department of the city of
Boston Sunday. The Municipal band will
play on Boston common at 3:30; the
First Corps Coast Artillery band at Ma-
fue park, South Boston, Ernest Wil-
liams' band at Pine bank, Jamaica pond,
and Stone's Military band at Wood
Island park.

The program at Abbotswood, Franklin
park, for Saturday afternoon, which will
also be given by the Municipal band, is
as follows: March, "Second Connecticut";
Reveries; overture, "Zampa"; Herold;
waltz, "España"; Waldteufel; selection
from the "Goddess of Liberty"; Howard;
medley of popular airs; Three Dances
from "Henry VIII."; German; selection
from "Martha"; Flotow; "Narcissus";
Nevin; "Cavalry Charge"; Luder; "Hearts
of Gold"; L'Alber.

The Sunday afternoon concert on Bos-
ton common will have the following pro-
gram: "Queen of Sheba," march, Gounod;
overture to "Zampa"; Herold; waltz, "Es-
paña"; Waldteufel; selection from "God-
dess of Liberty"; Howard; xylophone
solo, by Mr. Snow, "Narcissus"; Nevin;
three dances from "Henry VIII."; Ger-
man; "Traumeri"; Schubert; overture to
"Martha"; Flotow.

At Pine bank, Jamaica pond, on Sun-
day afternoon the Ernest S. Williams
band will play the following: March,
"Flag of Victory"; Von Blon; overture,
"Raymond"; Thomas; sextet from
"Lucia"; Donizetti, Messrs. Bailey, Wil-
liams, Bass, Spring, Ripley, Kingman;
fantasia of southern songs, Langey;
intermezzo from "Tales from Hoffmann";
Offenbach; operatic melange, "Creme de
la Creme"; Tobani; cornet solo, "The
Crystal Cascade"; Williams, E. S. Wil-
liams; reminiscences of Verdi, Godfrey;
characteristic, "The Mill in the Forest";
Ellenberg; grand potpourri, "Albion";
Baetens; "The Star Spangled Banner";
Key.

Wood Island park, Sunday, 3:30 p. m.
First Coast Artillery Corps band, W. A.
Cushing, leader, "La Reine de Saba";
Go-mol; overture, "Fest"; Leutner;
"Amina"; Lincke; selection from "Mlle.
Modiste"; Herbert; "The Nightingale"
(piccolo solo); Mayour, H. J. Harding;
concert waltz, "Artist's Life"; Strauss;
intermezzo from "Cavalleria Rusticana";
Mascani; selection from "The Three
Twins"; Hoschna; descriptive, "A Hunt-
ing Scene"; Bucalossi; selection from
"The Chocolate Soldier"; Strauss; march,
"Colonel Lombard"; Hosmer.

In Marine park, Sunday at 3:30 p. m.
the Ninth Regiment band, W. A. Bar-
rington-Sargent, leader, will play:
March "Aida"; Verdi; overture, "Or-
pheus"; Offenbach; (a) Cavatine, Raff;
concert waltz, "The Merry Widow";
Lehar; waltz, "J'aimé mon Amour";
Caryll; descriptive, "Old Time Coach
Galop"; Crowe; finale, "Star Spangled
Banner."

BRITAIN'S QUEEN
TO TAKE FAN GIFT

LONDON—Sir Homewood Crawford,
the master of the Fanmakers Company,
has received a letter from the private
secretary of the Queen, stating that she
will be most pleased to accept the pre-
sent of the fan of entirely British manu-
facture, which the company desires to
make her for the forthcoming coronation
ceremony in Westminster Abbey.

MISS MULLE'S ENTERTAINMENT.

Miss Ida Mülle gives her program of
songs and stories for children and adults
this afternoon in the town hall at Man-
chester, Mass. The entertainment is ar-
ranged by Fraulien Maria Wolters, and
is under the patronage of prominent
summer residents. Miss Mülle will re-
peat the entertainment next Tuesday
afternoon at the New Ocean House,
Swampscott, and on Wednesday after-
noon at the Tudor hotel, Nahant.

CHARGE OBSTRUCTING JUSTICE.

CHICAGO—General Counsel A. R.
Urion and the other officers of Armour &
Co., cited before Federal Judge Landis to
answer to a charge of obstructing justice,
appeared Friday and were excused until
Monday morning, when their conduct in
refusing evidence to the grand jury will
be inquired into. The jury took a recess
until Tuesday.

DEPARTMENT HEADS
HAVE RIGHT TO GIVE
LEAVE OF ABSENCE

Heads of departments should take the
responsibility of granting the city em-
ployees absence from work with pay,
rather than the mayor and city council,
according to an opinion which has been
given by Assistant Corporation Counsel
McLaughlin on the legality of the order
passed by the city council giving city
employees who are members of the
Grand Army or the state militia time
off with pay for annual encampments
and conventions.

Mr. McLaughlin holds that under the
form of the orders passed by the city
council the men cannot be allowed pay
for the time away. In the first place
members of the city council are pro-
hibited by the new charter from partici-
pating in the employment of labor, and
secondly, while the city council and
mayor acting jointly may authorize a
vacation, the leave of absence requested
in the orders is not in his opinion a va-
cation.

Lastly, the orders passed by the city
council were a request upon the mayor
to direct the heads of departments to
grant without loss of pay time off, etc.
Mr. McLaughlin holds that the orders
should grant authority direct to the
heads of departments instead of being
in the form of a request upon the mayor
to direct, etc.

Mr. McLaughlin submitted with his
opinion a draft of an order which he
considered would be legal. This author-
izes the heads of departments direct and
makes the leave of absence coextensive
with their annual vacation.

There are about 400 G. A. R. men in
the employ of the city, of whom about
40 will attend the annual encampment
this year.

The trustees of the children's institu-
tions department have just received the
resignation of Superintendent Sumner D.
Seavey of the Suffolk school for boys
on Rainsford island. The trustees ac-
cepted the resignation and at once placed
Charles A. Rabethge, the athletic in-
structor, as acting superintendent.

The trustees would give no reason for
the resignation of the superintendent.
Mr. Seavey has been head of the institu-
tion on Rainsford island since 1899 and
received \$2000 a year.

RECORD FLIGHT
FOR THIS STATE

NEWBURYPORT, Mass. — Summer
residents on Plum island Friday night
witnessed a record trip through the air
by William F. Hilliard, who flew farther
and at a greater speed than in any of
the many trials that have been held here.
In all he covered over eight miles in
his Burgess biplane, and during the first
part of his flight covered 2½ miles in
2m. 50s., landing on the front lawn of
one of the cottages at Hale's Cove, much
to the surprise of the inmates.

The failure of his engine to work
properly necessitated the landing. After
returning to the aviation station Mr.
Hilliard made another exhibition flight of
three miles for the benefit of the big
crowd of cottagers who had gathered.

BIG WEST CANADA
WHEAT ESTIMATE

OTTAWA, Ont. — "From what I have
seen since I wired 10 days ago I am
convinced that my estimate of a yield of
100,000,000 bushels of wheat for the
three provinces will be found a fair one."
Thus telegraphs William G. White, im-
migration inspector, who has been on a tour
of the Manitoba, Saskatchewan and Alberta
wheat fields, especially to note the condi-
tion of the crops and the progress of
settlement.

AWAITS CRIPPEN CUSTODIAN.

FATHER POINT, Que. — Inspector
Dew of Scotland Yard, who arrested
Dr. Crippen and Ethel Levee on their
arrival here, is waiting at Rimouski for
the arrival of the steamer Manitoba,
which is due in Quebec late tonight or
tomorrow, and which brings Detective
Sergeant Mitchell, sent to take Crippen
and Miss Levee back to England.

FLIGHT WITH TWO PASSENGERS.

NEW YORK—Charles F. Willard, a
Curtiss pupil, at Mineola, L. I., Friday
made one of the few aeroplane flights in
this country with two passengers aboard.
He took up his brother, H. H. Willard,
and J. C. Mars, and, attaining a height
of 20 feet, sailed successfully for half a
mile.

Handsome New Automobile Building in Boston

HEADQUARTERS PEERLESS MOTOR CAR COMPANY OF NEW ENGLAND.

Building is six stories in height and is of most modern construction and devoted entirely to business of that company.

One of the handsomest buildings lately
erected in Boston and which was fin-
ished for occupancy this week is that of
the Peerless Motor Company of New Eng-
land, situated at 660 Beacon street, at
the junction of Brookline and Common-
wealth avenues, and most accessible by
several lines of cars which pass at fre-
quent intervals.

The structure is six stories high, abso-
lutely fireproof, of red brick and Indiana
limestone, on which are handsome carv-
ings, the whole artistic effect being
greatly enhanced by an imposing metal
bronze marquee, which extends over the
sidewalk.

The first floor is the salesroom, 90 feet
by 45 feet, with ample room to accom-
modate seven cars in full equipment
wainscotted to a height of eight feet in
dark rich mahogany, the furniture
throughout being of mahogany as well
and upholstered in a delicate shade of

green leather, while the floor is tiled in
terrazzo mosaic, in which the green color-
scheme is artistically blended, giving the
whole a most beautiful and harmonious
effect. Three huge show windows afford
ample light and give a fine view of cars
displayed. A most ingenious scheme for
window lighting has been introduced,
comprising some 40 electric lights with
reflectors which are concealed below the
window sill, while 16 handsome chandel-
liers in bronze-green afford the light
overhead.

Back of the salesroom and separated
by imposing mahogany doors of gener-
ous proportions is the Peerless private
garage. This room is 90x65 ft., equipped
with every modern convenience, while
two powerful (electrically operated) ele-
vators are used to carry cars to any
floor desired, there being as well a
small passenger elevator for use of em-
ployees and the carrying of parts, tools
and supplies.

The second floor may be reached from
the salesroom either by staircase or
elevator and here the general offices and
stockroom are located. Besides Manager
John L. Snow's private office which
overlooks Beacon street and which is
finished in handsome fumed oak, there
are appropriate quarters for the regular
office staff, superintendent, and a
chauffeurs' room, while in the rear is
the parts and accessories department,
covering a space of some 90x70 ft., every-
thing being systematically catalogued.

The smaller parts being kept in cabinets
whose compartments are numbered, en-
tailing only a matter of a few minutes
to procure immediate service.

The third and fourth floors are for
general overhauling and contain the
machine and tool departments, all ma-
chinery being driven by direct connecting
electric motors.

The fifth floor is the trimming depart-
ment, being thoroughly equipped for
making tops, slip covers, etc., and here
also is the tinmith and blacksmith de-
partment.

The sixth floor, having an area of 10,-
000 square feet, is to be used exclusively
for the painting and finishing of cars and
is equipped with every modern con-
venience for the highest class of work,
ample light being afforded by windows
on three sides and skylights overhead,
while a special room is devoted to the
varnishing of cars, each window of which
is constructed so as to be thoroughly
dust-proof.

Provision has been made for an en-
trance and exit of cars from a side street
30 feet wide, which is a private way
thereby obviating the necessity of cars
entering or leaving through the front of
the building. The entire building is
steam-heated, has the Sturtevant system
of ventilation, is supplied with telephone
and pneumatic tube service throughout,
and no pains have been spared to make
it the most up-to-date building of its
kind in existence.

CONSERVATION PLEA
IS FADDIST CRUSADE,
SAYS MR. BALLINGER

PORTLAND, Or. — Secretary of the In-
terior Richard A. Ballinger, who was the
guest of honor Friday at a noon-day
luncheon given by the Commercial Club,
addressed his hosts on the subject of con-
servatism.

"What is there about it that calls
for excitement, bitterness of spirit or
contention?" said Secretary Ballinger.
"Nothing. The explanation of popular
excitement is in the fact that many peo-
ple have been led to believe that con-
servatism holds the secret of our national
well being.

"The demagogue, the fanatic, the sen-
timentalist, the faddist are crusading un-
der the banner of conservatism mainly
because it is popular and holds the atten-
tion of the hour."

Secretary Ballinger said that extreme
conservation theories meant government
ownership and operation. He said they
proceeded on the theory that the states
were not to be trusted to take care of
their natural resources. He said that
because some of the states had been
wasteful or their officers corrupt, it did
not follow that no state could safely
manage its own affairs in this particu-
lar.

In view of the fact that the states
control and own water for development
it would seem, he said, that the most
feasible and practical method would be
to transfer these sites to the states un-
der proper limitations to prevent injuri-
ous monopoly.

Taking up the subject of Alaska coal
lands he called attention to the fact
that with 1200 square miles of known
coal area, containing an estimated
amount of 15,000,000,000 tons, some of
the very best quality, Alaska buys most
of her coal from British Columbia, while
the United States navy on the Pacific
obtains its coal from the Pocahontas
fields of West Virginia at a cost to the
government of \$7 a ton of which \$5 a
ton is represented by the freight charges.
If the mines of Alaska were in opera-
tion coal could be laid down at Portland
at from \$3 to \$4 a ton. He said Alaska
never had adequate laws to cover the
disposition of her public lands.

Secretary Ballinger declared he was
opposed to withholding any lands in
the public domain that are capable of
giving strength and permanent property
to the country in agriculture, commerce
or industry.

SIX MOTOR BOATS TO TAKE PART IN THE PRELIMINARY RACES

Three Fastest Will Be Selected to Defend International Trophy From the British Challengers.

WILL BEGIN MONDAY

NEW YORK—Six motor boats are expected to take part in the trial races to select three American defenders of the Harmsworth international trophy for motor boats, which will be run off Huntington, L. I., next Monday, Tuesday and Wednesday.

The yachts expected are the Dixie II, F. K. Burnham; the Restless, Thomas F. Cheselbrough; the Hurry, Charles Francis and M. M. Whitaker; the R. G. E., Harris Hammond; the Skimmer, H. H. Brantb. and a new boat owned by H. H. Melville, and August Heckscher. The Hurry and the Skimmer are hydroplanes and are reported to be exceedingly fast.

All five boats will race each day and the committee will arbitrarily select the three boats to defend the trophy. The elimination trials will be run over the international course off Huntington, and the trophy race in which three English boats will try to win back to England will be off Larchmont.

Commodore Melville of the Motor Boat Club of America arrived yesterday from England. A party of Englishmen, including Mackay Edgar, owner of the Maple Leaf III, one of the challengers, also came over on the same ship with Commodore Melville, who will act as host for Mr. Edgar and his friends during their stay in this country.

The Wolsley Saunders hydroplane, the Miranda IV, owned by the Duke of Westminster, and the Zingarella, owned by Daniel Hanbury, were shipped last Saturday on board the steamship Minnetonka and the Maple Leaf III, came with her owner. The three challengers are expected to exceed 30 knots an hour. The Miranda IV and the Zingarella are sister boats. Each is 26 feet over all and 6 feet beam.

A formal dinner is to be tendered the visiting yachtsmen by the Automobile Club next Friday at its clubhouse, and an informal dinner and theatrical performance will be given by the Larchmont Yacht Club the evening following the international race.

The trial races will begin at 2 o'clock each afternoon. H. R. Sutphen has been appointed acting fleet captain of the Motor Boat Club of America.

TOUR OF MYSTERY NEW MOTOR TRIP

Premier Automobilists of Indianapolis Hold Novel Outing, Which Proves a Most Successful Innovation.

INDIANAPOLIS, Ind.—Always looking for something new or novel in motor touring diversions, a new type of tour has been arranged by Premier automobilists of this city and vicinity, and is known as the "Tour of Mystery." Fifty premier motor cars and nearly 200 people assembled at the University park last week, and only two people in the entire party knew where the tourists were to go, and they would not tell. The only direction given was "follow the confetti," and this they did for 150 miles throughout the day.

One of the quietest sections of this country was selected by the pathfinders for their destination, a little village where the Dutch settlers still wear wooden shoes and where the outside world has no evident effect. This little place is called Batesville, and there are few people even in this vicinity who know of the interesting sights to be found there.

Before the cars left in the morning each passenger was given a card on which to guess the destination, the distance and the schedule time which was to be followed, and valuable prize of automobile accessories were awarded to those who came nearest to the correct answers. The confetti car was one of the Premiers which competed in the Glidden tour, and was driven by Charles L. Ballinger.

An important feature of the day was the picnic for each party had to take along their own lunch and a stop was made early on the return trip in a shady grove, for a real old fashioned picnic in a modern way. Ice cream coolers, chafing dishes and similar equipment were brought into requisition which never were thought of a few years ago when out-of-door lunches and drives were so popular. The start was made at 8 o'clock and it was just about 6 when the catavan returned.

A PAGE-DETROIT RECORD.

John De Q. Briggs of Cambridge recently drove his Paige-Detroit roadster from Pottstown, Pa., to Plymouth, Mass., in two days. Accompanied by Mrs. Briggs and a young daughter he covered the 466 miles in less than 20 hours, running time. Mr. Briggs is a small car enthusiast, and was very well pleased with the easy riding qualities of his Paige-Detroit roadster and its ability to average better than 20 miles an hour for two days over all kinds of good and bad going. The route followed by Mr. Briggs took him over some of the Pennsylvania mountains, and not a single adjustment was necessary on the car during the trip.

PREPARATIONS ARE NEARLY COMPLETED FOR BIG ELGIN RACE

Chicago Motor Club Expects Fast Time in Its "Western Vanderbilt" Automobile Contest This Month.

START RACING CAMP

CHICAGO—Work is progressing fast on the automobile course at Elgin, which will be the scene of the "Western Vanderbilt" auto race the twenty-sixth and twenty-seventh of the month. Officials of the Chicago Motor Club, under whose auspices the race will be held, have made their inspection of the course and feel certain that it will be one of the speediest road courses in the United States. It would not surprise the committee if a sustained speed of more than 60 miles an hour were made in the 300-mile contest, while some drivers should make the fastest lap at about 70 miles an hour.

There is still time for a lot of work on the course and the oiling, and everything will be ready for the trials a few days before the meet opens. The Highland avenue leg of the course is ready for racing now. The west leg, from McQueen to Ullina, has been converted into a safe and speedy boulevard that suits the drivers. This was not so good as the ordinary run of country roads when the club committee first inspected it. The south leg, Larkin avenue, still needs a lot of work.

Ray Harroun, the Marmon driver, who will pilot one of the five Marmon entrants, was the first of the big drivers to try out the road, going over the 8 miles and 2400 feet of racing surface in about 10 minutes. Joe Rawson, the other Marmon driver, will join the Marmon racing camp in a few days.

J. H. Palmer has closed negotiations for the Lozier team's headquarters out near the Marmon's camp. The Lozier entry in the Elgin national race will be driven by Ralph Mulford, the easterner, who, with Patschke, holds the 24-hour competition record. William Horrick, representing the Cole, has arranged for the training camp for his company. Driver Endicott will pilot the Cole Thirty.

AUTO LAMPS MUST BE LIGHTED.

FINAL AUTO RACES AT INDIANAPOLIS

Two Days' Program Has Been Arranged for Sept. 3 and 5, With Special Mile Time Prizes.

INDIANAPOLIS—Automobile drivers and racing cars are tuning up at the Indianapolis motor speedway preparatory to the races on Sept. 3 and 5, which will mark the close of the motor car season at the brick course, the last event being the national balloon meet on Sept. 17. Entries for the motor races are reaching the speedway management in such quantities as to indicate that it will be the most important series of events given here, and now that many of the drivers are familiar with the brick track, a familiarity gained at former meets, some sensational records are expected.

A number of the leading foreign drivers are expected to drive famous European machines in the September meet. The foreigners, coming from France, Germany, Italy and England, will participate in the eastern races later in the fall, and they have indicated a desire to reach America in time to enter the Indianapolis contests.

The program for the two days includes 20 races for which money prizes and trophies worth \$10,000 are offered. The speedway management is anxious to give its track first place as a mile record holder, and to induce the drivers to make an earnest effort to cut down the time on this course below the present point of 35.68, special inducements are offered for mile trials on Sept. 3. If a fraction is shaved off the present record, the driver who does it will receive \$200.

If the mark is lowered one second, he will receive \$300, and \$500 will be given for a reduction of two seconds. Free-for-all, handicaps, numerous classes for stock chassis and regular racing motors will be given, and among the long distance events are 100 and 200 mile races. Two of the choice prizes offered to drivers are the Speedway Helmet, worth \$50 a week to the winner, and the Remy Grand Brassard, worth \$75 a week, and among the trophies is the Remy, worth \$2500, which goes to the owner of the winning car. A number of gold and silver medals will also be awarded.

E. M. F. HAS LIBERAL POLICY.

The liberal policy which is carried out to the letter by the E. M. F. Company has won for it great success and the volume of business done has increased tremendously of late. A guarantee of one year is given the purchaser of a car which fact ought to prove most conclusively that the cars are just what is represented of them. Another feature which appeals forcibly to the intending purchaser of an E. M. F. car is the fact that this company has a corps of mechanical experts on the road all the time which covers a territory included in New England of New Hampshire, Vermont, Rhode Island, part of Connecticut and Massachusetts. These experts keep in touch with E. M. F. customers, see that they give cars the proper care and handle them as they should as well as see that the different agents treat their customers properly. It is needless to say that this interest displayed by the E. M. F. Company has made a great many friends for it, which can be readily judged by the success it has attained.

rand to Tokio for which arrangements were all made in advance, Baron Shohar as president of Sankyo & Co., operating in connection with their other interests the only automobile sales agency in Tokio, was designated to provide automobile transportation. As the owner of a Ford car he selected this make and it was used by Prince Tsaito throughout his stay.

John Wade has been appointed manager of the sales and advertising departments of the Grout Automobile Company, Orange, Mass.

In our article on the Haynes automobile last week, the Hudson-Coby Company, New England agents, were given as located at 121 Nassau avenue. This should have been 121 Massachusetts avenue.

The 1911 Palmer & Singer Six-forty won its spurs in the Cleveland News reliability run of 210 miles, coming through with a perfect score. The roads were exceedingly bad and all the cars suffered from tire trouble. The P. & S. ran with sealed hood for 24 hours including an aggregate of three hours' idleness in the hot sun while tires were being renewed. The thick mud delayed tire changes on all cars.

A 4000-mile automobile tour, without extra equipment, is being undertaken by a party of four which started from Winnipeg, Can. The party consists of H. E. Corey, M. MacKenzie, R. Newton and W. Dunlap, and they are making the trip in a 1909 Franklin car. The first nine running days of their tour carried them 1350 miles into Syracuse, N. Y., where they stopped to visit the automobile factory of the H. H. Franklin Co.

The selection of the Selden car for pilot of the Munsey historic tour seems rather appropriate in that the tour covers country in which American history was made, and the car itself is made and bears the name of the man who has made pages of history in the book of progressive locomotion. George B. Selden. The car is the result of years of study.

32 Boston Physicians Drive Hudson Roadsters

Thirty-two Boston Physicians drive these cars, not as the result of any agreement, but because one doctor who had bought a Hudson found it so well suited to his needs that he recommended it to other physicians, and the demand grew.

Salesmen, inspectors, real estate agents as well as doctors find this moderate-priced car ideal in its

NEXT CHICAGO MOTOR CAR EXHIBITION WILL BE FOR TWO WEEKS

Pleasure Vehicles Will Be Given Preference the First Seven Days and Commercial Vehicles the Last.

CHICAGO—This city's tenth annual automobile show which will be held next year under the auspices of the National Association of Automobile Manufacturers will cover a period of two weeks. The promoters made the announcement this week. The exhibits will be thrown open to the public on Jan. 28 and close Feb. 11.

The show will be divided into two periods, and for the first time the commercial vehicles and accessories will be featured as well as pleasure cars. The first week will open the afternoon of Jan. 28 and continue to Feb. 4, being exclusively for the pleasure cars. The usual method of allotting space in the Coliseum will be followed, giving members of the association first choice.

A day will intervene between the two sections to permit the necessary changes, this being on Feb. 5, and the day following the doors will be reopened with the commercial cars having the foreground and the pleasure makes which were not exhibited during the first week will be given second choice, while others will be allowed to exhibit, provided the space is not at a premium. Another departure at this show will be a distinct section for the showing of motorcycles and accessories.

Extending the show to two weeks will give almost every manufacturer a chance to get in with an exhibit. The drawing for space will be entirely distinct in that no concern will be permitted to draw space and occupy it for the entire two weeks, the first with pleasure and the second with commercial trucks. This ruling will not hold good with the accessory makers, who will make their own allotment and can hold space for either one or two weeks. Present indications point to the fact that during the second week of the show the commercial cars will take up all the available space, but efforts will be made to provide for pleasure vehicles crowded out of the opening season, so that the entire trade may be properly represented.

A complete set of new diagrams is in course of preparation. The arrangement of the floor for the commercial exhibits will not be the same as that for pleasure vehicles, for the reason that the great size of some of the former must be necessarily taken into consideration.

Exhibits will be confined to the goods of manufacturers who have not taken part in or contracted to take part in any show not sanctioned by the National Association of Automobile Manufacturers, Inc., or in case of accessory makers by the Motor and Accessory Manufacturers.

Peerless Used Cars

Limousine and Landaulets
at next year's prices

WE have taken in exchange for 1911 models a number of used cars which have been thoroughly overhauled and painted.

These cars are equipped with Limousine and Landaulet bodies, which are in as good condition as when new and are ready for immediate delivery.

We are exhibiting in our new salesroom this week one 1909 model equipped with Landaulet body—painted Brewster green and upholstered in Brewster green broadcloth.

Other cars may be seen upon request.

Notes of Interest to the Automobilists

J. Frank Galvin, the automobile driver and racing cyclist, who recently returned from a trip to France and Germany, does not believe that the aeroplane is going to put automobile racing in the shade in this country as it has in France. While has abroad he watched aviators practising at Rheims and other places, but did not become very enthusiastic over aeroplanes. He began driving automobiles about 11 years ago and intends to become a racing driver. He is considering a number of offers to drive cars in some of the track races and hill climbing events scheduled for the next couple of months.

The United States was well represented at the second international road congress, which convened in Brussels last week, held over into this week. The only representative from any recognized automobile organization in the United States is Joseph W. Jones of the Touring Club of America, New York city. Mr. Jones sailed for Europe over a month ago with his Peerless car to make a personal study of road conditions in the British Isles and on the continent, and recently finished a tour of several thousand miles.

The new entry blanks for the Catskill

reliability contest and hill climb have been issued after having been approved by E. L. Ferguson, manager of the Motor Contest Association. The local committee at Catskill, N. Y., is very enthusiastic over the change in the dates from July to Sept. 10, 11 and 12. The road committee in the mountains is making every effort to have the one mile road on Kaaterskill Clove Mountain, which is to be used for the hill climb on Monday, Sept. 12, put into good condition.

The road supervisors of Lancaster county, Pa., are to have an opportunity to compete for prizes aggregating \$1000, according to plans being made by James Rose and a number of automobilists of the country. The general plan of the contest is to be based upon a division of the Lancaster county townships into groups of three, each group being termed a section. The roads included in the contest will be divided into five grades. Each grade will receive respectively a certain number of points per mile. Two demerits will be given for each water breaker encountered on any road. Four demerits will be given for each mile of road made by the old fashioned once a year road scraper

method, in which everything is pulled out of the side gulches, including sticks, stones, sod and loose earth, and dumped into the middle of the road and left there unrolled.

Announcement has been made by the United States Motor Company of the appointment of Montgomery Hallowell as general advertising manager of the big \$30,000,000 selling organization. Mr. Hallowell will make his headquarters at the general offices of the company in New York and will assume his new duties on Aug. 15.

According to F. B. Killian, expert of the Vacuum Oil Company, a cubic inch of oil will lubricate over 1000 square inches of metallic surface, or approximately 16 piston-stroke feet of a 4-inch by 5-inch automobile motor. A motor of this size, geared at a ratio of 3 to 1, would travel approximately 340 miles to the gallon of oil.

Word has just been received at the Ford Detroit factory of special honor conferred upon a Ford car and its owner by the Emperor of China. It seems that when Prince Tsaito was sent by the Emperor of China on a diplomatic ex-

THE HOUSEHOLD

ON THE WANE Duties and Liveries of Royal Maids

soft silk or a drape of narrow plaited velvet or Teta lends a neat finish to the brim edge. In the afternoon the regulation black dress with cap and apron is worn, and the cap and apron must not be worn more than once.

In materials velvet (and this is true of suits well as hats) is the most promising fabric, although for the finer trade hatters' plush, formerly almost exclusively for men's hats, is regaining the popularity of last season. Silk hats, though never extremely popular, are shown in the early importations, while beavers do not appear to find place in this year's array. Beaver strips, however, often are seen in trimming.

Persian silks are much used for facings as well as for whole hats and trimmings. They come in various designs and match well the somber velvets that so often go to make up the bodies of hats.

Colors have a wide range up to date, but are largely matters of surmise, as circumstances of the most trivial nature are likely to make a decided change in shade styles. Take, as an example, the season just passed, when the advent of "Chanticleer" introduced a bright red fashion that covered everything from hosiery to hats, and certainly red is the most unreasonable of colors for summer wear. At present, black and navy blues, with champagne and brown appear most frequently, and if brown finishes the season without being displaced it will prove decidedly acceptable, as this pretty shade has been many seasons coming into its own.

The popular fur turban of last season no doubt will have its run this coming winter, but it is always a late style and does not interfere with the general trade.

Rubbing Needed to Keep Tables Polished

IN this era of bare tables for breakfast, lunch and supper, we modern housekeepers are as much interested in keeping table tops in a high state of polish as were our ancestors.

The one secret is "elbow grease." You cannot polish without good hard rubbing.

The Virginians, noted for their polished mahogany, used to wipe it off with cold water. This must be done sparingly with modern varnish, but the housewife uses it daily with good results.

After each meal a soft cloth is wrung out of cold water and the table top is gone over to remove any grease spots. This is done quickly, at the varnish may not be injured.

The table is then rubbed dry with a soft cloth of silk handkerchief and polished hard with amon or flannel. Rub until you cannot see a line or blur.

This done twice a day will cause your table to look like new; will even wear out old scratches, if the wood has not been seared.

About once a month use a good furniture polish, following directions closely. The old-fashioned housekeepers wax their mahogany tables.

When a table is too greasy to yield to the damp cloth, moisten it—not soak it—in a little water and gasoline mixed. Wipe off carefully and rub to a polish in usual way.—New Orleans Picune.

Perfumed Beds

There is nothing very novel, the uninitiated may think, about perfumed beds, for every one knows how good housewives have for a generation prided themselves on their napsery and that one of their special little fads was to place lavender bags among the sheets in order to add a little to the luxury of the sleeper. But when perfumed beds are talked of nowadays something is contemplated which was unknown to the old-time housewife.

Now between the mattress and the sheet there is laid a scented pad—a thin quilted affair, which has one layer of cotton freely sprinkled with the favorite sachet powder—which causes the whole bed to smell deliciously of roses, violets, or whatever may be the chosen perfume.

Pillows are also opened and sachet powder is sprinkled among the feathers. Orris makes a perfume resembling violets, and there are some people who like that of pine, which is easily obtained by gathering the needles from the trees in summer and laying them flat in little sacks, which are inserted in both pads and pillows.

Plant-Watering Device

House plants can be kept well watered during week's absence of the housekeeper, according to an ingenious Scotch device.

Set a bowl of water well above the level of the plant to be watered by means of a box or a tin of glass.

Twist several scraps of common darning wool together or braid them to form a long wick, and sink them in water.

If one end of the wick reaches to the bottom of the bowl, and the other hangs over the plants, a ready drip will continue until the bowl is emptied.

Your Friends

Don't expect your friend to like all your other friends. On the other hand, don't criticize the friend of your friend. Browning has told us:

Thank God, the meanest of His creatures,
Has two soul sides, one to face the world with—
One to show a woman when he loves her.

Our own Oliver Wendell Holmes was even more thorough, for he gave each of his six personalities, which may well be that we see one Mary Smith while our friend sees quite another, and that our friend sees perfection in Anna Jones quite hidden from our view.—Harper's Bazar.

Needles Threaded

On the bureau should be kept a pin cushion with several needles threaded with black and white thread, and several sizes of buttons and a small pair of scissors. In case you should be in a hurry anytime and a button should come off your dress it can be quickly sewed on.

THE HOUSEKEEPER

Hints That May Help.

GIRL'S DRESS.

The dress that gives a slender effect to the figure is one greatly liked by the younger girls as well as by the older folk and this model is a dainty and charming. It can be trimmed with embroidery worked on to the material, as in this instance, or with banding as liked, or the space between the box plaits can be left plain if a simpler effect is wanted, but just as illustrated the dress is as attractive as an attractive one. It is made of blue linen and the embroidery is worked with mercerized white thread. The square Dutch neck is a favorite one for the summer but the dress can be made high if preferred and with long plain sleeves so that it can be made available for the cooler days as well as for the warmer ones. All materials that can be plaited successfully can be utilized, and a great many girls are wearing batiste and lawn made in such ways.

6087. Girl's Dress, 10, 12 and 14 years.

The dress consists of the blouse and skirt, which are joined by the belt. The blouse is laid in three box plaits at the front and in tucks over the shoulders and in the back. The skirt is cut in three sections and the front portion is laid in the box plaits which meet those of the blouse, giving continuous lines, while at sides and back it is laid in backward-turning plaits. The trimming when used is applied between the box plaits. The elbow sleeves are gathered into cuffs but the long sleeves are made with upper and under portions and are under-faced at the wrists.

The quantity of material required for the medium size (12 years) is 8 yards 24, 5 yards 32 or 4 1/2 yards 44 inches wide with 5 1/4 yards of insertion. The pattern 6087 is cut in sizes for girls of 10, 12 and 14 years of age and can be had at any May Mantion agency or will be sent by mail. Address, 132 East Twenty-third street, New York, or Masonic Temple, Chicago.

SOME TRIED RECIPES.

SWEETBREADS LARDERED AND BAKED.

When the sweetbreads have been cleaned, draw through each one four very thin pieces of pork (about the size of a match). Drop them into cold water for five or ten minutes, then into hot water, and boil 20 minutes. Take out and spread with butter, dredge with salt, pepper and flour, and bake 20 minutes in a quick oven, says Farm, Stock and Home. Serve with green peas, well drained, seasoned with salt and butter, and heaped in the center of the dish. Lay the sweetbreads around them and pour a cream sauce around the edge of the dish. Garnish with parsley. One pint of cream sauce is sufficient for eight or ten sweetbreads.

HAM PUFFS.

Ham puffs are a change that will be relished by many. Stir a pint of flour into a pint of boiling water; beat it well. Take it from the fire and beat in four eggs, one at a time; add the ham, about three ounces of it, finely chopped, two-thirds of a teaspoonful of curry powder, a pinch of cayenne pepper, a little salt,

unless the ham is salt enough without it. Into a pan of deep lard drop this batter, a small dessert spoonful at a time, fry a golden brown and decorate with parsley.

RICE BALLS.

Cook a cup of rice in three cups of milk until the grains are reduced to a soft pulp. Stir in the yolks of three eggs and boil, stirring constantly, for five minutes. Remove from the fire and season to taste. When cold flour the hands and form the mixture into balls. Roll these balls in flour and set aside until stiff. Melt a little butter in a soup plate and roll each ball in this before arranging them all side by side in a pudding dish. Pour around them a brown sauce, made by thickening and seasoning a cup of beef stock. Set the pudding dish in the oven until balls are heated through.

TO COOK ASPARAGUS.

Asparagus should be boiled gently in well salted water, standing if possible to save the heads. The shoots tied together in one bunch should be put into the pot so that the water will reach about halfway up. When they have boiled some 10 or 15 minutes they should be laid on their side so that the water covers all when cooked. Served with white sauce or with nothing but butter if the full asparagus taste is to be brought out, this makes one of the real delicacies of the table.

CORN FRITTERS.

To one pint of grated corn add one teaspoonful of salt, one fourth of a teaspoonful of pepper, one tablespoonful of sugar, two eggs, five tablespoonfuls of cream and one teaspoonful of cracker crumbs. Stir in one teaspoonful of baking powder and drop from a teaspoon into boiling fat, brown, drain on unglazed paper and serve at once.

APPLE WHIP.

Place a pint of sweetened apple sauce in the ice chest until very cold. Beat the whites of two eggs until stiff. Beat the stiffened whites whip the apple sauce by the spoonful until all is used up. Fill glasses with the mixture and place a spoonful of sweetened whipped cream on top of each glass.

Odorless Cooking

Before beginning to fry onions or boil cabbage, see that the top of the kitchen window is open and also draw back the grating above the stove; even if this is only open a few inches the smell from whatever is being cooked will have a means of escape.

PACK YOUR TRUNK IN CHAIRS

To pack a trunk easily place it on two chairs facing each other or on a low table. This precaution will enable the packer to work more quickly than if she had to bend and stoop a hundred times.

You will find you can get more into your trunk and it will pack more solidly and thus carry better if you fold everything the full length of the trunk, folding, too, as little as possible in width—that is, a skirt folded only the little necessary at one end and spread over the entire width of the trunk, folding along one side only.

Underclothing should be packed in this same way. Pin the lingerie waists up carefully,

much as they are when you buy them, or as they sometimes come from the laundry.

You can pack and repack them a number of times, as when making short stops at various places, and they will be none the worse for it, says the Philadelphia Times.

You will avoid innumerable creases and counter-creases and the waists will look almost as fresh as if just from the laundry. Whether buttoned in front or back, pin or button them together at top and bottom. Then fold the sleeves across the back, creasing the front of the waist in a straight line just in front of each shoulder.

Pin the tops of the sleeves together in the middle of the back. Fold the lower part of each sleeve back and pin them together and through the back of the waist.

Then, lastly, fold the bottom of the waist up an inch or so, from front to back. Thus pinned your waist will have but one set of creases, no matter how many times removed from the trunk, and if creased in the proper places will not make your waist look all out of shape and wrinkled.

Washing Crepe de Chine

Washing crepe de chine is no more difficult than to wash a frock of colored muslin. If tepid water and good soap are used with care it will come from the laundry as triumphantly as a piece of white linen. Do not let it lie in the water longer than is absolutely necessary, rinse thoroughly, and when half dry press on the wrong side with a medium hot iron. If of a delicate color the garment must be dried in a shady place and must be placed in a sunless place after pressing.

Caps for the Maid

Four pretty caps for the maid may be made from a 5-cent box of tourists' rushing. Four or five rows of the rushing sewed upon an oblong foundation make as neat and dressy a little band as one could desire. It takes about two minutes to make one. They will not wash, but will stay white and fresh a long time, and the cost is so extremely slight that it hardly matters.

How to Brush Walls

You will get better results if you put a full double-plaited ruffle on the bottom of the bag which you slip over the broom with which you brush the walls, or over the broom with which you sweep polished floors.

Morris & Butler

97 Summer Street

August Furniture Sale

Nearly every piece on our five great floors reduced 1/4 to 1/2

Genuine leather Turkish Rocker. Harrington Spring. Marked from \$39 to \$22.75

2-in. posts, square top rods, Satin Finish. Best English lacquer. \$30 to \$19.75

Solid Mahogany 6 foot Extension Table. 45-in. top, carved feet, \$37 to \$25

Having taken the agency for the famous Karpen Guaranteed Upholstered Furniture, we have reduced every piece of our present stock of upholstered furniture to cost or less. This includes a large number of Karpen samples and discontinued patterns. Radical changes have been made in our Chamber Furniture lines and every piece is offered at Factory Prices.

Splendid Values in Brass Beds and Mattresses—Our Own Make

Please remember that these are not damaged goods or cheap imitations made for sales. They come from the best makers and we stand back of every piece.

We hold only two sales a year and they are worth while. Goods stored free until you need them.

Chafing Dish Pantry

A useful piece of furniture for the small apartment is the chafing dish pantry, which surely will be appreciated by those with limited space.

It is a square in shape, about three feet high, with a cupboard arrangement beneath, where all the belongings needed for a chafing dish supper are to be kept.

Salt and pepper shakers, mustard pot, sauce bottle, etc., are all in cut glass. The chafing dish itself may sit in state on top to be tucked away below, while the top is white porcelain that makes the useful waiter, and is a preventive of anything like danger of a conflagration from overflowing alcohol.

These may be had in the heavy mission style or in weathered oak.

Outside the Rug

Various methods are adopted where the floor left bare by the rug is not in good condition. A width of some carpet of plain color and good quality may be tacked down, and the color must not be obtrusive. There are cotton and wool fillings, plain tapestries and other kinds that may be used. In some rooms, matting may be used to cover the bareness. Denim in solid dark colors is sometimes used, as it is very inexpensive. A good coating of paint, followed by two or three coats of varnish will answer.

JEWELERS AND SILVERSMITHS

A Notable Display of Dutch Silver

SEMI-PRECIOUS STONES.
BIRTH MONTH JEWELRY—SPECIAL DESIGNS TO ORDER.

416 Boylston Street Boston, Mass.

Little Bits on Styles

DEEP hems, with design of silk-colored cords, are put upon many kinds of gowns. All the blues are popular up to the faintest Marie-Antoinette tint. The new serpentine crepe is especially suited to kimono and house gowns. Crepon is being much used for houses, especially for those that are little trimmed. Supple poplins, fine serges and tissues of open meshes are used for tailored suits. Charming to a degree are the new automobile bonnets of plain satin in dull blue, red, green, veiled with mousseline of same shade in blurred chine floral patterns.

HANDY CHEST

The housekeeper who has much clothing to put away will find it a wise investment to have made a wooden chest with a hinged, tight-fitting lid that can be fastened by a lock and key. This may be of pine, painted inside and out with enamel paint in dull gray or any serviceable color, or can be of cedar. This size should be decided by the space in the storeroom, but should be as large and deep as possible. A light tray may be added, up toward the top, in which lighter and more delicate articles may be stored. In this box can go all the family clothes, wooden hangings and bed coverings which otherwise would have to be laboriously tied up in bundles. See that each article is carefully sunned, aired and beaten before being put in the box. Put the heaviest articles smoothly at the bottom and between each layer spread fresh newspapers.

Kitchen Walls

The best way to keep the walls of the kitchen white and glossy is to wash their painted surface with bran water instead of soap. Boil one pint of bran in a gallon of water for an hour. The paint will look better and keep clean longer when washed with this than when cleaned with soap and water.

Helps in the Home

MILK should not be covered tightly. Use muslin or cheese-cloth. Water should never be used to clean gilt frames. Use a dry, soft cloth. Every cellar should be thoroughly whitewashed at least once a year. The vacuum cleaner not only does cleaning more easily but much better than the old methods, and will save its original cost in sparing wear and tear in the home. To remove rust, if hooks and eyes have rusted white goods, put the garment into water in which has been dissolved a little cream of tartar and boil for a few minutes.

Parowax

Parowax is a wonderful household help in the laundry or washroom

Parowax saves time and labor in washing and lengthens the life of the clothes. It loosens every atom of dirt in the fabric and makes hard, destructive rubbing unnecessary. It is especially good for washing the finer clothes. You simply put one-half teacup of shaved Parowax and the usual quantity of shaved soap into the boiling hot water in the boiler. Afterward, rinse the clothes thoroughly in warm water and they will come out clean and white as when new. Parowax leaves no odor in the clothes.

To protect the user, the trade-mark "Parowax" has been given to the grade of Pure Refined Paraffine sold by this Company for years. This absolutely pure paraffine has been used all these years for sealing jellies, etc., and for washing and ironing.

Directions on package. Dealers everywhere sell Parowax.

Standard Oil Company

THE CHILDREN'S PAGE

THE BUSYVILLE BEES

Drawings by FLOYD TRIGGS
Rhymes by ... M. L. BAUM

Says Busy to Spider, "Come look!
Does Buzz think he's writing a book?"
But Spider said, "Watch! He is trying to catch
A moth with a baited pot-hook."

Said Buzz, "Now I want a new word,
The grandest that ever occurred;
There's Bookworm residin' with more words inside him
Than any professor e'er heard."

Said Worm, "Here's a word up to date,
The sweetest that ever I 8;
'Tis half a yard long and both gorgeous and strong,
For moths a most excellent bait."

(Copyright, 1910, by Alexander Dodds. All rights reserved.)

So Buzz wrote it in like a wink,
It means, "You're a beauty," I think;
Hop, coming to peek, said "The word is u-nique,
But I'd use molasses for ink."

And when it was copied out fair
Came Moth, with her nose in the air,
(In stripes like a Sioux, Yellow Jacket came too)
And passed as if Buzz wasn't there.

So homeward they helped him to totter,
A-drying his tears on a blotter,
In vain was the screeed, for the moth could not read!—
I'm glad Yellow Jacket has got her.

KATE AND JOE

DO you know a nice girl named Kate,
who lives uptown in New York? I
do. And I know her brother Joe. Every
summer Kate and Joe leave the city and
go to visit their aunt, who lives in a big
house in the country. And on pleasant
days their aunt lets them go into the

PICTURE PUZZLE

What tree?

ANSWER TO YESTERDAY'S PICTURE
PUZZLE.

Frank

village nearby to get the letters at the
postoffice.

They start early and walk through
the fields and pretty lanes. Joe is not as
big as Kate, but he tells Kate that he is
a boy anyway, and he can take good
care of her. So, sometimes, when they
start down the lane, she takes his arm
just as if he were a big man, and then
Joe feels very proud.

One day, when Kate and Joe were go-
ing to the village, they saw a dog who
was barking at a very little girl. Joe
came on just in time to say, in a very
loud voice, "Stop, sir!" and the dog
crawled away.

Next they saw another dog, and what
do you think he was doing? Jumping
after a butterfly! But the butterfly did
not care one bit. He flew around and
around the dog, just keeping out of his
reach, until the dog was tired out.

"Joe" said Kate, who thought she
would teach her brother something, "that
butterfly will turn to a worm some day."
"Pooh," said Joe, "just as if I didn't
know that. Now, see me catch him in
my hat!"

But Joe didn't catch him at all. For
the butterfly flew away, and left Joe
sprawling on the ground. The bright
wings shook as if the butterfly were
laughing at Kate and Joe. They made a
very funny mistake when they thought
the butterfly would turn to a worm.
The worms change, but not the butter-

TWO ARITHMETICS.

I know a girl who multiplies
Her sorrows by dividing.
Whatever cause she has for sighs
She always is confiding.

And so she adds to others' woe
And from their joy subtracts,
A strange arithmetic, I know,
But these, my dear, are facts.

I know a girl who multiplies
Her joys by cancellations.
She draws the line through tears and
sighs
Of all denominations.

Dividing joys, she multiplies
Her friends and sunny hours.

Now tell me, which arithmetic
Shall we adopt for ours?
—In Comrade.

flies. First the worm slowly hides him-
self away in a soft covering, which he
makes for himself, until it looks like a
little bundle. Then in time the bundle
bursts open and out comes a butterfly.

When Joe picked himself up that day
we rubbed his knees and what did he
see but another dog. It was a great pet,
and belonged to a little girl whom Joe
and Kate did not know. It was white and
small and its tail curled naturally. Joe
said, "The dog would not leave the little
girl at all, and barked if Joe or Kate
came near. But the little girl smiled
at them sweetly and Kate said: "What a
pretty pair of pets they are!"

"These must be dog-days," said Joe,
as they walked on, and Kate said she
thought so, too.—St. Nicholas.

THE RUNAWAYS.

I found a little brook one day,—
That baby brook had run away;
'Twas just as wide as my two hands;
It skipped along o'er yellow sands.
And, oh, 'twas full of fun and play.
The little brook that ran away.

The baby clovers bent to look
And see their faces in my brook;
Now some wore bonnets, red, I think,
And some, white bonnets, tipped with
pink
Their cloaks were green as green could
be.
They nodded slow and grave at me.

A birdie came with yellow bill,
He dipped his head and drank his fill;
Then winked at me with shining eye,
Then splashed the crystal drops on high.
He smoothed his feathers one by one
Until they glistened in the sun.

I saw a grave old turtle pass
With crawling steps across the grass;
A crow cawed from the pine trees high,
A hawk was circling in the sky.
And, sunning on some mossy logs,
I counted seven green-coated frogs.

The brook and I—we sang a song,
The summer hours were none too long;
The sun crept westward through the
sky,—
I said, "Dear little brook, good-bye!"
Then thought, "Oh, what will mother
say!"

You see—I, too, had run away!
—Kate Louise Brown.

CHICKY.

I found a little chicken once,
I thought he was asleep,
But as I stooped to pick him up
He cried a little "peep."

"Poor little chick, I wonder where
The mother-hen can be!"
Then chickie opened wide his eyes
As though he'd like to see.

I brought the chickie home with me,
Diana cried: "My dear!
I am so glad you thought to bring
This darling chickie here."

There close beside the kitchen stove
Lay Pussy for a nap,
And on her back she quickly felt
The queerest little tap.

"A funny sight!" Diana said—
The chick a roost had found;
For right on Pussy's back he leapt,
A purr, the only sound.

—Helen Elizabeth Coolidge.

STRANGE BIRD.

My two little nieces had a bird given
to them and were very anxious to see
it bathe. On seeing it get into the water
for the first time the three-year-old child
exclaimed: "Why, I declare! if it isn't
getting right in the water with all its
feathers on!"—The Delineator.

JUST LEARNING.

Mother (speaking of his playmate to
her own boy just learning to whistle)—
Can Harold whistle?
Four-Year-Old—Whistle? No; he can
only make the hole.—Harper's Weekly.

MONITOR BOOK OF GAMES

GRAND MUFTI.

ONE player stands on a stool
in the midst of her play-
fellow, representing in her own per-
son that mysterious grandee, the
Grand Mufti.

She makes any motion which she
pleases, such as lifting her arms,
extending her hand, signing, put-
ting her hand to her head, etc.;
in fact any kind of absurd gesture,
saying at the same time, "Thus
does the Grand Mufti!" or "So
does the Grand Mufti!" Now,
these two words, "thus" and "so,"
make the game; for when she
says, "Thus does," etc., every one
must make just the same gesture,
or do the same thing; but when

she says, "So does the Grand
Mufti," no one must imitate her;
if any player does, she must pay a
forfeit.

It requires great attention and
quickness not to get confused by
the game as it quickens, and thus
to make mistakes.

HUNT THE SQUIRREL.

A circle is formed. One runs
around the outside, tags one on
the back and continues running.
The one touched turns and runs the
other way. When the two meet
they must stop and bow three
times, and, continuing running,
each in his own direction, see who
can first reach the starting point.

The Monitor prints one or two games each Saturday. Cut out and paste in blank
book and you will have a good collection.

CANCELING UNKIND WORDS.

Some of the older boys and girls have
doubtless studied cancellation in school.
But there is another kind of cancellation
that can be used by boys and girls of all
ages. For example, two boys were
speaking of another boy:
"He is so slow in games," said one,
"Yes," replied the other, "but he al-
ways plays fair."

"He is so stupid at school," said the
first boy.

"But he always studies hard," an-
swered the second.

Thus, you see, every unkind word
spoken by the first boy was canceled by
a kind word from the second. Suppose
that the next time we hear an unkind
word we try to cancel it by putting a
kind one in its place.—Apples of Gold.

THE CHILDREN'S PAGE

TRIP AROUND THE WORLD WESTWARD FROM BOSTON.—XXI.

"OUT FOR A DRIVE."
An Egyptian family on a two-wheeled cart.

FROM Alexandria to Cairo is a journey of 129 miles by rail, which we make in three and one-half hours. The level, well-tilled lands, producing cotton, sugar and alfalfa, the river and canals, with their boats carrying triangular sails, the villages of mud houses, the long trains of heavily-laden camels, the date and coconut palms, the men tending the well-sweeps by which they lift the water from the Nile to new elevations, and the men, women and children working on the farms, present pictures along the way of great interest.

The city of Cairo covers an area of three square miles and considerably exceeds the limits of the old walls. Although in recent years spacious boulevards, palatial hotels and other European innovations have modernized one portion of Cairo, it still remains in its medieval quarter the city of Aladdin and the "Arabian Nights." The streets in this old part, which lies between the Gate of Victory and the citadel, are very narrow and irregular, often barely wide enough to admit of two camels passing abreast. The roadway is unpaved and very uneven. The houses are most picturesque, full of the sentiment of the east, their latticed windows displaying an almost endless variety of patterns and shapes.

The widest street of this portion of Cairo is the Muskeke, broad enough for carriages to pass each other freely. The crowd of people of every grade and position passing hither and thither, is bewildering—a moving mass of white turbans, red fezes, of blue, black, white and yellow garments, blending and mixing and moving like the colors of a chromatope, while the center has its

OLD-FASHIONED SCHOOLDAYS.

Edward Eggleston tells of his schooldays in Indiana when the spelling book—the old Webster, of course—had to be gone through five times before he was thought fit to begin to learn to read. His mother, 20 years before, had spelled it through nine times before she was allowed to begin with Lindley Murray's English reader. He tells also of a farmer's boy who rode up to the schoolmaster's house one cold morning, very early, and being admitted, told the schoolmaster that he had ridden many miles to ask him how to do a sum in arithmetic that puzzled him.

stamp-collecting interests.

EDITED BY J. RUSSELL REED,
39 Rindge Avenue, Cambridge, Mass.

INTRODUCTORY.

I WONDER how many boys and girls who read this page are stamp collectors. Probably there are some who never heard of this hobby, but those few do not realize what pleasure they are losing, for collecting stamps is one of the most instructive of pastimes. It is being introduced into some schools, as it helps the children in history and geography.

Stamp collecting dates back almost to when the first stamps were issued. Great Britain was the first country to issue postage stamps and the United States was second. People at first thought it was strange to collect these pieces of colored paper, but it was not long before they found what pleasure was to be derived from it and now philatelists are numbered by the thousand. The late King Edward was a collector, and King George, Queen Wilhelmina, the Kings of Italy and Spain, the Czar of Russia, the Emperor of Germany, in fact, nearly all European rulers own collections, some of them worth thousands of dollars. When King George was Prince of Wales he paid \$7500 for a single stamp, and it is said that he owns the most valuable collection known.

Now, I want all those who are collectors to take an interest in this department and those who don't collect I would advise to start at once. "How shall I begin?" I hear you say. Well, the easiest way to begin is to get all the stamps you can off of old letters your relatives or friends may have and get a blank book to mount them in. Be sure that you soak off any paper that may be stuck to the stamp before placing them in your book. You can buy cheap lots of stamps from any dealer and when you get four or five hundred buy a small

album and mount your stamps in that. If there are any questions you want to ask I will be glad to answer them to the best of my knowledge.

BIG CONVENTION IN DETROIT.

The American Philatelic Society, the largest stamp organization in the world, will hold its annual convention in Detroit, Mich., the middle week in August. Each year this society holds its convention in a different city, where such members as are able can come and meet each other to have a good time and participate in the society's business. Members from all parts of the country attend these conventions, and dinners, picnics, theater parties, automobile and boat trips are enjoyed. Many bring their collections with them to show their friends and the best are put on exhibition. Members are also able to benefit their collections by exchanging stamps.

HINTS TO THE BEGINNER.

When you are starting a collection don't think that you have to buy a lot of rare and expensive stamps right off. It is better to get all the more common ones you can at first and when you find it hard to add any more specimens then you should buy the hard-to-get kind.

Most beginners make a serious mistake by pasting their stamps in the album. Stamp hinges are sold by all dealers for this purpose, and this is the only way the stamp should be placed in the album. Once the stamp is pasted in a book it is spoiled. Often you want to transfer certain stamps and then is when the hinges show their practicality. They cost only from five to 20 cents for 1000.

When a collector, especially the beginner, buys a large album, he has considerable difficulty in knowing where to place his stamps on account of their different shades, which in some cases are so slight as to pass almost unnoticed. It is better

for the young collector to have some older person assist him in placing the stamps in an album, as then the places can be found much more easily.

Every collector should provide himself with a catalogue, as it helps to find out all about stamps.

It is a good plan for collectors to join some stamp society. Much help is afforded by them, especially to the beginner. There are several good societies. Numerous magazines are published for stamp collectors.

ITEMS OF INTEREST.

The highest price ever given for a single stamp was \$7500, which King George paid for a postage Mauritius, one of the rarest stamps known, and of which only a few copies remain.

The passing away of King Edward necessitated the issuing of new series of stamps throughout the British colonies and Great Britain. King George's picture will adorn the new stamps.

The smallest postage in the world is in a barrel which overhangs the rocks at Tierra del Fuego. Passing ships put in what mail they have for other vessels, which pass that way and take out their own.

King George of England is president of the Royal Philatelic Society of London. He has held this office for several years. A unique method of delivering letters has been lately put into use by steamers passing the Tonga islands in the Pacific ocean. On account of the many reefs about these islands landing is difficult, and what few letters there are to be delivered are attached to sky rockets which are fired and are thus sent ashore.

CHILDREN OF THE QUEEN.

Queen Elena of Italy has created a small colony of poor children, after whose education and well being she looks with quite motherly care. Lately the Queen has established a home for these children near the sea at Santa Marinella. In this place these fortunate ones are called "the children of the Queen."

Children's Camera Contest

WATSON HOMESTEAD, BARRINGTON, R. I.

Said to be the oldest house in Rhode Island. Award to Susan K. Smith, Barrington.

TODAY'S picture shows one of the oldest houses in New England and what is said to be the oldest house in Rhode Island. The photograph wins this week's award in The Monitor's camera contest. It was sent by Susan K. Smith of Barrington, R. I., who writes:

"This old homestead was built in 1660 by the descendants of Sir Mathew William Watson. The house is unusual because it had things so uncommon for its day. For instance it was the first house that was built of brick in this part of the country, and on its walls was hung the first wallpaper in America outside of Boston.

"Another uncommon feature it had was that it had the first carpet in America. This carpet was made from the wool from sheep raised on the Watson farm.

"The Watson homestead, having been built before the revolution, has seen many hard times and it has withstood attacks from the Indians, having been situated near the powerful Narragansett tribes. A few years ago this house was occupied by John Watson and his sister, but now, although it is in a fairly good condition, it is not occupied. This homestead is situated near Narragansett bay in the town of Barrington, R. I."

In The Monitor's camera contest, \$1

will be paid for the best photograph received each week. The subjects may be historic places, quaint houses, parks, picturesque landscapes, marine views, river views, old bridges, school gardens, playgrounds, or children at play. With the photograph should be sent a title and the location of the view.

If a suitable descriptive story of not over 200 words comes with the picture and is used it will be paid for. Write name and address plainly and enclose stamps if return of the picture is desired. Send to "Children's Page," The Christian Science Monitor, Fairmount and St. Paul streets, Boston, Mass.

TWO NEGATIVES.

Susy, six years of age, noticed that the girls of foreign nationalities spoke English in a way somewhat different.

One day her mother sent Susy downstairs with an order to the cook not to prepare any soup for dinner. Presently the little girl came back.

"Well," asked her mother, "did you give Mary the order?"

"Yes, mamma, I told her in Swedish."

"Told her in Swedish? Why, child, what did you say?"

"I said to her, 'You needn't make no soup, Mary!'"—Exchange.

HAPPY LITTLE PEOPLE AT A PICNIC

Picture is a reproduction of a painting by Ludwig Knaus.

THE CHILDREN'S FESTIVAL.

WHAT a jolly party of little folks, and what a good time they are having—boys and girls together. A picnic in summer time with sports and games is a great affair! And then there's the delightful lunch of good things, spread under the trees, sweetly cooled by the soft, gentle breezes of August—how much it adds to make a happy holiday. How good the "sandwiches," tarts, cookies, pickles, olives, jellies, cake and other goodies taste when eaten out of doors in the fresh air amid new scenes—everything so different from the way we eat our suppers at home.

Our little friends in the picture are having "just the happiest" time together, each according to his or her own notion. At the left one little couple are acting somewhat like grown-up folks. The young gallant seems to think he has full right to playfully harass his little sweetheart, who vainly tries to make him behave.

How nice it is that these picknickers do not overlook the little dumb animals who so enjoy to share the merry-making of their masters. They are not forgotten, for some of the tots see well to it that the pussies are also supplied from the ample table of delicious things to eat. It is good that with so much done to make them happy, our merry party contains some thoughtful ones who do not forget to pass the enjoyment down to their four-footed playmates. Even the great noble dog, who has just eaten his share, shows his pleasure and gratitude by the kindly interest in the wee one in the lap of the girl in the foreground.

And there's the dear little baby sitting bolt upright all alone with a chick-bone in her chubby paddy! What a sweet youngster! We do not know what her name is, but it must be "Dorothy," because she looks the name. All unmindful of her surroundings, she is having

such a happy time of it, serene and contented, the gem of this delightful summer scene.

The picture, which has just given us such a pleasant mental picnic, was first painted on canvas in 1869 by Ludwig Knaus, a famous genre painter of Germany. Its title is "The Children's Festival." We are sure the artist loves and enjoys little folks, for how otherwise could he have made the picture so beautiful and true to the childhood of human nature? Then another good man worked with sharp tools and metals or wood, and engraved the likeness of the picture so it could be many times printed on

heavy sheets of paper for people to frame and hang on their walls. One of these sheets came to The Monitor office and a printing plate was quickly made from it. Thus the quite true likeness of the one, original, beautiful picture of Artist Knaus, by the aid of engraving, printing press and mails, is printed by tens of thousands and sent to all parts of the civilized world. By this means the artist's kindly thought of childhood's happy days with its many lessons, is multiplied to thousands of homes far and near. It seems to say to us all: "Be happy and share your joy with all who are with you."

OUR SILVER DOLLAR

DID you ever study a silver dollar?

Around the edge of the dollar is a raised ring. This is to keep the face of the coin from wearing away when two coins rub together. The little scallops on the inside of the raised ring are called the "milling." All around the edge of the dollar are little parallel marks, close together. These are called the "reeding," and are made to keep people from shaving silver off the dollar. The dollars now being minted bear the head of Liberty on one side. This head is not designed from the imagination of an engraver. A young Philadelphia lady named Anna Williamson, possessed such classic features that the government engraver secured permission to copy her head. On the reverse side of the dollar our national bird, the eagle, is shown. In one talon is a bunch of arrows and in the other an olive branch. Partly surrounding the eagle is the laurel wreath. The laurel wreath has been the symbol of victory and progression since the days of ancient Greece. It adorned the brows

of poets, sculptors, athletes and warriors.

Just below the wreath you sometimes find a very small letter. If this letter is an "O" the dollar was minted in New Orleans. The letter "S" indicates that it came from San Francisco. If there is no small letter shown, you may know that the dollar was made at the mint in Philadelphia.

If a silver dollar were melted it would not be worth a dollar, because it does not contain enough silver. It is the stamp of the government which causes it to pass at its present value.—Our Companion.

TIME TO DO WORK WELL.

Many excuse poor, slipshod work on the plea of lack of time. But in the ordinary situations of life there is plenty of time to do everything as it ought to be done; and if we form the habit of excellence, of doing everything to a finish, our lives would be infinitely more satisfactory, more complete; there would be a wholeness, instead of the incompleteness which characterizes most lives.—O. S. Marden.

Educational Institutions

Rock Ridge School
133 Cliff Road
Wellesley Hills
Mass.

Buildings modern. Equipment complete. Physical laboratory. Chemical laboratory. Manual-training shop.

Location high, dry, and wholesome in one of New England's most beautiful residential villages.

ROCK RIDGE HALL for boys of high school age. Thorough preparation for any college or for business. Masters able, experienced, mature. Every boy an object of constant thought and care; hence well-regulated daily lives, marked improvement, rapid progress.

THE HAWTHORNE HOUSE for young boys. Home-like atmosphere. Experienced teachers. Manual training. Constant supervision.

Very cordial relations exist between this school and its patrons. The following extracts are all from letters received in the school's regular correspondence for the months of May and June 1910 and therefore are in every case unsolicited testimonials.

"The progress . . . has made has pleased me very much."

" . . . has changed so much, and so much for the better, this year."

"I have been perfectly satisfied and very much pleased with you . . . improvement while with you."

"I am very much pleased with the results in . . . case."

"We are delighted with the results of . . . first year's training at Rock Ridge Hall."

" . . . worked this year has given me much pleasure, and I certainly feel under deep obligations to you and also to Mrs. . . ."

"In all the time . . . has been with you he never has found any fault with your teachers or a single boy. Every thing was always right. Surely he has improved while under your care."

" . . . has been very happy and contented in your school."

"I have felt great satisfaction in the knowledge that . . . was with you and knew that I had made no mistake in selection of school. I shall always be proud to speak of it in the highest terms. I realize with grateful appreciation that you have done everything possible for . . . more than most would have done, and all our friends notice a great improvement in him. He has been perfectly contented and happy."

" . . . has gained self-reliance, and his association with other boys has been good for him. I wish to thank you and Mrs. . . . for all you have done for him. He has liked school better each year. Last fall he said, 'I should feel very badly if I could not go back to school this year.'"

"My only wish is that I had known of the school sooner."

MANOR SCHOOL

STAMFORD, CONN.

A boarding school for boys. Upper and Lower Schools comprise all grades from primary to college preparatory. Graduates now in all leading colleges. Work thorough, systematic and effective. Instructors college bred. Location overlooking Long Island Sound, unsurpassed. Buildings modern; hot and cold water in every bedroom. Bowling alley, shower baths, large gymnasium, athletic field, tennis courts. Manual Training Department. Atmosphere homelike and wholesome. Careful and sympathetic attention given to the needs of each individual boy along the lines of moral development.

For information and booklet, address

LOUIS D. MARRIOTT, M. A., Headmaster, Manor School, Stamford, Conn.

LELAND POWERS SCHOOL

177 Huntington Ave., Boston

OFFICE HOURS DURING SUMMER MONTHS FROM 9 A. M. TO 1 P. M.

THE BOYESEN SCHOOL

WILL OPEN A
BOARDING DEPARTMENT FOR GIRLS

Over ten years of age on Sept. 28, 1910. Tel. Oakland 2425, or address applications 4901 LAKE AVENUE, CHICAGO.

KIMBALL SCHOOL FOR GIRLS

University Section of Worcester, Mass.

24th year. Superior preparation for New England Colleges. Certificate for Vassar. Scholarships. General and special courses. Gymnasium, field sports. For illustrated catalogue, address Miss E. A. KIMBALL, Principal.

Miss Chamberlayne's

Home and Day School for Girls

The Fenway, Number 28, Boston, Mass.

College Preparation, General Courses. Girls admitted to the day school at 13 years of age. Catherine J. Chamberlayne, Principal.

STANFORD PREPARATORY SCHOOL

Stamford, Conn. A school which offers to boys the refining influences of home life. College system. Only 5 boys of the highest character received in each house. Certificate admits to almost all leading colleges. Address: Stanford Preparatory School, Stamford, Conn. Catalogue, ALFRED C. ROBERT, Director.

Powder Point School for Boys

By the sea. The mild climate permits land and water sports. Prepares for college or business. Extensive grounds. Modern equipment. For catalogue, address Henry P. Moulton, Jr., Principal, 11 King Charles Road, Duxbury, Massachusetts.

Lasell Seminary

For Young Women

Andover, Mass.
Ten Miles from Boston.

A high grade school for young women, offering regular college preparation and special courses, including music, art and elocution.

Home making in all its phases is thoroughly taught. The principles of sanitation, the science of foods, marketing, cooking, the art of entertaining, house furnishing and management, sewing, dressmaking and millinery are studied in a practical way, under the supervision of competent teachers.

Tennis, boating, swimming, riding and other sports are encouraged.

Beautiful suburban location. Address: G. M. WINSLOW, Ph. D., Principal.

The Pianoforte Tuner of Today is Reaping a Rich Harvest.

Pianofortes are being manufactured in far greater numbers than can be cared for by the present corps of tuners. Good tuners earn from \$500 to \$1000 a day. 30 years' experience. My pupils have all been placed in good locations. Send for prospectus.

FAUST SCHOOL OF PIANOFORTE AND ORGAN TUNING.

27-29 "A" Gainsborough St., Boston, Mass.

Wymondham House

School

1537 Yonge Street, Deer Park

TORONTO, CANADA

Reopens Sept. 13.

FAELTEN Pianoforte School

Thorough and complete education in piano playing. Eminent teachers. Special success with those who have found this work difficult. For circular address: CARL FAELTEN, Director, 309 Houghton St., Boston, Mass.

Crane Normal Institute of Music

A Training School for Supervisors of Music in Schools. Graduates fill important positions in colleges, city and normal schools.

A summer session, Aug. 22 to Sept. 3. For circulars apply to J. E. CRANE, Potsdam, N. Y.

Weston School for Girls

43 St. James St., Roxbury, Boston, Mass.

Fits girls for life as well as examinations. It is different, better and worth investigating.

Mrs. Elizabeth Mathews-Richardson, A. B., Principal.

Chauncy Hall School

Established 1828

Prepares boys exclusively for Massachusetts Institute of Technology and other scientific schools.

Every teacher a specialist.

HAGAR & KURT, Principals

581 Boylston St. (Copley Sq.), Boston, Mass.

Oxford School for Girls

Fitting for College. General courses. The intelligent activity of the faculties of each pupil is developed according to her needs. Outdoor and indoor sports.

MISS M. F. MAITIN, Headmistress.

324 Commonwealth Ave., Boston, Mass. General and College Preparatory courses. Residential and day pupils.

MISS GILMAN, MISS GUILD, Principals.

\$300 PER YEAR

BOYS UNDER FIFTEEN YEARS

Address HILLSIDE HOME SCHOOL

West Lebanon, Maine.

Stocks Close Near Best Prices of the Day

STOCKS HOLDING FAIRLY STEADY, BUSINESS QUIET

Prices Fluctuate Within a Narrow Range and Trading Continues Professional in Both Markets.

TOE IS CHEERFUL

Comparatively little animation was displayed in the stock markets today. With many brokers and traders taking week-end vacations the volume of business was considerably diminished. Price movements were characteristic only of the professional market. The fluctuations at the opening were so narrow as to call for little comment. The opening figures were about the same as last night's closing prices. For the first few minutes there were evidences of profit taking as a result of the higher range reached yesterday. Better reports regarding business conditions and the expectation that the crops this year will be abundant acted as a steadying influence. Prices became firmer as the session cleared the close, and although there was no excited bull market good gains were made by many issues. Pennsylvania was off 1/2 at the opening, but soon recovered and rose over a point above the opening. Louisville & Nashville made a net gain of 2 points yesterday. It opened up 1/2 this morning at 141 1/2, and advanced over a point. Reading opened up 1/2 at 143 1/2, and improved over a point during the short session. Union Pacific at 168 1/2 was up 1/2 at the opening. After receding under 108 it rose about a point. There was a good demand for St. Paul.

Many of the active industrials followed the railroads on the upward movement. American Smelting showed particular strength. It opened up 1/2 at 66, declined to 65 1/2, and then rose over 2 points. There was an improved demand for Indiana on the local exchange and the price improved accordingly. Calumet & Arizona opened up 1/2 at 59 1/2 and advanced over a point further. There was a better inquiry for American Woolen preferred. The stock opened up 1/2 at 35 1/2 and advanced a good fraction. Calumet & Hecla opened unchanged at 530 and advanced 10 points further before receding.

LONDON—Attendance in stock exchange is light. Settlement concluded smoothly. Gilt-edged investments weakened in sympathy with a slump in consols to 80 1/2, a new low record on this movement.

In anticipation of the holiday in Paris on Monday foreigners are neglected. Americans constitute the strong section with the Harriman, Atchison and U. S. Steel prominent.

Canadian Pacific and Grand Trunk display positive buoyancy. Rubbers and mines are quiet. De Beers up 1/2 at 18 1/2. Rio Tinto unchanged at 68.

As a result of policy of retrenchment decided upon by the directors of the Boston & Albany, working hours in the West Springfield shops have been cut from nine to eight per day.

James A. Patten and others indicted in June by a special federal grand jury for conspiracy in restraint of trade in the alleged bull pool in cotton have been remanded by the federal grand jury in New York.

Reports of the United Glass Company for the year ended June 30 shows net manufacturing profit of \$113,056. The company produced 41,811 pounds of salable ware during the year, an increase of 432.3 per cent.

Two hundred and eighty two postal savings banks in the Philippines had deposits of \$1,648,024 at the beginning of June. Filipinos constituted 65 per cent of depositors.

A petition asking Governor Draper to retain Bank Commissioner Chapin in office is in circulation among members of the special committee of the Legislature appointed to investigate the Southbridge Bank looting. That committee, in its report, mildly censured the bank commissioner's department.

The Boston & Eastern Electric Railroad Company deposited \$10,000 with City Treasurer Slattery as a guarantee of good faith and to bear the cost of the transit commission of the work of surveying portions of Boston harbor.

PACIFIC TELEPHONE STATIONS.
On June 1 the Pacific Telephone & Telegraph Company had a total of 377,564 stations, an increase of 16,122, or 4.4 per cent since Jan. 1.

NEW YORK STOCKS

Market Reports

Produce

Shipping

HAY AND GRAIN SITUATION

J. E. Soper Company of the Boston Chamber of Commerce: The corn market has been very strong, the strength and advance being due mostly to reports of crop damage. The backward spring weather causing considerable replanting started the bullish sentiment, which has been kept going by dry, hot weather, which will probably be succeeded by early frost scares, so without extra large receipts of corn at grain centers it looks like about present prices for the balance of the crop, with the likelihood of still higher prices sometime before the new crop arrives, and 80 cent corn for New England doesn't seem improbable.

We don't believe the trading in corn for shipment has been very brisk. There is a good demand for nearly corn at slightly better prices than for shipment, with fairly liberal offerings, especially northern lake lines.

Oats are stronger and higher than a week ago, and act as though they wanted to advance, but probably the rather heavy receipts together with lack of enthusiasm on part of buyers, act as an offset.

Oats are reasonable in price and as we said before we think the low prices will be seen in August, and probably have been seen. All things considered, oats are reasonable at 45 cents and we will probably see them higher than that on the crop.

The quality of new oats is excellent and we are told we are now getting the best of the crop. We are getting some excellent natural oats from Ohio. We think as a feeding proposition they excel any oats being offered, quality and price considered.

Trade has been good to heavy in oats.

any strength in the market, bringing out liberal buying. Some old oats are being offered at about 1 1/2 cents over new. Transit oats are in good demand, with rather light offerings.

No special change in feeds. Middlings are in better demand than other mill-feeds and selling about \$3 over bran, a very unusual premium. Lined seed meal at \$36.50 is the highest priced article on the list. Old cottonseed meal is practically unobtainable, with new 41 cent meal selling at \$32.50 for October shipment.

It should be remembered that mill-feeds are selling lower than a year ago. The shortage of hay in the West is a strong feature in both the oats and feed situations.

J. Walter Sanborn & Co., incorporated, of the Boston Chamber of Commerce: The supply of old hay here is now well reduced, being mostly of the poorer qualities. Really nice old hay, if it could be had, would sell readily and at good prices. The scarcity of desirable grades of old hay is forcing consumers to buy good lots of new hay earlier than they otherwise would and considerable new hay has already been sold.

The reported shortage in several of the western states tributary to Chicago, together with the demand for supplies for New York city, has served to make western holders firm in their views and this will be likely to continue till the eastern markets are somewhat better supplied.

Choice old hay would sell \$26 to \$27, good No. 1 \$24 and \$25, No. 2 \$23, No. 3 \$20 and \$21; long rye straw \$13 and \$14; oat straw \$12 and \$12.50.

Shoe Buyers Here Today

Among the wholesale boot and shoe buyers in Boston today are the following:

Albion, Pa.—F. A. Haas of Haas & Son, Adams.
Atlanta, Ga.—J. Saul of J. Saul & Co., U. S. M. George.
Baltimore, Md.—Mr. Strauss of Grotjan-Lake Company.
Butte, Mont.—C. F. Hoyt of M. J. Connell Mer. Co., U. S.
Havana, Cuba.—J. M. Otero of Fernandez Valdes & Co., U. S.
Montgomery, Ala.—E. Nafel of Nafel-Nicors Dry Goods Co., U. S.
Portland, Ore.—J. J. Prince, 28 Lincoln street.
Pittsburg, Pa.—L. Diamondstone, U. S.
Selma, Ala.—Mr. Meyer of Meyer & Elkan, at seashore.
St. Louis, Mo.—E. Levy, U. S.

PHILADELPHIA MONEY MARKET

PHILADELPHIA—There is more than the usual difference in the money rates of this city and New York, and it has been said that Philadelphia brokers have transferred loans to take advantage of the lower rate in the metropolis. This may be true and it is not new, but the fact remains that the Philadelphia banks are loaned up closer than usual and none of them have any large amount of call money to lend even at 5 per cent, which is the official rate. A number of banks are supplying customers with 4 1/2 per cent money, and there is more 6 per cent commercial than is wanted. It is seldom that this money market is so mixed as it has been for the last six weeks.

REAL ESTATE NEWS

Another parcel of land for the new schoolhouse has been secured by the city of Boston. The property was owned by Bertha M. Eicher and comprised a brick house, with 1026 square ft. of land, 17 to 19 Ferdinand street, corner of and 61 Melrose street. The taxed value is \$8000 and the sum paid in excess of that sum. The land is rated at \$4000.

Agreements have passed through the office of W. W. Stall, president of the factory exchange, leasing premises at 493 Commercial street, Boston, for a term of years to the W. H. Nutt Shoe Co., which is fitted up to manufacture a fine line of Boston babies wet shoes.

W. D. Parker reports the sale of the estate at 17 Blackwood street, Back Bay, for Everett Westcott to Thomas H. Spiers, for investment. There is a three-story limestone building, containing modern suites, rated at \$8500, and a lot of 2000 feet of land, assessed at \$4000.

SALES BY HENRY W. SAVAGE.

Henry W. Savage reports he has sold for Louise P. Chandler of Bridgewater, Mass., her estate numbered 747 Washington street, Brookline, Mass., consisting of a 14-room dwelling house and 7452 square feet of land. The property is taxed for \$14,600, of which \$10,000 is on the building. The purchaser was Margaret A. Auerbach, wife of Julius P. Auerbach, who bought for immediate occupancy.

Framingham Farm.

The Morris Farm situated on Fenwick street, Framingham, Mass., consisting of 15 acres of land, an eight-room house, barn and two poultry houses, has been sold to G. A. Morrill.

"PINES RIVERBANK," REVERE.

Houses are already being erected at "Pines Riverbank," which is being subdivided into building lots. The great changes undergone in this property, which was always known as the Squire farm, will be of interest to those familiar with it. In place of the bushes and boulders along Broadway, there are now graded sidewalks to an 80-foot boulevard, which is to extend across the entire property, terminating a mile and a half away at the Linden station, Malden. Fifty men are now employed building five miles of streets, which will transform the one-time Squire farm into a beautiful suburb five minutes' ride from Lynn. Among the lots sold this week are the following:

Lot 652, corner Graves and Squire roads, containing 4500 square feet, to Harry J. Maguire of Lynn.
Lot 477, Squire road, containing 4755 square feet, to Michael Cotter of Lynn.
Lot 665, on Graves road, containing 4937 square feet, to Messrs. Maguire and Cotter.
Lot 840, corner Messenger street and Broadway, to Fred Garson of Belkrocker, Minn. The lot contains 4050 square feet.
Lot 373, on Pitcairn street, containing 4275 square feet, to Arthur Deluce of Boston.
Lot 585, on Pitcairn street, containing 4275 square feet, to Frank D. Arthur of Boston.
Lot 586, on Pitcairn street, containing

4275 square feet, has been sold to Daniel D. Arthur of Lynn.

SALEMAN SALE.

William S. Felton & Co. have sold the seashore property at Winter Island, Salem, owned by the Hood estate, to Sarah A. Kimball and another. The estate comprises a well built modern cottage and about 3000 feet of land.

CAMBRIDGE TRANSFERS.

T. H. Raymond of Central square, Cambridge, reports the sale of the block of frame stores recently constructed at the corner of Pearl and Auburn streets, Cambridge, and numbered 70 to 80½ Pearl street, and being valued at \$14,000.

SALE IN SOMERVILLE.

C. H. Lewis, 15 State street, has sold to Samuel Cutter, title coming through William P. Morse, the property numbered 359 Highland avenue, Somerville, consisting of a two-family house with about 4000 square feet of land, total assessment \$3500. The house contains all modern improvements. Mr. Cutter will occupy same.

THE WINTHROP MARKET.

Values have been steadily rising in and about Winthrop, and some second-hand house properties can be advantageously purchased at the present time. Particulars can be obtained from Robert Brown, architect, 72 Sargent street.

BERLIN FARM.

George Reynolds has sold his farm situated in the southeasterly part of the town containing about 12 acres of land together with the usual farm buildings. The purchaser was Fredericka Spindler, who has bought for a home. Edward T. Harrington Company were the brokers.

BUILDING NOTICES.

Permits to construct, alter or repair buildings were granted at the office of the building commissioner of the city of Boston today as printed below. Location, owner, architect and nature of work are named in the order here given:

New Orleans Enterprise in National Fair Bid

CITY PARK, NEW ORLEANS.
Scene in one of the city's largest public recreation grounds, showing a picturesque lagoon.

STADIUM, CITY PARK.
Picturesque scene in the great municipal breathing spot, showing the classical architecture blending with the sub-tropical foliage.

Texas Favors New Orleans for Panama Canal Fair
SAN ANTONIO, Tex.—Texas will do its best to get the Panama canal world's fair for New Orleans. This is the result of an invitation of the Texas Legislature to Gov. Jared Y. Sanders of Louisiana to address that body on the subject.
Governor Sanders presented the case of the Crescent City in a very logical manner and pointed out that New Orleans was the city in which the affair could be made the greatest success, being much closer to the center of population than San Francisco and making it possible for this reason for a greater number of people to see the exposition.
He also pointed out that the holding of the fair at that place would draw the attention of the world to the possibilities of the South and Southwest and the necessity for developing shipping on the Mississippi river and its tributaries.

NEW ORLEANS. The city of romance of other days, a city of a civilization exotic to the western world, of French balconies, aristocratic Creole families, musical names, old world customs—New Orleans has become a city of today, and a city of civic spirit and enterprise.
It is as one of the cities most eager to be the place of the exposition—in 1915 probably—in honor of the opening of the Panama canal, that it is heralded today, and a civic community enterprising and public spirited enough to undertake to raise such a sum of money as \$7,500,000 to finance such a gigantic project.
It was intended to raise \$5,000,000 at first, \$3,000,000 by city tax and \$1,000,000 by state tax, and the remainder by subscription, but in order to strengthen the argument with Congress that the Crescent City is financially capable of carrying out the enterprise, it has been decided to seek legislative authority to increase the city tax in order to raise the larger amount designated.
Although the picturesque single-story, sloping-roofed cottages of the Vieux Carre that were the primitive dwellings of the city, and their taller neighbors erected in more prosperous times, with their iron balconies and interior courtyards, are gradually yielding to the onward march of the sky-scraper, the modern city is not devoid of impressive and beautiful features. The Athenaeum, where the Lakes-to-the-Gulf Deep Waterway Association met last year, the French opera house, the statue of John McDonough in Lafayette square, are among the public structures of interest. The largest of the municipal parks are City and Audubon parks, the latter embracing 250 acres of ground.
While it is too early, perhaps, to prognosticate what the decision of Congress will be regarding the site of the Panama canal exposition, for which a number of wealthy cities, including San Francisco and the national capital itself contend, it is not an extreme supposition to conclude that the Louisiana Legislature will grant the city of New Orleans the desired authority to levy tribute upon itself for the sake of advancing its prospects for securing the great exposition.

FIRST AIRSHIP LIGHTHOUSE.
What is said to be the first lighthouse built for airships has just been erected on the top of a small railroad building at Spandau, Germany. It consists of 38 powerful electric lamps, which shoot a glaring light skyward. Its purpose is to guide the dirigibles of the German army at night. One of the great gun plants of Germany is located at Spandau.

FRENCH OPERA HOUSE.
One of the well-known auditoriums of the city, where President Taft witnessed the opening of the last opera season.

MCDONOUGH STATUE, LAFAYETTE SQUARE.

NEW ORLEANS ATHENAEUM.
One of the places of public assembly in the Crescent city, and where the last convention of Lakes-to-the-Gulf Deep Waterway Association was held.

INDIA'S RAILWAYS SCORE BIG GAINS
LONDON—Some interesting figures are given in the annual administration report of the Indian railway board for 1909. From this it appears that the total mileage of the Indian railways has reached 31,490. The total number of passengers carried in 1909 was 329,000,000, an increase of 8,000,000 compared with the preceding year. In addition to these the railways transported nearly 61,000,000 tons of goods.
The net average earnings of the various railways of the peninsula was 4.81 per cent of the capital invested, as against 4.33 per cent in 1908. In this connection it is interesting to note that the average fare paid works out at about four-fifths of a cent per mile.

WIRELESS DEPOTS CIRCLE BIG LAKE
Not a point on Lake Superior, the greatest body of fresh water in the world, is beyond the reach of wireless instruments, says the Chicago Post.
A boat carrying wireless equipment cannot find a nook in the great expanse of water where her signals cannot be heard by one of the wireless stations.
Isle Royale, the lonely, picturesque wilderness in the center of Lake Superior, has never been within touch of civilization before.
With stations at Port Arthur, Grand Marais, Duluth, Isle Royale, Calumet and Marquette, the wireless system has a complete circuit of the lake, and a boat will never be more than 100 miles from a wireless station and relief in case of emergency.

THE HOME FORUM

ABOUT BARBERS

N George Enot's "Romola" we catch a glimpse of the barber of the days of Florentine glory as perhaps the best informed man of his circle. In his intimate association with the wise and great and through the brilliant chat that went on in his workshop among the assembled men it is easy to see why the barber in literature stands as an example of intelligence and even influence not equaled by any other worker of his class. The Barber of Seville and the Barber of Bagdad are illustrious examples of the high places which tonsorial art may secure for a man.

In line with these animadversions comes the following note from the Westminster Gazette. The fact that this particular saying from America was picked up by the genial commentator of this English journal would in itself have once been significant perhaps of the English point of view of the "barbarous Americans," but time has changed all that.

"In speaking recently at a convention at Northfield, Prof. E. A. Steiner, the

well-known authority on American immigration, mentioned that a few days before he had asked at his hotel for the barber, and was told that he was away taking his degree at Harvard. The laughter which greeted this statement seems to have been interpreted by the speaker as indicating a lack in the spirit of brotherhood, for he went on to remark: 'If I had said that a Harvard graduate was in Wall street shaving coupons from his father's fortune, that would be socially all right; but a Harvard graduate shaving men—you laughed.'

Championing Irrigation Schemes

Frederick H. Newell is in charge of the work of reclaiming the arid regions of the country beyond the Mississippi by means of irrigation, which is bringing hundreds of thousands of acres of barren waste into fertility and production, says the National Monthly, and reminds us apropos of this modern expedient that as recently as 10 years ago, the popular conception of irrigation, so far as the East, which can depend upon its regular amount of rainfall every season, is concerned, was confined almost entirely to a knowledge of the use of the sprinkling pot and garden hose. Few in the East knew anything worth mentioning of the vast arid acres of the West which might be brought under cultivation and to yield abundant crops, by application of water to the soil. It had been agitated in the West, but interest in the subject could not be aroused elsewhere. Finally, there came out of the most arid state of that section a man who knew more about irrigation than all of the rest of them combined. That man was Francis G. Newlands, now United States senator from Nevada. For 10 years in the House of Representatives Mr. Newlands talked irrigation. No matter what subject was before the House for consideration, if Mr. Newlands spoke, it was almost certain that he would conclude without some reference to his pet hobby, as irrigation came to be regarded. Sometimes he got attention, but frequently he did not. That made no difference, he was pumping facts into the ears of those who he was determined should sooner or later listen, and not only listen, but act.

Exact Thomas

Thomas Hoar, the devoted servant, upon whom Gilbert White, the English naturalist, depended to carry out his garden plans and to look after his chickens in many ways, was noted for his exactness. H. C. Shelley, in "Gilbert White and Selbourne," gives an amusing illustration. There was one occasion when Thomas came to report, "Please, sir, I've been and broke a glass." "Broke a glass, Thomas! How did you do that?" "I'll show you, sir," he rejoined, as he disappeared for a moment. Returning with a glass in his hand, he let it fall on the floor, remarking: "That's how I broke it, sir." "There, go along, Thomas; you are a great goose," said his master, adding to himself, "and I was as great a one for asking such a foolish question."—Youth's Companion.

The Village's "Pretty Maid"

Miss Ethel Risdon, daughter of Mr. and Mrs. W. Risdon of North road, Holsworthy, is this year's recipient of the sum of £10s. under the will of Thomas Merrick, Miss Risdon, of all the young women in the parish, being the one adjudged by the selection committee as best complying with the terms of the bequest—namely, "The young, single woman resident in Holsworthy, being under the age of 30, and generally esteemed by the young as the most handsome, and most noted for her quietness and attendance at church." Miss Risdon is the fourth member of the family to receive the gift. The will was proved in June 1841.

The Turkish Railway Post

THERE is, in the Manchester Guardian, an interesting account, by Sir William Ramsay, of the working of the Turkish railway post. Letters, it seems, can be posted at any station; the official has a compartment to himself, and will sell you stamps, if he has any, and receive your letters. Though the arrangement is somewhat unconventional, Sir William states that, so far as he knows, he has never lost a single letter in all the years since May, 1880, during which he has been using it. The letters, it seems, should be given into the hands of the postal official. It is true that there is generally, or at any rate sometimes, in the compartment

Exactly

"Who'll have jurisdiction over air-ships?" "Why, the highway commissioner."—"Life."

THE SEACOAST OF SOUTH AFRICA

BY MONTAGU WHITE.

TO the South African, accustomed to the bright blue seas and the huge breakers curling in pure white foam over the sandy shallows and rocky shores of his native land, the tamer sea coast of England is always a great disappointment. The gray seas and quick succession of short choppy waves discolored by chalk or red sand, according to the locality, and the artificial attractions of the watering places, are poor compensations to him for the wild and rugged cliffs, the long stretches of yellow sand, and the beauty, exquisite coloring and majesty of the Indian ocean as he has been accustomed to see it from the shores of Kewaria or the southwestern districts of the Colony.

The immense height of the waves off the Cape of Good Hope and Cape Agulhas have given the South African seas an unenviable notoriety, but seafaring men accustomed to sailing off Cape Horn and in mid-Atlantic state that the altitude of the waves off the Cape Colony is no greater than elsewhere, although the intervals between the huge billows are shorter. The experienced captain of a properly constructed ship is, however, easily able to cope with this peculiarity, as is proved by the record of the Union Castle Line during the past 50 years. Yet it must not be supposed that rough weather is prevalent on the South African coast, for during the summer it is quite the exception, and there are long intervals of halcyon weather during the winter or period of northwesterly gales.

The two illustrations represent the bathing pool at Mossel bay, between Cape Town and Port Elizabeth. The surf at times is magnificent at this spot, but the swimming bath is protected by barriers of rocks, while on the landward side the coast rises abruptly to a cliff, crowned by the lighthouse, and some stone quarries, as portrayed in the second illustration. Attention is called to the cave below the quarry, the western face forming a well defined profile recalling Mr. Gladstone's features. To the extreme left of the picture is a large

(Photos specially taken for The Monitor.)
THE SURF AT MOSSEL BAY.
Above are seen the stone quarries. To the left may be seen a profile which recalls Mr. Gladstone's features.

rock, resting curiously on another and called Frog rock, on account of its resemblance to that animal as seen from a certain angle.

SUBSTANCE VERSUS SHADOW

WHILE Christian Science dispenses with many of the cherished beliefs that have come down to us from the more or less remote past, it invariably offers demonstrable facts in place of the theories it annihilates. Christian Science is destructive only of that which is useless or evil. It is essentially constructive along all lines that pertain to the advantage of the individual and of society. It tears down only that which would obstruct the development of the good and the true in consciousness. As scientific Christianity it comes "not to destroy, but to fulfill." Its methods are progressive and its results substantial. In the light of what it gives no tinge of regret remains for that which is taken away. This is the unvarying verdict of its adherents.

When one is ready to discard the belief that God is an exalted personality, sitting afar off on a throne of doubtful or at least difficult accessibility, there comes into view through Christian Science enlightenment the God who is omnipresent Love, the divine Mind that is ever available under all circumstances—a sure haven from every human tempest, an unfailing balm for every mortal wound. Out of the fulness of his individual experience the Christian Scientist is enabled to return a prompt and confident affirmation to the Scriptural inquiry: "Am I a God at hand, saith the Lord, and not a God afar off?" The great gain of an advance from a theoretical belief in a distant deity to a demonstrable apprehension of a loving Father "at hand" is one of the rewards which Christian Science holds out to the diligent and faithful student.

Then there is the depressing belief that man is a helpless victim of heredity, environment and other things over which he has no control; that he

must suffer because of the sins or delusions of others. Christian Science destroys this monstrous theory by emphasizing the fact that man's rightful inheritance is freedom; that the law of God (the only real law) is the law of liberty. The study of Christian Science puts one in the way of coming out from under the thralldom of any false law by which the just could be made to suffer for the unjust. When one learns that the source of an ill need not be sought beyond one's habits or modes of thinking, the question of escape therefrom becomes comparatively easy; for with the knowledge that evil is primarily mental comes the understanding of how thought may be brought under control and directed away from the channels that lead to discord and destruction.

Christian Science takes away the old notion of the kingdom of heaven as a place to be reached in a future life only, and substitutes therefor the apprehension of the kingdom "within you"—a state of perfect consciousness to be here and now acquired and enjoyed in proportion as true spiritual thinking is permitted to take the place of the false concepts of materiality. Thus is the plan of salvation relieved of the mystery with which scholasticism was enshrouded it, and the glorious fact is made known that man may be saved as soon as he is truly willing to make himself ready. The inspiration to right endeavor which comes with the understanding of this great truth is beyond words, but the intelligent observer may read the story in the regenerated lives of many of those who have turned to Christian Science for light on their pathway.

The axe of Christian Science is laid at the root of the ancient superstition that matter has life or intelligence or power in itself to obstruct, control or influence man. Material sense may be shocked at the Christian Scientist's contempt for some of the things that mankind has

been taught to bow down to and worship, but when the student begins to realize the height and breadth of the spiritual reality which Christian Science offers in place of the unstable vanities of matter, he knows that what may at first have appeared to be loss is instead superlative gain.

Christian Science bids man to cease searching for health in drugs or other material means. This is not done in order to deprive him of anything that is for his ultimate good, but because true healing is to be found only in the application of the spiritual remedy. Drug medicine treats effects merely, whereas the medicine of Mind searches out and destroys the cause of disease, which lies hidden behind a material manifestation.

Likewise, Christian Science teaches that one who would have the truth must cease searching for it in the labored theorizings of human philosophy and turn to that which is demonstrable. Truth is not dependent upon the word of any person, nor is it fully appreciable even through the combined expression of the world's clearest thinkers. That is only true which is provable in individual experience, and this is the test which Christian Science teaches us to apply. Truth, in other words, must be known by its fruits. "Ye shall know the truth and the truth shall make you free," said Jesus. In so far as the accumulated wisdom of the ages fails to measure up to that standard, it is not of the truth and may not safely be depended upon in working out the real business of life.

Thus we see that Christian Science gives to its followers infinitely more than it takes away and how well grounded are the expressions of gratitude daily and hourly going up from the increasing army of those who in some degree have earned the priceless right to be called Christian Scientists.

Look, and See

In hush of night, look!
And see:
The light shed by the moon
From star-set sky
Upon the lake;
And see each beam-kissed ripple
Shine
Like scattered gold
Upon the lake.

In time of doubt, look!
And see:
The love shed, like the moon,
From God on high
Upon some heart;
And see each faith-filled action
Shine
Like beacons bold
Set for your heart.
—Leslie H. Allen.

Riches of Patagonia

THE Pampas of Patagonia, famous for their sheep ranches, are great desolate deserts, sometimes level as far as the eye can reach, sometimes undulating in graceful monotony, and again a chaos of lava rock, says Harper's Magazine. A few swift rivers have plowed steep canyons. In slighter depressions, where snow melts and water accumulates, there are grassy meadows. Several hundred sheep were brought from the Falklands in 1877 to Punta Arenas, and sheep raising was thus first introduced into the regions of the strait. From this nucleus and shipments which followed the stormy Terriorio de Magallanes (of Chile) today carries perhaps 2,000,000 sheep.

Punta Arenas is its center and base of supplies. To the north of the strait, south of Rio Santa Cruz (Argentina), the littoral and contiguous river valleys support perhaps 1,000,000 more. Thus this little, lonely strait settlement, the mecca of southern Chile and

THE BALZAC MUSEUM

MANY ardent friends and admirers of Balzac gathered together at the house formerly occupied by the great writer in the quiet little rue Raynouard, Passy, to take part in the recent official ceremony of opening the newly founded Balzac museum. About 12 months ago it was decided to acquire Balzac's old residence and to establish there a Balzac museum, and since that time many articles intimately associated with his life and work have been collected together and installed there. This work has been a labor of love, and M. Paul Bourget, who has been an active leader

in the movement, has been ably supported by Mme. Alphonse Daulet, M. de Royanmont, M. Maurice Barres, M. Jean Richepin, and many other well known people in the world of letters, as well as by the members of the Balzac family, particularly M. Laurent Surville de Balzac, M. and Mme. Pierre Carrière-Belleuse, and M. Paul de Saint Pierre de Montaigne.

The collection includes many valuable relics, among which are the sketch of Rodin's famous statue of Balzac, which was never finished, and the dispute over which has become a matter of history, several sketches of him by David d'Angers, and the inkstand in the form of a padlock used by him. A special feature of the museum is the library, which contains a valuable collection of the numerous editions of Balzac's works.

At the inauguration, M. Harcourt, representing the under-secretary of state for fine arts, delivered an interesting eulogium on Balzac, and was followed by M. Bellan, who in representing the municipality of Paris made interesting references to many well known incidents in the life of Balzac.

The old house, which stands in a little rose-bordered garden, is filled with souvenirs of the famous novelist, who lived there from 1841 to 1848.

The Tibetan Ruler

A quaint story is told of the adventures and troubles of the Dalai Lama in a blue-book on Tibet. Sir John Jordan, describing a visit paid to him in Peking, says he spoke to the Lama in English, which was translated into Chinese, and finally reached the Dalai Lama's ears in Tibetan. The exalted rank and sanctity of the Dalai Lama do not permit him to pass under a city gate, which would impose an obstruction between him and heaven. As he had to get through the walls of Peking somehow, it was proposed at first to line the gates with an artistic representation of the sky painted on canvas. It was finally decided, however, to erect an inclined plane to permit the Lama being carried over the city wall.—London Standard.

To educate the heart, one must be willing to go out of himself, and to come into loving contact with others. —James Freeman Clarke.

A One-Hundred-Mile Seashore Road

A beach trip of 100 miles by automobile is one of the projects which will bring Newport Bay and its various beach resorts into enviable prominence in motor circles, says the Los Angeles Times. When the roadway plans are carried out it will be possible to leave Los Angeles over smooth boulevards, penetrating the beautiful groves and fields of Orange county and, emerging on the seashore from the mesas of Newport Bay country, to continue northward along miles of surf line as far as Long Beach, where another boulevard is already making connection with the city. It will be a circular trip of nearly 100 miles without passing the same point twice. In spite of its length it will be an easy day's tour, as the roads will be smooth and there will be little other traffic on the route.

There will be many picturesque features in the construction of the road at Balboa. The approach of an automobile now seems impossible, but bridges and concrete roadways will surmount the apparent difficulties. Automobiles in Balboa will be as unique but not as strange a sight as in the old world Venice. They will cross the channels and find their way out to Balboa islands in the middle of the big bay. They will ferry across the navigable channel strip of peninsula to mainland again.

Mr. Roosevelt as a Neighbor

"The same qualities," Mr. Roosevelt often said in speeches during his administration, "are required to make a good President as those required to make a good neighbor." And no one at Oyster Bay can say that Mr. Roosevelt is not a good neighbor. It was his custom when his children were younger to send them each to the little rural school-house known as the Cove school. It is such a village school as many of us remember—a small frame building on a brick foundation, a few wooden steps, a creeper or two growing about the windows, and low-ceiled rooms within, painted white. No one can help feeling pleased that the President of the nation (for he was President then) should be democratic enough to send his children to the village school. It would be easy for a campaign orator to grow maudlin over such a fact, but it is none the less pleasant for that. Both Mr. and Mrs. Roosevelt were wont to attend the exercises and prize-distributions. —Review of Reviews.

France and Greenwich Time

The civil time of most countries differs from Greenwich by an integral number of hours in accordance with the zone time system adopted by an international congress some 25 years ago. The most noteworthy exception is France, which keeps the time of the Paris meridian a few seconds less than ten minutes fast of Greenwich. Several attempts have been made to bring France into line with the zone system, and some 12 years ago a bill for this purpose passed the chamber, but got no further. The French minister of works, however, has now taken the matter in hand, and when Parliament meets after recess a bill making actual Greenwich time compulsory is to be introduced, and is confidently expected to become law. —Exchange.

The Business Situation

A most important lesson to be learned from present business conditions is that of economy and conservation. The notorious waste by national, state and municipal governments, by corporations and individuals, must be ended before we can enjoy the full measure of our present blessings. This country has been so abundantly prospered in years past that men generally have become possessed with the idea that the only way to thrift and success is in expansion. As a result there has been woful waste and extravagance where there should have been a degree of frugality which if carried out in all departments of commercial and domestic activity would have given the nation a far more important standing among the countries of the world. It is indeed most remarkable that our prosperity has been so great in view of the reckless manner in which we have handled our wealth.

There are indications now that men of affairs are beginning to turn their attention to this subject of economy. Many individuals have been compelled to practise it by reason of the higher cost of living and inelastic incomes. Corporations are likely to give the matter serious consideration because business does not always continue to expand without occasional halts, and profits must shrink if frugality in some directions is not resorted to. Some of our municipal governments are setting a good example by reducing expenses where it can be done without injury to the city's welfare, and others would do well to follow the example.

The problem which confronts the railway companies and the interstate commerce commission, that of freight rates, is one of greatest importance to the whole country. Railway business has expanded at a wonderful rate, but operating expenses have increased to such an extent that the companies are at a loss as to how to meet expenses and dividend requirements without advancing freight rates. Whether the burden eventually falls upon the public or not, the present situation affords the railway companies an excellent opportunity of studying the question with the view of curtailment of expenses by more efficient operation without hardship to themselves or the public. Just how it is to be worked out is a matter difficult at this time to determine, but with the best talent of the commercial world engaged in an endeavor to solve the problem a satisfactory conclusion may be anticipated.

The government crop report issued this week indicates that the harvest this year, while not as large as many had expected earlier in the season, will be abundant. Taking it as a whole the yield will be adequate to meet all the country's needs and leave a good balance for export. Compared with a few years ago the promised return this year would be regarded as amazingly large were it not for the larger demands due to increased population.

Senator Aldrich's Answer

WHEN a man is accused by a political opponent of profiting directly or indirectly by legislation with which he has to do, it is natural and proper that he should defend himself as he thinks best and that he should make every effort to clear himself of an imputation that must wound him. Such a course of action has been taken by Senator Aldrich in respect to certain allegations made by Senator Bristow in Kansas on the 10th of July. Senator Aldrich has made a long answer, that has been drawn with care and exhibits some detail. To the more specific allegations in the answer, a direct denial cannot be made without the risk of misinformation or discourtesy. Mr. Aldrich is a competent witness as to the details of his own business and it is useless to deny it. On the other hand, we must reserve to ourselves the right to form our own conclusion as to whether the Intercontinental Rubber Company is virtually a trust or not. The history of trusts in the United States courts being what it is, founded first on sworn testimony and then on judicial decision impressed by judgment, Senator Aldrich will not be much surprised though he may be annoyed if the people are backward at looking at a corporation such as the rubber company as an organ of philanthropy. But the discussion of this question ought to be quite without heat because it takes on the color of one that affects the whole nation and must continue to affect it till right be firmly settled.

In the beginning of his letter of defense, Mr. Aldrich says of those gentlemen who are not entirely satisfied with the Payne-Aldrich bill, that they "prate about the treatment of the tariff as a moral question." Had Mr. Aldrich honored us with a sight of a draft of his letter, we should not have admired the insertion of this clause; it is defective as a technical plea in that it is argumentative, and is very much more defective in that it speaks disrespectfully of a term that under the Power which guides this and all other governments must always be applied to the conduct of a nation's affairs. The nation's thanks and those of all civilized communities are owing to any body of men of whatever politics that are willing to make moral questions of national significance. We are not aware at this writing whether this specific term has been used by those "insurgents" and Democrats who have spoken against the tariff, at all events they have to thank Mr. Aldrich for an illuminative addition to our political phrase-book. But had these gentlemen used this expression, to our notion they would have used it because in the opinion of thousands of men the treatment of the protective tariff is most decidedly a moral question, for the reason that it involves without beating about the bush the peremptory query, How impartial can be members of a legislature that fix the terms of a tariff ostensibly intended to protect industries in which those members must be directly or indirectly interested?

We have laughed for years at that juridical system in France that allows prosecutor and judge to be conjoined in person, and we have disapproved of it with an easy superiority, yet it cannot be said that our system of tariff legislation is any more enlightened morally.

Mr. Aldrich shows that the duty on certain articles of manufactured rubber was increased from 30 to 35 per cent on the recommendation of treasury agents for certain administrative reasons. We do not connect Mr. Aldrich in any way with this in-

crease, but we do call attention to the additional statement that he makes for approving of it, namely that although a 30 per cent duty was ample for protective purposes on manufactured rubber, still the articles imported that were affected by the increase would not be burdened. Perhaps not, but the last state of the consumer would be worse than the first. Not content with this, Mr. Aldrich goes on to point out that when the average rate of duty on articles imported into the United States is 41 per cent, little complaint can be made when a duty is put at 35 per cent. We are again moved to give our attention to a moral question: Is a nation truly benefited by such a tariff system that one of the legislators who has a large part in framing it can speak with indifference of a rate of taxation on imported articles of well over a third in their value, that rate to be reflected automatically in the price that the consumer must, not may, pay?

We are relieved that in this we can discuss this question in a phase that does not touch Mr. Aldrich personally. He has answered Mr. Bristow and to offset what he has said, Mr. Bristow must bring new and weighty facts to cover these specific denials. But when a senator of the power and experience of Mr. Aldrich gravely disowns a moral question and by implication in deed and word disregards the patent fact that the present system of tariff legislation creates a vast cooperation of selfishness, we gladly go to a great man for words and say with Burke, that "morality is perplexed."

It is to be hoped that the fines and prison sentences that are being imposed on the Montana census takers for giving their town a larger population, than the facts warrant will serve as a general preventive at the time of taking the next ten-year census.

RECENT experiences in many of the large cities of the country have convinced the authorities that the introduction of motor fire department vehicles has become a necessity. This is especially true of those cities that have already partially equipped their fire departments with automatically propelled engines and hose carts. In New York, where direct pressure is doing away gradually with the fire engine, attention has been mainly centered in the motor hose cart. So far trials demonstrated that it is in every way more effective than the horse-drawn cart. It can reach the scene of action in less than half the time required by the latter, and it can carry twice the length of hose. It can be maintained, according to Fire Commissioner Waldo, at an annual cost of \$50, while the cost of feeding and stabling a team of horses is \$1200 a year.

Of course the most rational method of extinguishing fires in these days is that of direct pressure, and wherever it is possible to do so, and particularly in large towns and cities, it should be adopted. This method dispenses with the use of the fire engine. It will be a considerable time, however, before the direct pressure system will be in general use, because of the cost involved in putting in new service water pipes. In reality, it would be an economical step for communities to assume this first cost at the earliest time practicable, but until they do the next best step will be the substitution of automobile engines for those drawn by horses.

The losses resulting from fires in the United States annually are no less enormous than disgraceful. They imply a certain public disregard for ordinary precaution which is anything but creditable to us as a people. The destruction resulting from carelessness and negligence has become a terrible tax upon American capital and labor. We are sadly in need of education which will teach us to have a greater regard for that kind of conservation which comes nearest to us all. In the meantime we should not be slow in the matter of taking advantage of every improvement which promises to safeguard from fire the fruits of honest industry.

THE METEOR show that is promised for tonight is likely to be the biggest astronomical entertainment of the season. It is scheduled as an all-star performance.

The New Commerce Court

To a very considerable degree the industrial peace and welfare of the country will lie in the hands of the new commerce court created by the last session of Congress, on the recommendation and at the insistence of President Taft, for the purpose of intelligently enforcing the provisions of the interstate commerce law. Within the jurisdiction of this court will come practically the settlement of all controversies and disputes arising between the shipper and the common carrier. Incidentally, this court must, through its decisions, give assurance to or cause unrest among the investing and the employing classes. So closely identified are the transportation interests with all others that any legislative or judicial action having a tendency to disturb them affects the business of the country in general.

It is all important, therefore, that the commerce court about to be organized shall be composed of men whose ability, integrity, and poise are beyond reasonable question. The decisions of the court must have regard not merely for the immediate interest of the shipper or the carrier but for the ultimate welfare of the public. It must not be swayed by popular clamor nor influenced by popular prejudice. It must deal out even-handed justice, and be prompt and fearless in the discharge of its duties. Let it but once win the confidence of the people and it will be in a position to render invaluable service to the country in the adjudication of disputes which under our present system call for special conferences, much negotiation and long and frequently very costly delay.

For the reason that the commerce court was peculiarly a Taft measure, the President is naturally very anxious that it shall work out successfully. Therefore, it is understood, he is desirous that it shall be composed of the very ablest and best men available, without any very great regard for their party affiliations. In this desire he may be fully assured of public sympathy.

THE notable performance of Uhlan at Cleveland yesterday, when he trotted a mile without a wind shield in 1:58.4, thus clipping 2 1/4 seconds from the former world's record, will serve to remind the public that the horse is still an object of widespread interest and admiration.

THE retirement of Secretary Ballinger, it is reported, has been set for Sept. 15, but as yet no one has named a date for the termination of the Aldrich-Bristow rubber controversy.

Motor Fire Department Vehicles

THE EDITOR of a paper in the city of Rochester, N. Y., has addressed to Mr. Sulloway, the member of Congress for the district, an open letter in which he puts a number of questions. We do not give them all, though none lack in directness, but call our readers' attention to the fourth, which in substance asks the congressman whether he still maintains an opinion that the speaker of the House of Representatives should have absolute power to prevent any legislation that he deems undesirable from even reaching a vote. We have no knowledge whatever that the member has ever expressed such an opinion or that he holds it today, and there is no need of insinuating that he does. The thing to be attended to is the grave criticism on American constitutional and parliamentary government contained in the editor's question, a criticism that cannot be waved aside as the inaccurate statement of political controversy. It is nothing of the sort, but an anomaly or something worse, imbedded in our system of federal parliamentary procedure, that is opposed to the whole theory of popular government.

The general idea of a speaker, as one calls the officer that presides over the deliberations of legislative bodies founded on the model of the House of Commons, is that of a moderator and one that shall see to it that deliberation and discussion are fair and orderly and that proceedings are governed by certain recognized rules of procedure. As he must be a member of the house, he must belong to a political party, but it in no way follows that because he so belongs he must as speaker act as though his duty were to maintain the welfare of a political party. Yet this is the position that the speaker of the House of Representatives now enjoys, through the harmful sophistry of politics. It goes without saying, that in a country where the volume of affairs is so vast as it is in the United States and Great Britain the system of committees must be used to a great extent, and to these committees must be delegated much of the work that was done by the whole legislative body when this country was smaller. But this does not do away with the argument that the house as to both sides should determine what the nature of that work shall be which is so delegated to committees in the first place, and shall discuss it impartially to both political parties; and that in the second place, when those committees shall have done their work, both sides again shall have free right to discuss the result and to vote upon it. Neither of these things exists today.

During the somewhat acrimonious controversy that has raged of late in England on the faults and virtues of the House of Lords, one of the most plausible arguments advanced against that body has been, that, it being composed largely of Conservatives, no measures of a Liberal government had any good chance of success on their merits and must be at the mercy of that Conservative majority in the upper house. Although we do not think that the hardships of the present government are quite so severe as part of the Radical press profess to believe, yet it must be admitted that such a state of things hurts quite as much by the mental habit it engenders as by the actual deeds it permits. But it is not essentially different to the abuses now existing in our House of Representatives, especially where a partiality foreign to all ideas of constitutional government is expressed in the person of an officer whose election has taken place because of a rule or tradition in constitutional parliamentary government that his functions ought to be those of impartiality and the furtherance of the business of the nation. It was never intended that such an official should be encouraged in such a view of his position as that he should deem himself the representative of a political party, but on the contrary it was and righteously still is the real intention of our constitution that the speaker of the House should be the servant of the people.

THE report from Danville, Ill., which says that Speaker Cannon continues to "stand pat" and the one from Beverly, Mass., to the effect that "Cannon is to be eliminated" will probably meet somewhere midway between the Atlantic and the Mississippi and then the public will be interested to see what really happens.

A RESOLUTION of most happy omen was approved at the Pan-American congress on Aug. 11, by which a project is embodied to reorganize the bureau of American republics under the name of "The Pan-American Union," and which provides that the president of such union shall be the secretary of state of the United States. Nobody can take into account the old-fashioned attitude of countries toward one another of indirectness, nobody can look back on past history with its play of petty motives and suspicion, nobody can scan the utterances of our government for three-quarters of a century on the subject of a sincere friendship for South America, and not admit that the peoples of the world have made an impressive stride when such a resolution as this can be entertained, much more approved, in a congress of independent republics. It signifies that a body of serious and responsible men have admitted with a candor that does them credit the friendship professed to them and practised by the United States with equal candor. Here is the goodly picture of nations enrolling themselves in the regiment of friendship; and the fact that it is purposed that they shall be aided in their work by an organization of themselves that shall have for president our secretary of state but makes our duty the greater to deserve that confidence and trust.

It might be easily hinted by this power abroad or by that discontented faction in South American politics that the United States aimed at aggrandizing its influence or sought territory through intrigue or war. It has been pretty plainly said with puzzled annoyance on the part of more than one foreign nation that such were the ambitions of the United States. No better answer to these suspicions could be found than the approval of this resolution on the part of representatives of South American governments. The thing that the United States desires in South America is that by such peaceful continuance of prosperity and independence in government as teach nations their real strength shall the republics of South America attain that balance and authority vital in making them our allies in preserving republican government. That in taking such a step as we have narrated they have moved appreciably toward their goal only emphasizes the duty of all citizens of the United States to foster in every way the closest relation of friendship with their brother republicans in South America, and to accept cheerfully an opportunity, the far reaching importance of which is unfolding itself with increasing swiftness.

A Speaker or Mr. Cannon?

Northward and Southward
